THE REVEREND JOHN KEATE, D.D.
HEAD MASTER OF ETON COLLEGE,

This Accented Edition

OF

THE ETON LATIN GRAMMAR,
WITH NOTES,

IS MOST RESPECTFULLY INSCRIBED,

BY

HIS VERY OBEDIENT SERVANT,

T. W. C. EDWARDS.

P R E F A C E.

THIS Work consists of the common Eton Text, with very slight alterations in four or five places only; but with the addition of *accents* on all English words of more than one syllable; and of the *quantities* of the several syllables of all the Latin words; and also of the acute accent on the syllable to be accented in every Latin word of more than one syllable. The vast utility of this plan can never be so fairly appreciated as by comparing the pronunciation of boys in schools where this Grammar is used, with the pronunciation of boys in schools where it is not used: and by viewing at the same time the diminution of labour to persons engaged in tuition, and also the satisfaction they must feel, at the accuracy, and accelerated progress, of their pupils.

Independent of the improvements just named, the common Eton text is rendered clearer than heretofore, by the method of printing the Latin, and by the amplification of the English of several of the words.

The Notes, appended to the Text, are of the most useful description, being selections from the best authors of antiquity condensed into as few words as possible, yet always preserving a lucidity. The same plan of marking the *accents* and *quantities* is pursued in the Notes as in the Text.

Again, in the present Work, the Construing is entirely new,—the genitive case of the several nouns, and, when anomalous, sometimes even other cases, being given; with whatever else appeared to me to be calculated to render the Latin more intelligible, and the whole more profitable to learners, than the old mode of translating the Rules and Examples could render it.

After the Construing, I have given a short appendix, containing various necessary information on Punctuation and

the use of Capital Letters ; and also the principal figures of Grammar and of Rhetoric.

Some persons, I am well aware, think that the quantity of the Latin syllables is really an object of very little importance, and that accentuation is a matter of no moment at all the meaning of words, and the construction of sentences, being the chief thing to be learnt : and, they say, that accent is so much at variance with quantity, and quantity with accent, that, in a greater or less degree, the one must always be sacrificed to the other :—moreover, they say, Latin being a dead language, it may be pronounced as we like, without error and without offence. But what can be more false than doctrine like this ?

A strict observance of Quantity is not by any means incompatible with the strictest observance of Accent ; nor can any language be properly an oral language without a strict observance of both, according to some acknowledged system,—*true or false.*

If, in the Latin language, we moderns agree to shorten many of the long syllables, in pronouncing them ; and to lengthen many of the short syllables ; and, also, to accentuate the words in a way in which they never were accented by the Romans, let us not say we are reading or speaking Latin.

My main object in the present performance being to induce and to establish a habit of correct enunciation in reading and in speaking Latin, (as respects Quantity and Accent), I shall here briefly state what is meant by each of those terms.

By QUANTITY, then, we are to understand the time *actually* and *practically* devoted, in the act of speaking, to the enunciation of a syllable : thus, a syllable uttered *quickly*, as to time, is said to be *short*,—but a syllable, uttered *slowly*, is said to be *long*. Take, for example, the two English words “oval” and “oven,”—and it will be found, that by every man and woman bred in England, the former is pronounced as two long syllables, and the latter as two short ones :—the “o” in “oval” and the “o” in “oven,” it will be allowed, seem to the ear to be scarcely the same letter.

Just so in Latin ; the “o” in the word “*ōvūm*, an egg,” and that in “*ōvis*, a sheep,” are equally distinct from one

another :—nor less so, the “o” in “prōnūs, *prone*,” and that in “bōnūs, *good*.”

In Latin, in Greek, and every other language, the length of a long syllable is not always owing to the length of the vowel in it; for, whenever a short vowel stands before a consonant, and the next syllable begins with a consonant, the time occupied between the consonants causes the first syllable to dwell on the ear longer than it otherwise would do, and hence its quantity is said to be long. Now where a long vowel or a diphthong is followed by a consonant in the same syllable, and the next syllable begins with a consonant, it follows that the first will be still longer, than one in which the vowel is short.

But, as every ear cannot discriminate, with so much nicety, the precise *time* and *parts of a time* which a correct speaker actually devotes to the enunciation of every individual syllable, Grammarians content themselves with the division of quantity into *long*, *short*, *doubtful*, and *common*.

Every long syllable ought, at least, to occupy double or twice the time of a short syllable; but syllables which are doubtful are uttered of a length betwixt long and short. Common syllables are such as are with equal propriety either long or short, at the option of the speaker or composer.

By ACCENT, we are to understand a peculiar inflexion and stress of voice laid upon some one syllable of a word.

Of accents there are three, namely, *the acute*, *the grave*, and *the circumflex*: but here we shall speak of the *acute* only, being that to which we moderns mostly confine ourselves, the limits of a preface not admitting of much detail.

In every word, then, of more than one syllable, some particular syllable of the word is always distinguished from the rest by a sort of émphasis, or greater stress, given to it by a stroke of the voice.

Without this, language would be monotonous, and often unintelligible to a hearer; for it would be next to impossible, in many instances, to know where one word terminates, and another begins.

In English, we have many words accented on the last syllable, as “aslánt, condescénd;” but in Latin very few or

no words have the accent on the last syllable. In that language the accent falls either upon the penult or the antepenult of words. Hence it follows, that *in all words of two syllables the stress must be on the first syllable*. Again, the place of the accent in polysyllables is readily determined by the following simple Rule:—

If the penult, or last syllable but one, be long, the accent is on it, but if the penult be short, the accent is on the antepenult, or last syllable.

It would, no doubt, have been extremely amusing to the ancient Greeks and Romans, to hear a word *pronounced* with the accent on the fifth, or sixth, syllable from the end; as it sometimes is in English; when in their respective tongues the antepenult, or third syllable from the end, was the very farthest from the terminational syllable that the accent was ever removed.

But in Greek, as in English, many words were accented on the final syllable.

In speaking all this time of accent, I must be decidedly understood to mean nothing more than that weight, or stress of voice, which serves to distinguish some one syllable of every word, containing more than one, from the other syllables of the same word; without alluding at all to the species of accent, or to the tone, or musical key, in which the ancients uttered certain syllables, conformably to the genius of their native tongues.

This subject, on which the elegant and forcible use of the Latin language so much depends, merits the greatest attention, let us, therefore, always lay the right stress of voice upon the right syllable,—equally regardless of the scorn of pedants, and of the sneer of fools. Be truth our sole aim, and error our only fear.

T. W. C. EDWARDS.

 In Scanning the Hexameter Rules, every syllable long by position is marked long; but in all other instances the true quantity of the syllables is given,—without reference to position.

THE
ETON LATIN GRAMMAR.¹

THE Látin Létters are thus written

Cápitals.

A B C D E F G H I J K L M N O P Q R S T U V X Y Z.

Small, or Cómmon.

a b c d e f g h i j k l m n o p q r s t u v x y z.²

Of these Létters six are námed Vówels, *a, e, í, o, u, y.*

¹ As Grámmar is that Sciénce which has for its óbject corréctness of lánguage, both óral and written, it fóllows then, that Látin Grámmar must mean the knówledge and art of speaking and of writing the Látin lánguage corréctly; that is, accórding to the estáblished Rules of the Róman tongue, and úsage of the Róman writers. By the E'ton Látin Grámmar is implied the abridged Mánual of Mr. LILY, which has for mány years been succéssfully employed at E'ton school, to inítiate boys in Látin.

In Grámmar there are four dístinct depártments or dívisions:—

I. *Orthógraphy*, which teáches us the shape, and sound, of the létters of a lánguage; and the right méthod of combíning them in the formátion of sýllables and of words.

II. *Etymólogy*, which treats of the derivátion, significátion, and afféction, of the várious parts of speech.

III. *Sýntax*, which detérmines the Right Constrúction of words in a séntence, and points out their mútual connéxion, depéndice, and relátion.

IV. *Prósody*, which is the perféction of the óther dívisions; and which régulates the pronúciátion by fixing the time or quántity of sýllables, the áccents of words, and the tone and émphásis, that ought to be óbserved, in the útterance of séntences. To this dívision of Grámmar belongs the entíre art of *Versificátion*.

² These are called Róman cháracters, béing baséed on and resémbling, in a considérable degreé, those úsed by the Rómans or Látins. They are, howéver, not altogethéer the same. It is a mistáke that the Róman cháracters have been retáined since the times of the Rómans, as each succéssive age úsed a dífferent cháracter; and a pórson accústomed to Látin mánuscripts, and skilled in réáding them, can detérmine the áera of each from the cháracter úsed in it. Our présent Róman cháracter was fórméd by the éarly púnters, by áltering those úsed in Látin mánuscripts. It is úsed by the Itálians, Spániards, Danes, Swedes, En'glish, French, and látterly by the Dutch. Várious attémpths have been made to introdúce its use in Gérman works; but though mány Gérman publicátions, of gréat impórtance, have been púnted in the Róman cháracter, by ~~much~~ the gréater númer of the púnters of that cúntry retáin the Góthic,

The rest (*h* alóne excépted³) are called Cónsonants.

A vówel makes a full and péréfect sound of itsélf, as *e*.

A cónsonant cáannot be soundéd withóut a vówel, as *b*, pronounced *be*.

Cónsonants are dividéd into mutes,—líquids,—and dóuble létters.

The líquids are *l, m, n, r*; ⁴ the dóuble létters are *j, x, z*: ⁵ the remaining létters are called mutes.⁶

K, Y, Z are found ónly in words óriginally Greek.

A síllable⁷ is a dístínt sound of one or more létters pronounced in a breath.

or black létter. The stúdent who wíshes for informatión on the íntricate súbject of *Palæógraphy* (as it is térméd), will receive full satisfáctión in Mabillon "De Re Diplómática," and Champollion, "Paléographie des Classiques."

³ The létter *h* is néither a vówel nor a cónsonant, but a sort of breáthing or aspirátion. It is found both at the begínning and in the míddle of words, and líkewise at the end: but in Látin, few words términate in this létter.

⁴ Grammárians have gíven the name of líquids or semivówels to these four létters, becaúse, though they cáannot be soundéd withóut a vówel, yet, líke the impéréfect mutes (see note 6), no one of the four impédes the voice entírely, as ány of the péréfect mutes impédes it; and moreóver becaúse ány one of the four can fóllo w a mute in the same síllable, and líquídly coaléscé with it. Thus, in glis, a *dórmouse*, the líquid *l* fóllo ws the mute *g*, and coaléscés with it: so, in crux, a *cross*, the líquid *r* fóllo ws the mute *c*. Of these four létters *l* and *r* ocúrr more fréquently áfter a mute in Látin words than éíther *m* or *n*: and of the four, perháps *m* is the least líquid, excépt at the end of a word fóllo wed by a vówel or a díphthong, when the vówel befóre the *m* is in most ínstances elided by the figure Ecthlípsis.

⁵ The létters *j, x, and z*, are térméd dóuble, becaúse the sound of *j* is équivalent to that of *dj*; and the sound of *x*, to that of *cs*, or *gs*, or *ks*; and the sound of *z*, to that of *ds*, or of *ts*. But it may be obsérved that *j* is not a dóuble létter áfter the vówel *i*, as in bí'júgis, *two-yóked*, nor when it begíns the látter part of a cómpound word, the fórrer part béíng in itsélf a péréfect word, as júrejúran'dō, *by sweáring an oath*.

⁶ The mutes then are *b, c, d, f, g, k, p, q, s, t, and v*; whereóf *b, c, d, g, k, p, q, and t* are péréfect, that is, tóttally dumb in themsélves, and occasíoning, whenéver they end a síllable, an ínstant stop to the pássage of the voice:—but *f, s, and v*, are impéréfect; becaúse, althóugh they are dumb in themsélves, yet áfter a vówel, they efféct not a cómpléte stóp-page of the voice líke the péréfect mutes. Of these three the létter *s* appróaches by far the néarest to the chárácter of a líquid, for it can not ónly stand befóre a mute and líquid, as in strix, a *groove or chánnel*, álso, a *screech-owl*: but it can fóllo w a líquid and mute in the same síllable, as in stírps, a *stem*.

⁷ In évery síllable there must be at least one vówel; but the préséncé

A diphthong is the sound of two vowels in one syllable.

Of proper diphthongs there are five, *au, eu, ei, ae, oe*.⁸

The two last of these diphthongs, namely *ae* and *oe*, are commonly pronounced as the vowel *e*, and are very often joined and written thus : *Æ æ, Œ œ*.

THE PARTS OF SPEECH are Eight :

1. Noun, Pronoun, Verb, Participle ; declined.

of a consonant is not necessary : for sometimes we meet with a word of several syllables in which there is not a consonant ; as *Ætæ'ā*, an *island on the coast of Italy*. But although the presence of a consonant be not absolutely necessary in a syllable, yet there are many syllables that both begin and end with a consonant. Some syllables, indeed, begin with two, or even three consonants, and some final syllables terminate with the like number. Thus, in the monosyllabic word "scöbs," *filings or sawdust*, a syllable both begins and ends with two consonants ; and in "scröbs," *a ditch*, a syllable begins with three consonants, and ends with two ; so, in "stürps," *a stem*, a syllable begins with two consonants, and ends with three.—A syllable long by authority or use is distinguished by a straight line over the vowel, as in *flos*, a *flower*, or in *ürbs*, a *city* : a short syllable is, in like manner, distinguished by a curve line over the vowel, as in *ös*, a *bone* : and a common or doubtful syllable is distinguished by both of these marks, as *fāc*, *do*. The length of a long syllable depends either upon the established length of the vowel in it, else upon the check given to the voice by the concurrence of consonants : and sometimes the length is owing to both these causes.

In the division of syllables the following directions are to be observed :—

I. A consonant between two vowels in the same word is joined to the latter vowel ; as *bö'nüs*, *ä'mö* ; except the accent falls on the last syllable but two (antepenult), then this syllable takes the following consonant, as *tün'ī-cä*, a *tunic* ; *öp'ī-fēx*, a *workman* ; and the double letter *x*, which may more properly be considered to belong to the vowel before it ; as in *fēx'ī-lis*, *flexile* : except, likewise, any particular consonant terminating the first part of a compound word ; as *b* in *äb'äst*, *it is distant*, or *n* in *in'ö-dö-rüs*, *insidious*.

II. Two consonants between two vowels, in the same word, are to be separated, as in *pēc'těn*, a *comb*, *diph-thön'güs*, a *diphthong*, *in-tēr'prēs*, an *interpreter* ; unless the consonants can begin a syllable : in which event they are to be joined to the vowel which follows them, provided only that the quantity of the vowel before the two consonants be not lengthened by position, that is, be not made long owing to the sequence of those consonants. Thus in such words as *cý'cnüs*, a *swan*, the proper division is *cý'-cnüs* ; but if the first vowel be lengthened by position, then the right division becomes *cýe'nüs*. This exception, however, applies not to compound words, even where a short vowel is lengthened by position ; as in *rē'spü-ö*, *I spit out again*.

⁸ The improper diphthongs are *ai, oi, ui*, and *yi*, whereof the first two seldom occur in words purely Latin ; and *ui* is chiefly confined to the two datives *huic* and *cui*.

2. Ad'verb, Conjúction, Prepositíon, Interjéction; úndelined.⁹

Nouns are of two kinds—súbstantives and ádjectives.

A noun súbstantive decláres its own meáning, and requíres not ány óther word to be joíned with it to show its significátion; as *hǒmǒ*, *a man*; *ān'gělūs*, *an ángel*; *l'běr*, *the book*; *cēstān'tiā*, *cóncstancy*.¹⁰

A noun ádjective¹¹ requíres to be joíned with a súbstantive, éither expresse'd or understóod; of which it shows the náture or quálity: as, *bǒnūs pǔ'ěr*, *a good boy*; *mǎ'lūs pǔ'ěr*, *a bad or a náughtly boy*; *mūl'tī* (*understánd hǒmīnēs*) *mány men*; *mūl'tā* (*understánd nēgō'tiā*) *mány things*.

OF A NOUN.

A NOUN is the name of whatsoéver Thing, or Béing, we see, or discoúrse of.

OF THE NUMBERS OF NOUNS.

NOUNS have two númer; námel; the síngular and the plúral.

The síngular speaks ónly of one; as *pǎ'těr*, *a fáther*.

The plúral speaks of more than one; as *pǎ'trēs*, *fáthers*.

⁹ To these parts of speech may be ádded Inséparable Párticles, as the prepósitives *ām-*, *dī-*, *dīs-*, *rč-*, *sē-*, *vč-*, and the adjúctives *-mčt-*, *-lč-*, *-čč-*, *-plč-*, *-cīnč-*, with some óthers of the same sort: álso, the enclítics *-nč-*, *-quč-*, *-vč-*, which howéver are clássed with conjúctions:—líkwise pronóminal terminátions, altogethéer dífferent from adjúctive párticles; síuch as, *-dčm*, *-dčm*. *-qučm*, *-quč*, *-nčm*, *-pčm*, *-cūn'quč*, and mány more.

¹⁰ A noun súbstantive is éitē *r* *cómmón* or *próper*:—*cómmón*, when the name or appellátion belóngs équally to all things of the same idéntical símilítude or sort; as *ā'quā*, *wáter*; *dǒ'mūs*, *a hóuse*; *ā'pīs*, *a bee*; *paūpēr-tās*, *póverty*;—*próper*, when the appellátion is confíned to one índivídual, notwithstánding there may ámong mány be séveral índivíduals of the same appellátion; as *Pčtrūs*, *Péter*; *Britān'nūā*, *Britáin*; *Tā'mēsīs*, *the Thames*; *Lōndī'nūm*, *Lóndon*.

¹¹ Ad'jectives, líkwise, are éitē *cómmón* or *próper*:—*cómmón*, when they reláté to things in génerál; as, *ā'l'būs*, *whíte*; *trīs'tīs*, *sád*; *fč'līx*, *háppy*;—*próper*, when they owe their derivátion to some próper name; as *Plūtō'nūs*, *Plútónian*, that is, *of or belónging to Plúto*; *Sīcūlūs*, *Sīlian*, *or belónging to Síciły*; *Trōjā'nūs*, *Trájan*; *Āthēnīen'sīs*, *Āthénian*.

OF THE CASES OF NOUNS.

NOUNS have six *cáses*¹² in each *númer* :

The *nóminative*, the *génitive*, the *dátive*, the *accúsative*, the *vócative*, and the *áblative*.

The *nóminative* case comes before the verb, and may be known by its answering to the *quéstion* *who?* or *what?* as, *who teaches?* *măgīs'těr dōcēt*, *the máster teaches*.

The *génitive* case¹³ is known by the sign *of*, in En'glish, and answers to the *quéstion* *whose?* or *whereóf?* as, *whose learning?* *dōctri'nă măgīs'tri*, *the learning of the máster*, or *the máster's learning*.

The *dátive* case is known, in En'glish, by the signs *to* or *for*, and answers to the *quéstion* *únto whom?* or *to* or *for what?* as, *únto whom do I give the book?* *dō lí'brŭm măgīs'trō*, *I give the book to the máster*.

The *accúsative* (or, as it is more *cómmonly* denóminated in En'glish, the *objéctive*) case fóllovs the verb, and answers to the *quéstion* *whom?* or *what?* as, *whom do you love?* *ă'mō măgīs'trŭm*, *I love the máster*.

The *vócative* case is known by *cálling*, or *speáking to* ; as, *ō măgīs'těr*, *O máster*.

¹² The Stóics considered the *relátion* which, in *discóurse*, a noun hath to a verb, in the same *mémber* of a *séntence* with it, *únder* the *figure* of a *right line* *fálling* *upón* a *plane*. If the *line* (as they thought) fell *perpéndicúlarly*, the *noun* was said to be "*in récto cásu*," that is, in its *right* or *straight case* ; by which they meant the *nóminative* :—but if the *line* *swérr*ed or *declíned* from the *perpéndicúlar*, then the *noun* was said to be "*in oblíquo cásu*," that is, in a *crook*ed or an *oblíque* case ; and its *deviátion* from the *perpéndicúlar*, or, *right fall*, was *térmed* "*declínátio*," that is, *declénsion*. Now it is *évident*, that the *right case* could be *óuly one*, while the *oblíque cáses* might be *few* or *mány* *accórding* to the *degré* of *declínátion*, or *declénsion*. *Howéver* *inapprópriate* these *terms* may *appeár*, *grammárians* have, *véry good-náturedly*, *conténted* *themsélves* to *retáin* them.

¹³ The *génitive*, as its name *indeéd* *implíes*, is the case from which all the *óther* *oblíque cáses* (with the *excéption* of the *vócative* *síngular*, which seems to be *mérely* a sort of *écho* of the *nóminative*, *díffering* from it in *nóthing* for the *most part*, and *séldom* *díffering* from it *much* ; and with the *excéption* *álsó* of the *accúsative* of *neúter nouns*, and some *few* *anómálovs* *ínstánces* not worth *méntioning* *at* *présent*) are *génerated* or *fórm*ed by *simply* *várying* the *terminátion*. It may be *right* to *nótic*e that the *nóminative* case *plúral* of *nouns* is in this *sense* to be *considered* as an *oblíque case*, *ínásmuch* as it *owes* its *formátion* (a *few* *anómálies* *excépted*) to the *génitive* case *síngular*.

The áblative case is known in En'glish by prepositions expressed or understood, sérving to the áblative case; as, *dē mägīs'trō, of or concerning thē máster; cō'rām mägīs'trō, before or in the présence of the máster.*

Al'so, the prepositions *in, with, from, by;* and the word *than,* áfter the compárative degré, are signs of the áblative case.

GENDERS AND ARTICLES.

GENDERS of nouns are three; námelý, the másculine, the féminine, and the neúter.

ARTICLES¹⁴ are úsed in Grámmar, to denóte the génder of nouns; and are thus declíned:—

SINGULAR.

	<i>Másculine.</i>	<i>Féminine.</i>	<i>Neúter.</i>
<i>Nóminative</i>	Hiċ	hæc	hōc
<i>Génitive</i>	Hū'jūs, of all génders		
<i>Dátive</i>	Huċ, of all génders		
<i>Accúsative</i>	Hiċ	hæc	hōc
<i>Vócativē</i>	—	—	—
<i>Ab'lative</i>	Hoċ	hæc	hōc

PLURAL.

	<i>Másculine.</i>	<i>Féminine.</i>	<i>Neúter.</i>
<i>Nóminative</i>	Hi	hæ	hæc
<i>Génitive</i>	Ho'rūm	hæ'rūm	ho'rūm
<i>Dátive</i>	Hiis, of all génders		
<i>Accúsative</i>	Hoſ	hæs	hæc
<i>Vócativē</i>	—	—	—
<i>Ab'lative</i>	Hiis, of all génders.		

¹⁴ Though the Greeks employed articles in their language, yet in the Látin tongue (strictly speaking) articles were néver úsed. The demonstrative pronoun *hiċ, hæc, hōc,* by mány improperly called an article, was sómetimes employed, as it still is, to distinguish the génders of nouns. *Hiċ,* then, is the sign of the másculine génder; *hæc* of the féminine; and *hōc,* of the neúter: so, *hiċ et hæc* will signify the cómmon of two génders, that is, both the másculine and féminine génders únder one termination; *hiċ, hæc, hōc,* the cómmon of three génders, as *fē'lix, háppy;* so likewise, *hiċ aut hæc,* the dóubtfuí génder, that is, a génder várying betwixt másculine and féminine, as *pám'pī-nās, a vine-leaf,* indifferently féminine or másculine: again, *hiċ aut hōc* will signify the dóubtfully másculine or neúter génder, as *vū'lgūs, the rábble;* and lástly, *hæc aut hōc,* the dóubtfully féminine and neúter.

NOUNS declined with the two árticles *hĕc* and *hĕc* are called cmmon, that is, are of the msculine and fminine gnder : as, *hĕc ět hĕc prĕns*, a *prent, fther* or *mther*.

Nouns are called doubtful, when declined with the árticle *hĕc* or *hĕc* : as, *hĕc aĭt hĕc ān'guĭs*, a *snake*.

Some nouns are also called epicene ; that is, when under one árticle both sxes are signified ; as *hĕc ps'sĕr*, a *sprrrow* ; *hĕc āquĭl*, an *eagle* : both male and female.

DECLENSION OF NOUNS SUBSTANTIVE.

There are five declensions of substantives, distinguished by the ending of the genitive case.

The first declension ¹⁵ makes the genitive and dative cases singular to end in *ae* diphthong, (-*ĕ*) ; as,

SINGULAR.			
N.	<i>hĕc</i>	Mĭ'-s,	<i>a song,</i>
G.	<i>hĭjus</i>	Mĭ'-s,	<i>of a song,</i>
D.	<i>hĭc</i>	Mĭ'-s,	<i>to a song,</i>
A.	<i>hanc</i>	Mĭ'-sm,	<i>a song,</i>
V.	<i>O</i>	Mĭ'-s,	<i>O song,</i>
A.	<i>ab hĕc</i>	Mĭ'-s,	<i>from a song.</i>

¹⁵ This declension has four terminations, -**, -*ĕ*, -*s*, and -*ĕs*, whereof the first only is purely Latin ; the remaining three, Greek. Of nouns ending in -**, likewise, many are of Greek origin. Latin nouns in -** of the first declension are for the most part feminine : but some are masculine ; others are common ; and others, doubtful : one, *ps'-ch*, the *feast of the passover*, is said to be neuter. Nouns in -*ĕ* of this declension are without exception feminine ; and nouns in -*s*, and in -*ĕs*, masculine.

¹⁶ The genitive case of the first declension in Latin anciently ended in -*i*, and sometimes in -*s* ; thus of the nominative *vĭt*, *life*, was formed the genitive *vĭti*, *of life* : and in like manner the genitive of *aĭr*, a *breeze or gale*, was either *aĭri* or *aĭrs*, *of a breeze or a gale*. Whenever the vowel *i*, or the liquid *r*, preceded the terminational -**, of the nominative, then the genitive ended in -*s* preferably to -*i* ; as, nominative *fĭlĭ*, a *daughter*, genitive *fĭlĭs*, rather than *fĭlĭi*, *of a daughter* ; but afterwards, *fĭlĭ*, preferably to the other two. The noun *fmĭlĭ*, however, generally retains -*s* in the genitive case, when joined to *ptĕr*, a *father*, or to *mtĕr*, a *mother* ; as *ptĕr fmĭlĭs*, the *father of the family or master of the house* ; *ptĕr fmĭlĭs*, *of the father of the family or master of the house*.

Most nouns in -*ĕ*, -*s*, and -*ĕs* of the first declension are proper names, and consequently seldom, or never, admit of the plural number ; but some few are common nouns :—as, for example, *o'dĕ*, an *ode*, or a *lyric*

song; ěpřítomě, an *abridgement*; tíarās, a *turban*, or *sash for the head*; zíphiās, a *sword-fish*; pýrītēs, a *fire-stone*; áchá'tēs, an *ágate*: these, however, when plúral, differ in no respect, as to their terminations, from the fórmula of nouns páurely Látin.

In the singular númer, nouns in *-ē*, *-ās*, and *-ēs* are declined in the manner following:—

	Mū'sicē, <i>músic</i> ,	Bō'rēās, <i>the north-wind</i> ,	Triōr'chēs, <i>a búzzard</i> .
N.	mū'si-cē	N. bō'rē-ās	N. triōr'-chēs

A.	mū'si-cē	A. bō'rē-ā	A. triōr'-chē <i>věl</i> -chā.

Mány Greek names in *-ē* of the first declension, have also the Látin termination *-ā*, and are inflected accordingly both ways: as Hě'lēnē *věl* Hě'lēnā, *Hélen*; Pēně'lōpē *věl* Pēně'lōpā, *Penélopē*: these make *-ēs* or *-āē* in the genitive, *-ē* or *-āē* in the dative, *-ēn* *věl* *-ām* in the accusative, and so forth.

All proper names in *-ās* of this declension, as Ānē'ās, Lŷ'cidās, Āmŷn'tās, are declined like bō'rēās: but some common nouns in *-ās* and *ēs* have also the termination *-ā*, and are declined like mū'sā. To the termination *-ēs* belong all patronymic nouns in *-dēs*, as Pēlī'dēs, *son of Péleus*, Āē'cidēs, *descendant of Āacus*; but these are sometimes found, likewise, of the third declension: also to the first declension belong several nouns, proper as well as common, in *-stēs* and in *-tēs*: these have generally *-ā* in the vocative, as Thŷēs'tēs, *vocative ō Thŷēs'tā*; Thěrsītēs, *vocative ō Thěrsītā*. Greek names in *-ā*, except such as have *-ē* also, often form the accusative in *-ān* rather than in *-ām*: as Iphīgēnĭā, *accusative Iphīgēnĭān*, rather than Iphīgēnĭām; Āēgĭnā, *accusative Āēgĭnān*, rather than Āēgĭnām.

¹⁷ The termination *-ā'rūm* of the genitive case plúral of the first declension, as well as that of *ō'rūm* of the second, is not unfrequently contracted into *-ām*, by syncopē and crásis; thus we read tērrĭgēnūm, for tērrĭgēnā'rūm.

¹⁸ The following nouns have *-ā'lūs* rather than *-īs*, in the dative and ablative plúral, to distinguish them, in those cases, from their masculines of the second declension:—

ā'nimā, <i>the soul</i>	ě'quā, <i>a mare</i>	mū'lā, <i>a she-mule</i>
ā'sinā, <i>a she-ass</i>	fā'mulā, <i>a maid-servant</i>	nā'tā, <i>a daughter</i>
dě'ā, <i>a goddess</i>	fĭ'lĭā, <i>a daughter</i>	sĕr'vā, <i>a female slave</i>
dō'mĭnā, <i>a lady</i>	lĭbĕr'tā, <i>a freed-woman</i>	sō'cĭā, <i>a she-companion</i>

The second declension¹⁹ makes the genitive case singular to end in *-ěr*; as,

¹⁹ The second declension has seven (or more properly speaking, ten) terminations: viz. *-ĕr, -ĕr, -ĭr, -ŭr, -ŭs, -ŭs, -ŭm, -ōs, -ōs, -ōn*. Of these the last three, namely, *-ōs, -ōs, -ōn*, are Greek; as is likewise *-ŭs*: and of the second (*-ĕr*) and third (*-ĭr*) few examples occur beyond *Ībĕr, a Spániard, or nátive of Ibĕria*; *vĭr, a man or hŭsband*; with their compounds, *Cĕltĭbĕr, a Celtĭberian*; *dŭm'vĭr, one of the dúm'virate*; *trĭm'vĭr, one of the trĭm'virate*, and the plural noun *dĕcĕm'vĭrĭ, the ten*, that is, *the ten men in authórity, or cónsular mágistrates*: in *-ŭr* there is only the masculine gender of the adjective *să'tŭr, să'tŭră, să'tŭrŭm, full*, formed by apócopĕ from *să'tŭrŭs*. The Latin terminations, therefore, more frequently met with, are these three, *-ĕr, -ŭs, and -ŭm*. Nouns ending in *-ĕr*, with very few exceptions, drop the *ĕ* in the genitive case singular, and in all cases derived from it: the exceptions to this, are *gĕnĕr, a son-in-law*; *sŏ'cĕr, a fáther-in-law*; *pŭ'ĕr, a boy*; *prĕs'bĭtĕr, an ělder*; *ăr'mĭĕr, an armour-bearer*; *ădŭl'tĕr, an adŭlterer*; *fŭr'cĭfĕr, a knave*, and the plural noun *lĭ'bĕrĭ, children*: with the three proper names, *Lĭ'bĕr, Băcchus*; *Mŭl'cĭbĕr, Vŭlcan*, and *Lŭ'cĭfĕr, the mŏrning-star*. Several adjectives in *-ĕr*, however, retain the *ĕ*, as *tĕ'nĕr, tĕnder*, *lĭ'bĕr, free*: but others reject it, as *nĭ'ĕr, black*, *pŭl'chĕr, fair*. The gentile noun *Ībĕr*, and its compound *Cĕltĭbĕr*, retain the long *ĕ*, and make *Ībĕ'rĭ* and *Cĕltĭbĕ'rĭ*, in the genitive case. Many Greek names ending in *-ĕs*, and which rightly belong to the third declension, are sometimes transferred to the second with a resolution of the terminational diphthong into *-ĕs*: for example, *Mŏr'pheŭs* (genitive, *Mŏr'phĕŏs*), of the third declension, often becomes *Mŏr'phĕŭs* (genitive, *Mŏr'phĕĭ*, and by contraction, *Mŏr'phĕĭ vĕl Mŏr'phĭ*), making in the accusative, *Mŏr'phĕŭm* or *Mŏr'phĕŏn*.

²⁰ The termination *-ōrŭm* of the genitive case plural of this declension

Observation 1st. The *nóminative* and *vócative* cases of nouns are for the most part alike in both *númers*. But when the *nóminative* case *singular* of the *second declension* ends in *-ūs*, the *vócative* ends in *-ě* : as,

V.	<i>O</i>	Děmī-nī,	<i>O lords,</i>
A.	<i>ab his</i>	Děmī-nīs,	<i>by lords.</i>

Observation 2nd. Děš, *God*, makes “O Děš” in the *vócative* case *singular* :²² also, the *proper* name of a man ending in *-iūs* makes *-ī* ; as, Gěōr’gīūs, *George* ; *vócative*, Gěōr’gī. In like *manner*, fīlīūs, *a son*, makes fīlī ; and gěniūs, *a genius*, gěnī.²³

is often contracted into *-ūm* by *syncopē* and *crásis* :—thus, for *vīrōrūm* we frequently find *vīrūm* ; and for *divōrūm*, *dívūm*.

²¹ The *poets* occasionally, and the *prose* writers more rarely, retain *-ūs* in the *vócative* case, after the *Attic* manner : as *flū’vīūs*, *O stream* ; *př’pūlūs*, *O people* ; *ag’nūs*, *O lamb*.

²² In the *plural* number, *děš* is thus declined :—

N.	dě’ī,	but, more commonly, dī’ī, and by crásis,	dě <i>gods,</i>
G.	děōrūm,	or by syncopē and crásis,	dě’ūm <i>of gods,</i>
D.	dě’īs,	but, more commonly, dī’īs, and by crásis,	dis <i>to gods,</i>
A.	dě’ōs,		<i>gods,</i>
V.	dě’ī	but, more commonly, dī’ī, and by crásis,	dī <i>O gods,</i>
A.	dě’īs,	but, more commonly, dī’īs, and by crásis,	dis <i>from gods.</i>

²³ Although *fīlīūs*, *a son*, has rightly *fīlī* in the *vócative* case, and *gěniūs* has rightly *gěnī*, yet the *vócative* of both the one and the other is sometimes like the *nóminative*. Other nouns in *-iūs*, whether they be *substantives* or *adjectives*, not even excepting the *adjectives* derived from *proper* names, change *-ūs* into *-ě* in the *vócative* ; as, *cūbīcūlā’rīūs*, *a chamberlain*, *vócative* *cūbīcūlā’rīě* ; *př’ūs*, *godly*, *vócative* *př’ě* ;

Observation 3rd. Nouns of the neuter gender are generally of the second or third declension; and make the nominative, the accusative, and the vocative cases alike, in both numbers:—and in the plural number these cases end all in *-ǎ*: as,

Nouns in *-ŭs*, *-ŭs*, *-ŭs*, and *-ŭn*, of the second declension, are inflected, in the singular number, as follows:—

Āndrō'gĕōs, *Androgeus*; Pǎ'phōs, *a city of Cyprus*, Pān'thŭs, *Pantheus*.
I'lĭōn, *Troy*.

N.	Āndrō'gĕōs	Pǎ'phōs	Pān'thŭs	I'lĭōn

A.	Āndrō'gĕō	Pǎ'phō	Pān'thō	I'lĭō

It should be noticed that several names in *-ŭs* have likewise the termination *-ŭs*; and consequently make the accusative in *-ŭm*, as well as *-ŭn*. Many names in *-ŭn*, have the termination *-ŭm*; and this they of course retain in the accusative and vocative singular. The noun I'lĭōn has, besides the termination *-ŭm*, that of *-ŭs*, and is then feminine. Some few nouns, as, *hār'bītōn*, *a harp*, neuter, have also the termination *-ŭs*, masculine or feminine; and *-ŭs*, masculine.

In the plural number, Greek nouns of the second declension are declined after the manner of Latin nouns; those in *-ŭs* and *-ŭs*, like nouns in *-ŭs*; and those in *-ŭn*, like nouns in *-ŭm*: except that they have *-ŭn*, rather than *-ŭrŭm*, in the genitive plural: thus, *bŭcō'lĭcōn*, *a pastoral song*, has (genitive plural) *bŭcō'lĭcōn*, rather than *bŭcō'lĭcō'rŭm*,

The third declension²⁴ makes the génitive case singular to end in *-īs* : as,

G.	<i>hūjus</i>	Nū'-bīs,	of a cloud,
D.	<i>huic</i>	Nū'-bī,	to a cloud,

of *pástorál songs*. A few Greek names of men in *-ēs* of the third declension, which have likewise *-eūs* in the nóminative, take sometimes the form of the Sécond Declension, like nouns of the third which have *-eūs* ónly : thus, *Āchil'lēš*, *vèl* *Āchil'leūs*, *Achillēs*, becómes *Āchil'lēūs*, génitive *Āchil'lēi* *vèl* *Āchil'leī*, and, by crásis, *Āchil'li* : the adjective is *Āchillē'ūs*, *Āchillē'ā*, *Āchillē'um*. In like mánnér, *Ūl'ys'sēs*, *vèl* *Ūl'ys'seūs*, or (as it is sometimes written), *Ūl'ix'ēs* *vèl* *Ūl'ix'eūs*, *Ulyssēs*, becómes *Ūl'ys'sēūs* *vèl* *Ūl'ix'ēūs* *vèl* *Ūl'ix'ūs*, génitive *Ūl'ys'sēi* *vèl* *Ūl'ix'ēi* *vèl* *Ūl'ix'ī*.

Greek names of this declension in *-ūs* and *-pūs* have *-ī* in the génitive, and (more rárely) *-ū* ; but they are for the most part álso of the third declension, the former termination becóming *-eūs*, with *-ēōš* in the génitive ; thus *Pān'thūs* becómes *Pān'theūs*, *Pān'thēōš* : and the latter, máking the génitive in *-pōdīs*, as *Pōl'ypūs*, *Oē'dīpūs*, *Mēlām'pūs*, génitive *Pōl'ypōdīs*, *Oē'dīpōdīs*, *Mēlām'pōdīs*. These, when of the sécond declension, have sometimes *-ūs* in the nóminative, as though cóming from the Dóric díálect.

²⁴ of nouns súbstautive, considerably more than one half will be found to be of the third declension ; for its final síllables amóunt to úpwards of nínty ; and its final létters to thirteén : námelý, *a, e, i, o, y, c, d, l, n, r, s, t, x*. Of these, *a, e, n, r, o,* and *s,* are cómmon to the third, and some of the óther declensions :—that is, *a* and *e* are cómmon to it with the first ; *n* and *r,* with the sécond ; *o,* with the fourth ; and *s* with all the óther four. The séven final létters, then, *c, d, i, l, t, y,* and *x,* are pecúliar to this declension. All nouns of the third declension énding in *ā* are of Greek órigin and of the neúter génder ; the *ā,* álso, is inváriably preceded by the létter *m* ; as in *stēm'mā,* *stēm'mātīs,* a *stem* or *pédigrec*. Nouns in *-ē,* and in *-ī,* are neúter ; the latter, indeclínable in both núbmers : plúralš in *-ē,* as *cē'tē,* *whales,* are likewise neúter, and indeclínable. Of nouns in *e* there are ónly two, *lāc,* *milk,* and *ā'lēc,* or *hā'lēc,* an *ánchovy,* álso a *pickle,* or, as some say, a *herring*. The nouns in *d* consist sólely of a few próper names of men, as *Dā'víd*. Some óther Hébrew names of várious éndings, such as *Jōb,* *Rā'phāēl,* *Sā'ul,* *Bē'thlēm,* *Sēth,* *Ām'rām,* belong to this declension, but cánnót be próperly clássed with Látin words. The more cópious final létters of nouns párely Látin are *o, n, r, s,* and *x* : the more cópious final síllables are *īō, -dō, -gō, -ēn,* [nouns in *-ēn* are Greek,] *-ēr,* [nouns in *-ēr* are of Greek extráction,] *-ōr, -ās* [all nouns in *-ās* are Greek, and so are mány in *-ās,*] *-ēs* and *-ēs,* [nouns in *-ēs,* máking *-ē'tīs* in the génitive case, (excépt *qu'ēs,* *rest,* and its compóund *rē'qu'ēs,*) are Greek, and of the másculine génder ; nouns in *-ēs,* not incréásing, are likewise Greek, but of the

neúter génder,] -īs, and -īs ; -ōs and -ōs ; -ūs and ūs ; -ns, -ps, -rs, ěx, and ĭx.

²⁵ A few Látin nouns in -īs have -īm in the accúsative case ; such as, sí'tís, *thirst* ; tūs'sís, *a cough* ; rá'vís, *hoárseness* ; cú'cūmís, *a cucumber* . bŭ'rís, *the beam of a plough* ; ōmŭs'sís, *a máson's rule* ; měphī'tís, *foul air* : to which may be ádded, vís, *strength* or *force* :—líkewise all próper names of pláces, and of rívers, énding in -īs ; but these sómetimes have -īn ráther than -īm in the accúsative case. And all Greek cómmon nouns in -īs, fórmng the géntive in -ōs pure, that is, in -ōs précéded by a vówel, make the accúsative in -īm or -īn ; as hē'résís, géntive hē'rē'sēōs, *héresy*, accúsative hē'rēsīm vèl hē'rēsīn. In líke mánnér Greek nouns in -ŷs, whereóf the géntive énds in -ōs pure, have -ŷm or -ŷn, in the accúsative case. To those ádd all másculine Greek names in -īs, máking -dīs or -dūs in the géntive ; for these have more fréquently -īm or -īn (thóugh sómetimes -děm, but néver -dā) in the accúsative : thus, Pá'ris, géntive Pá'rídīs vèl Pá'rídōs, accúsative Pá'rīm vèl Pá'rīn, ráther than Pá'rīděm ; but in no ínstánce Pá'rídā.

Mány Látin nouns éndng in -īs have éíther -ēm, or ím, in the accúsative case : such are, pē'vís, *a básin* , clá'vís, *a key* ; ná'vís, *a ship* ; pŭp'pís, *the stern* or *poop* ; rēs'tís, *a cord* or *rope* ; tŭr'rís, *a tówer* ; sēcŭ'rís, *an axe* ; strī'gílís, *a cúrry-comb* ; āquá'lís, *a wáter-éwer* ; cŭ'tís, *the skin* ; fé'brís, *a féver* ; aŭ'rís, *the ear* ; sēmēn'tís, *seed-time* ; and a féw óthers : to whích may be ádded one noun in -ns, námelý, lēns, *a léntil*.

²⁶ Nouns whích have the accúsative in -īm or -īn have -ī (Greek nouns -i) in the áblative : as, vís, *strength* or *force*, áblative vī, *with strength* or *force* : and those whích have -ēm or -īm in the accúsative, have -ě or -ī in the áblative ; thus, ná'vís, *a ship*, accúsative ná'vēm vèl ná'vīm, áblative ná'vě vèl ná'vī :—but rēs'tís and cŭ'tís have -ě ónly ; strī'gílís and sēcŭ'rís, óftener -ī than -ě. Cānā'lís, *a chānnel*, vēc'tís, *a léver*, and bīpē'n'nís, *a hálbért* or *pole-axe*, make the áblative génerally in -ī : the fóllowing nouns have -ě or -ī índifferently ; víz. ām'nís, *a ríver* ; ān'guís, *a snake* ; ā'vís, *a bīrd* ; cí'vís, *a cítizen* ; clās'sís, *a fleet* ; fī'nís ; *an end* ; fŭs'tís, *a rope* ; íg'nís, *fire* ; pōs'tís, *a door-post* ; and ūn'guís, *a náil of the hand* or *foot* : to whích may be ádded, ím'běr, *a shówer* ; ōc'cīpŭt, *the hínder part of the head* ; rŭs, *the cóuntry* ; sŭpē'l'lēx, *hóusehold fŭrniture* ; sōrs, *chānce*, with a féw óthers : álso, the names of some cíties, as Cārthā'gō, *Cárlhage*, áblative Cārthā'gīnē vèl Cārthā'gīnī. The names of months, thóugh they have -ēm in the accúsative, make the áblative álwáys in -ī. Neúters, too, in -āl, -ār, and -ār (see note 30, below) have, with véry féw excéptions, -ī in the áblative : of séveral nouns, álso, of thís declénsion, the dátive case is not unfréquently (by póetic lícēnce) úsrped for the áblative. Lástly, all nouns éndng in -ě in the nóminative case (the names of tówns excépted) have -ī in the áblative : as, mǎ'rě *the sca*, áblative mǎ'rī ; rě'tě, *a net*, áblative rě'tī.

V.	<i>O</i>	Lǎ'-pīs,	<i>O stone,</i>
A.	<i>ab hóc</i>	Lǎ'-pīdē,	<i>from a stone.</i>

²⁷ Nouns in *-ēs* and in *-īs* not increásing in the génitive case singular, and nouns énding in *s* if a cónsonant immédiately précédes the *s*, or in *x* with the same restriction, álsó móuosyllables in *-ās*, and nouns in *-īs*, have génerally *-īūm* in the génitive plúral : to which add *cǎ'rō*, *flesh* ; *cōr*, *the heart* ; *cōs*, *a whétstone* ; *dōs*, *a dówery* ; *faūx*, *the gorge or éntrance of the gúttet* ; *lār*, *a dwélling or fire-side* ; *bēs*, *eight óunces* ; *lín'tēr*, *a bark* ; *mūs*, *a mouse* ; *nīx*, *snow* ; *nōx*, *night* ; *ōs*, *a bone* ; *ū'tēr*, *a bóttle or bládder* ; *vēn'tēr*, *the béllý*, and most nouns which have *-ī*, or *-i*, in the áblative case singular : excépt *ōc'cīpūt*. But of nouns in *-ēs* and *-īs* the fóllowing are to be excépted, as háving *-ūm* : *vǎ'tēs*, *a próphet or bard* ; *jū'vénis*, *a young pērson* ; *pǎ'nīs*, *bread or a loaf* ; *rū'dīs*, *a foil* ; *vō'lūcrīs*, *a bird* ; *cǎ'nīs*, *a dog or bitch* : álsó, *ǎ'pīs*, *a bee*, and the plúral noun *ō'pēs*, *wealth*. And of nouns énding in *s* précéded by a cónsonant, must be excépted all nouns énding in *-ēbs*, *-ēps*, and *-ōps* : álsó *hý'ēms*, *winter* ; and all words of Greek órigin ; as *grýps*, *a gríffin* ; *ǎ'rǎbs*, *an Arabían*. Here, too, it may be nóted that *-īūm*, of the génitive case plúral, of this declénsion, is fréqúently contrácted into *-ūm* by the figure *crásis* ; as, *īnfán'tūm*, *of ínfants*, for *īnfán'tīūm*.

²⁸ When the génitive plúral ends in *-īūm*, the accúsative óptionally ends in *-ēis* (and by contráction in *-īs*) ínstead of *-ēs* : thus we find *pǎr'tēis*, and *pǎr'tīs*, for *pǎr'tēs* ; and *ōm'neis* or *ōm'nīs* for *ōm'nēs*.

²⁹ Greek nouns of this declénsion, increásing in the génitive case, are mány, and of várious terminátions. Of these, we shall only nóte the chief ; díviding them ínto nouns cómmon, and nouns próper. Greek cómmon nouns, more fréqúently occúrring, and in *-ēn*, *-īn*, *-ēr*, *-ās*, *-ās*, *-ēs*, *-īs*, *-mǎ*, *-ōs*, and *-ýs* : as, for exámple, *rēn*, *rē'nōs*, *a kídney* ; *dēl'phīn*, *dēl'phī'nōs*, *a dólphin* ; *crǎ'tēr*, *crǎ'tēr'ōs*, *a bowl or góbbet* ; *lám'pās*, *lám'pádōs*, *a lamp* ; *ǎ'dámās*, *ǎ'dámán'tōs*, *a díámond* ; *lē'bēs*, *lēbēt'ōs*, *a cauldron* ; *īās'pīs*, *īās'pīdōs*, *a jásper* ; *bǎ'sīs*, *bǎ'sēōs*, *a base* ; *pōē'mǎ*, *pōē'mātōs*, *a póem* ; *hēr'ōs*, *hēr'ō'ōs*, *a héro* ; *chlǎ'mýs*, *chlǎ'mýdōs*, *a*

These we shall decline in the order in which we have given them : and, as the Látins generally preferred *-is* to *-os* in the ending of the génitive case, we shall (with the perfect understanding that *-os* is the true original) adopt the termination *-is* in most instances.

Like *crātēr* are declined *ā'ēr*, *the air*, and *ā'thēr*, *the sky*, except that they increase short, making *ā'ērīs*, and *ā'thērīs*, in the genitive case, and want the plural number. Nouns in *-ōn*, as *ī'cōn*, *ī'cōnīs*, *an image*, are declined like *rēn* or *dēl'phīn*, but with short penult in the genitive case. Greek neuters in *-ār* differ in nothing in declension from Latin nouns of the same termination, except that the final *-i* of the dative is short: in the ablative case they have *-ē*.

Greek nouns which have *-dōs* or *-dīs* in the genitive, have frequently *-dēm* instead of *-dā* in the accusative singular, and *-dēs* instead of *-dās* in the accusative plural, as though they were purely Latin. Some other Greek nouns, but more rarely, take *-ēm* for *-ā* in the accusative singular, and *-ēs* for *-ās* in the plural. Any dative or ablative plural in *-sī* becomes *-sīn* before an initial vowel or diphthong.

Greek proper names of this declension end, for the most part, in *-īs*, *-ās*, *-ās*, *ēs*, *-eūs*, *-īs*, *-ōs*, or *-ān*. Of names in *-īs*, some are masculine, as *Pā'ris*, *Pā'ridōs*, *Pā'ris*; and some, again, are feminine, as, *Brisē'īs*, *Brisē'idōs*, *Brisē'īs*. These differ from one another in the accusative, the masculines making *-im* or *-in* or *-dēm*, but never *-dā*; and the feminines making *-dēm* or *-dā*, but never *-im* or *-in*.

Proper names in *-ōš* are declined like *hērōš*; and those in *-ys* like *chěl'ys*: names of several other terminations than those mentioned above, as *Cy'clōps*, *Cy'clōpis*, *a Cyclops*, *Cē'yx*, *Cē'y'cis*, *a king of Thrace*, *Āstý'anāx*, *Āstýanāc'tōš*, *one of the sons of Hector*, *Tīmōn*, *Tīmō'nīs*, *an Athenian misanthropist*, *Chā'rōn*, *Chārōn'tīs*, *the ferryman on the river Styx*, *Cās'tōr*, *Cās'tōrīs*, and *Pōl'lūx*, *Pōllū'cis*, *two sons of Lēda*, with many besides, may be referred to one or other of the examples given in this note. Of Greek names in *-ēs*, many are declined like *Āchil'lēš*, after the Latin fashion, entirely relinquishing their original form: as *Eūrī'pīdēs*, *Eūrī'pīdis*, *a tragic poet of Salamis*: with all names in *-crātēs*, *-gēnēs*, *-thēnēs*, and a few more: but names in *-clēs*, have either *-īs*, or *-ēōš* in the genitive. Some Greek names in *-ēs* of this declension make either *-īs* or *-ē'tīs* in the genitive case, as *Chrēmēs*, genitive *Chrēmīs vėl Chrēmētīs*:—and some names of the first declension, are likewise of the third, as *Ātrīdēs*, genitive *Ātrīdāē vėl Ātrīdīs*: some few, also, are of the third and second, as was remarked in notes 19 and 23, above. *Dīdō* is of the third and fourth declension, making *Dīdō'nīs vėl Dīdūs* in the genitive.

Although the names of persons and of places, for the most part want the plural number, yet when more than one of the same name are spoken of, the plural is used; as in the following example:—

épted : with such Greek neúters in -ǎr, as *hě'pǎr, the liver, něc'tǎr, the drink of gods* : to these add mónosyllables in -ǎr : as *fǎr, bread-corn, pǎr, a pair or couple ; lǎr, a dwelling or household god*. But the ádjec-tive *pǎr, équal*, has -ĭ ónly : and yet its cóm-pounds have -ě or -ĭ.

³¹ Neúters which have -ĭ in the áblative síngular, have -ĭǎ in the nóminative, accúsative, and vócative plúral, and -ĭǎm (as has been alréady nó-ticed) in the géntive.

³² By reférring to note 29, it will be perceíved in the declénsion of *pěř'mǎ, a póm, that the dá-tive and áblative cáses plúral end in -tĭs, (as though of the neúter noun *pěř'mǎtŭm, pěř'mǎtĭ,* of the sécond declénsion,) in préferéce to -tĭbŭs. All Greek nouns in -mǎ have this pré-diléctiön.*

³³ The word *bŏs, a cow or an ox,* makes *bŏ'ŭm* (which is évidently a contráctiön for *bŏ'vĭŭm*, as *pǎrěn'tŭm* is of *pǎrěn'tĭŭm*,) in the géntive plúral. The plúral noun *Cœ'lĭtēs, the inhábitants of héáven,* has *cœ'lĭtŭm* vĕl *cœ'lĭ'tŭŭm* : and in like mánnér, *ǎ'lēs, any large bird,* has *ǎ'lĭtŭm* vĕl *ǎ'l'tŭŭm*.

³⁴ *Bŏs, a cow or an ox,* has *bŏ'bŭs* (and sómetimes *bŭ'bŭs*) in piáce of *bŏ'vĭbŭs*, in the dá-tive and áblative cáses plúral. Ausónius gives *bŏ'bŭs* with the penúlt short, as if by síncopě of the míddle síllable of *bŏ'vĭbŭs*, insteád of síncopě of the *i*, and crásis of the *ov* or *ou*.

The fourth declension³⁵ makes the genitive case singular to end in *-ūs* ; as,

SINGULAR.

N.	<i>hic</i>	Gră'-dūs,	<i>a step,</i>
G.	<i>hujus</i>	Gră'-dūs,	<i>of a step,</i>

V.	<i>O</i>	Gră'-dūs,	<i>O step,</i>
A.	<i>ab hōc</i>	Gră'-dū,	<i>by a step.</i>

³⁵ The fourth declension has four terminations, namely, *-ūs*, *-ūs*, *-ō* and *-ū*, whereof the first and last are Latin ; but the middle two, Greek.

Nouns in *-ūs* of this declension are masculine ; nouns in *-ō* are feminine ; and those in *-ū*, neuter : and they are declined in the manner following :

Jēsūs or Īēsūs, *Jesus*, ē'chō, *an echo*, cōr'nū, *a horn*.

	<i>Singular.</i>		<i>Singular.</i>		<i>Singular.</i>		<i>Plural.</i>
N.	Jēsūs		ē'chō		cōr'nū		cōr'nūā

V.	Jēsūs tēl sū		ē'chō		cōr'nū		cōr'nūā
A.	Jēsū		ē'chō		cōr'nū		cōr'nūbūs

Mány proper names in *-ō* are declined like ē'chō : for example Ār'gō, *the ship Ar'go* ; Cl'ō and Ē'rātō, *two of the Muses* ; Mān'tō, *a daughter of Tirésias the seer* ; Sāp'phō, *a famous poetess of Lesbos* ; Īnō, *a daughter of Cādms* ; and Ī'ō, *a daughter of Inachus* : with Dī'dō, *a queen of Cārthage* ; which last is also of the third declension, making Dī'dō'nis in the genitive case.

Several nouns in *-ūs*, of the fourth declension, are likewise (in whole, or in part,) of the second : such as, laū'rūs, *a bay-tree* ; pī'nūs, *a pine-tree* ; fī'cūs, *a fig-tree or a fig* ; quēr'cūs, *an oak* ; vē'r'sūs, *a verse*, cō'lūs, *a distaff or whorl* ; cōr'nūs, *a wild-cherry-tree* ; pē'nūs, *provisions*, is of the second, third, and fourth declensions, pē'nūs, (and pē'nūm, -i) ; pē'nūs, -ōris ; pē'nūs, -ūs ; lā'cūs, *a lake* ; and dō'mūs, *a house* : but there is not perhaps one of these which have all the cases of both declensions in common. Dō'mūs has dō'mī as well as dō'mūs in the genitive singular, but only to signify "at home ;" dative, dō'mūi and dō'mō ; vocative, dō'mūs ; ablative, dōmō only ; nominative plural, dōmūs ; genitive, dō'mūm and dōmō'rūm ; dative and ablative, dōmī'būs only ; accusative, dō'mūs and dō'mōs, which last is most used. The peculiarities of the declension of dō'mūs are given in this old line—

"Tolle me, mu, mi, mis, si declinare domus vis."

³⁶ The dative singular of this declension anciently ended in *-ū*, a termination which, in some few instances, the best Latin authors have retained.

The fifth declension³⁸ makes the génitive and dáitive cases singular to end in *-ēī*; as,

N.	<i>hæc</i>	Fǎ'cí-ēs,	<i>a face,</i>
G.	<i>hújus</i>	Fǎcí-ēī,	<i>of a face,</i>
D.	<i>huic</i>	Fǎcí-ēī, ³⁹	<i>to a face,</i>

³⁷ The nine nouns which follow, make the dáitive and áblative cases plúral in *-ūbūs*: néver in *-ībūs*:

<i>ǎ'cūs, a neédle</i>	<i>cōr'nūs, a cōrnel-tree</i>	<i>quēr'cūs, an oak</i>
<i>ār'cūs, a bow</i>	<i>lǎ'cūs, a lake</i>	<i>spě'cūs, a den, and</i>
<i>ār'tūs, a joint</i>	<i>pār'tūs, a birth</i>	<i>trībūs, a tribe.</i>

But the three following have either *-ībūs* or *-ūbūs* indifferently:—
pōr'tūs, a hárbour | *gě'nū, the knee* | *vě'rū, a spit.*

³⁸ The fifth declension has ónly one terminátion, *-ēs*; and the nouns belóning to it hárdly exceéd fifty in númer: and, with the excepción of *díēs, a day*, which is éither másculine or féminine, in the síngular, but másculine ónly, in the plúral; and with the excepción líkewise of its compóund *měří'diēs, noon*, (which is másculine in the síngular, and wánts the plúral númer,) all nouns of this declension are féminine. Here, álso, it may be remárked, that évery noun of the fifth declension ends in *-ēs*, excépt three; námelý, *fí'dēs, faith*, *spēs, hope*, and *rēs, a thing*; and, móreover, that all nouns énding in *-ēs* are of the fifth declension, excépt three; námelý, *ǎ'bíēs (génitive, ǎb'ětís vèl ǎb'jětís) a fir-tree*, *ǎ'riēs, (génitive, ǎr'ětís vèl ǎr'jětís,) a ram*, and *pǎ'ríēs (génitive, pǎr'ětís vèl pǎr'jětís) a wall or partítion*:—but *quí'ēs, rest*, and its compóund *rě'quíēs, repóse*, are of the third, as well as of the fifth, declension; máking *quí'ēī vèl quí'ētís*, and *rě'quí'ēī vèl rě'quí'ētís*, in the génitive: agáin, the noun *fǎ'mēs, húnger*, of the third declension, is of the fifth declension in the áblative case. Fínally, the three nouns of this declension not énding in *-ēs*, have *-ēī* in the génitive and dáitive cases síngular: all the rest *-ē'ī*.

Rěspūb'licǎ, a cōmmonwealth, which is a compóund of *rēs, a thing*, with the féminine géndér of the ádjective *pūb'licūs, públic*, is decléned as if the súbstantive *rēs* and the ádjective *pūb'licǎ*, though wríten togéther, were áctually séparated; as, génitive, *rěipūb'licǎe*; accúsative, *rěmpūb'licǎm*, &c.

³⁹ The génitive and dáitive cases síngular of nouns of the fifth declension óriginally énded in *-ē*, líke the áblative; and this terminátion the pœts sómetimes (the prose wríters móre rárely) retáin.

DECLENSION OF NOUNS ADJECTIVE.

A NOUN⁴¹ adjective is declined either with three terminations; as, *bŏnŭs*, *good*, *tĕnĕr*, *tĕnder*: or with three articles; as in the following examples:—

SINGULAR.

	<i>Māsculine.</i>	<i>Fĕminine.</i>	<i>Neŭter.</i>
N.	Bŏ'-nŭs, ⁴²	bŏ'-nă,	bŏ'-nŭm,
G.	Bŏ'-nī,	bŏ'-nĕ,	bŏ'-nī,
D.	Bŏ'-nŏ,	bŏ'-nĕ,	bŏ'-nŏ,

⁴⁰ Though *fă'cĭēs* be here declined through all its cases, for the purpose of showing the terminations, yet, in the plural number, the genitive, dative, and ablative of this noun seldom or never occur. Indeed of nouns of the fifth declension, only two, *rĕs*, *a thing*, and *dĭēs*, *a day*, are said to be entire: of the rest (except *fă'cĭēs*, *a face*, *ĕffĭ'gĭēs*, *an effigy*, *spĕs*, *hope*, and *spĕ'cĭēs*, *an appearance*, which have the nominative, the accusative, and vocative cases,) few are read in the plural number, though in the singular they are all perfect.

⁴¹ The only reason for giving to Latin adjectives the name of "*nouns adjective*," appears to be, that the Latin adjectives are declined like nouns substantive: that is, the feminine termination *-ă*, (with the exception of the genitive and dative cases singular of the nine adjectives mentioned in note 45, below,) like nouns feminine in *-ă*, of the first declension: the masculine terminations *-ŭs* and *-ĕr*, (with the exception of *vĕ'tŭs*, *old*; and with the exception of the eleven adjectives specified in note 48, below; and also of *paŭ'pĕr*, *poor*; *ŭ'bĕr*, *fruitful*; *dĕ'gĕnĕr*, *degenerate*; *pŭ'bĕr*, *ripe of age*; *ĭmpŭ'bĕr*, *unripe of age*;) like nouns masculine in *-ŭs* and *-ĕr* of the second declension of substantives: all other terminations, (one in *-ŭr*, namely, *să'tŭr*, *full*, excepted,) like nouns substantive of the third declension. All adjectives, then, are either of the first and second declension of substantives, or of the third only.

⁴² Like "*bŏ'nŭs*" are declined all adjectives proper, ending in *-ŭs*, whether they be derived from the names of persons or of places:—as

Many adjectives proper in -ě'ūs relating to wómen, have also the termination -ě'īs, and are declined like Greek names féminine in -īs of the third declension of súbstantives:—for exámple, Cěphě'ūs, *Cephéan*, or *of Cěpheus*, when relating particularly to Andróméda, daughter of that mónarch, is read Cěphě'īs. Like bǔ'nŭs, likewise, are declined all párticiples in -rŭs, -tŭs, and -dŭs; and the supérative degree of compárisón of évery adjective (which has that degree) without excéption.

⁴³ Many adjectives in -ěr, (as was remarked in note 19, abóve.) whereof the másculine géndér is declined áfter the mánnér of nouns súbstantive in -ěr of the sécond declension, lose *e* in the génitive case, and cónsequently in the féminine and neúter génders throug hóut:—such, for exámple, as á'těr, á'třá, á'třŭm, *black*; génitive, á'třī, á'třē, á'třī: or, pŭl'chěr, pŭl'chřá, pŭl'chřŭm, *fair*: génitive, pŭl'chřī, pŭl'chřē, pŭl'chřī. To these add děx'těr, *right*, which sómetimes keeps, and sómetimes rejécts the *e*:—álsó, cě'těr, *the óther*, or *the rest*, but which is not read in the másculine géndér, síngular nŭmber. Géntile or pátríal adjectives in -ěr (their nŭmber, indeéd, is extrémely féw,) génerally drop the *e*; as, Á'fěr, Á'fřá, Á'fřŭm, *African*.

⁴⁴ Except, however, the eleven adjectives in -ēr or -is, mentioned in note 48, below: for they are wholly of the third declension of substantives.

⁴⁵ The other adjectives are, ū'lūs, *any*, ā'lūs, *another*, and neú'tēr, *neither of the two*, making (in all) nine:—to which may be added the compounds of ū'tēr; as, ū'tēr'quē, *each of the two or both*, ū'tēr'vīs, *which of the two you like*, ū'tēr'libět, *which of the two you please*: likewise, āl'tēr'ūtēr, *one and the other*, genitive, āl'tērā'trīūs, *of both the one and the other*:—but this last is not unfrequently written as two distinct words, āl'tēr ū'tēr; genitive, āl'tērīūs ū'trīūs *vel* āl'tērīūs ū'trīūs. ⁵⁴ Like fē'līx are declined all adjectives of one termination, and all participles in *-ns*. But, for the most part, adjectives in *-ēr, -ēs, -ēs, -ōs, -ōr, -ēbs, -ēps, -ōps, -ōrs, -fēx, -il, -is, -ūx*, (with a few others, such as *sē'nēx, old, sŭp'plēx, suppliant, sōns, guilty, and in'sōns, guiltless,*) have seldom or never the neuter gender in the singular number, and véry rarely in the plúral. Pátrial and patronýmīc adjectives derived from the Greek, terminating in *-is*, or, in *-ūs, as, Pī'ērīs, Pīerian, Sī'cēlīs, Sicilian, Drŷ'ās, Drŷad, Lēs'biās, Lesbian, Āc'tiās, Ac'tic, At'tic, or Athénian, Āchā'īās, Achaian,* are hárdly éver met with, excépt of the féminine gender, and móstly (althóugh not álwáys) of the plúral númer: these have *-īš, and -āš,* respectívely (in préférence to *-ibŭs*) in the dátiue and áblatiue cáses plúral.

To these might be ádded a few adjectives of the óther éndings spéciéd in note 54, ábóve:—but séveral of those have sómetimes *-ī* in the áblatiue. Mě'mōr, *mindful,* and pār, *like or équal,* have *-ī* óny, in the áblatiue case sīngular; but the fórmér has *-ŭm,* the láttér *-iŭm* in the géntiue plúral:—vč'tŭs, álso, makes

COMPARISON OF ADJECTIVES.

Most, but not all, adjectives have three degrees of signification, or comparison:—

1. The positive, which denotes the quality of a thing absolutely:—as, *dōc'tūs*, *learned*; *brě'vīs*, *short*.

2. The comparative, which increases or lessens the quality:—as, *dō'ctiōr*, *more learned*; *brě'viōr*, *shorter* or *more short*:—

And it (namely, the comparative degree) is formed of the first case of the positive that ends in *-ī*, by adding thereto the syllable *-ōr*, in the masculine and feminine genders; and the syllable *-ūs*, in the neuter:—as, of

Dōc'tūs, *genitive*, *dō'ctī*, is formed *hic et hæc dō'ctiōr*, *hoc dō'ctiūs*, *more learned*. Of

Brě'vīs, *dative*, *brě'vī*, is in like manner formed *hic et hæc brě'viōr*, *hoc brě'viūs*, *shorter* or *more short*.

3. The superlative, which increases or diminishes the signification, or comparison, to the greatest degree:—as, *dōctīs'simūs*, *dōctīs'simā*, *dōctīs'simūm*, *the most learned*; *brěvīs'simūs*, *brěvīs'simā*, *brěvīs'simūm*, *the shortest*:—

And it (namely, the superlative degree) is formed also of the first case of the positive that ends in *-ī*, by adding thereto the termination *-ssimūs*:—as, of the

Genitive, *dōc'tī*, is formed *dōctīs'simūs*, *most learned*.

And, of the

Dative, *brě'vī*, is formed *brěvīs'simūs*, *the shortest*.

Observe. Many adjectives vary from these General Rules, and form their comparison irregularly:—as,

<i>Bō'nūs</i> , <i>good</i> ,	<i>mě'liōr</i> , <i>better</i> ,	<i>ōp'timūs</i> , <i>best</i> .
<i>Mā'lūs</i> , <i>bad</i> ,	<i>pě'jōr</i> , <i>worse</i> ,	<i>pēs'simūs</i> , <i>worst</i> .
<i>Māg'nūs</i> , <i>great</i> ,	<i>mā'jōr</i> , <i>greater</i> ,	<i>māx'īmūs</i> , <i>greatest</i> .
<i>Pār'vūs</i> , <i>little</i> ,	<i>mī'nōr</i> , <i>less</i> ,	<i>mī'nimūs</i> , <i>least</i> .
<i>Mūl'tūs</i> , <i>much</i> ,	<i>plūs</i> , ⁵⁶ <i>more</i> ,	<i>plū'rīmūs</i> , <i>most</i> .

větěrūm. The compounds of *pār*, as *im'pār*, *uneven* or *odd*, *dis'pār*, *unequal* or *unlike*, have *-ě* or *-ī*, in the ablative, indifferently; and *-ūm* or *-iūm* in the genitive plural.

⁵⁶ This comparative is not found either of the masculine or feminine gender in the singular number; the neuter gender "plūs" followed by

Dívěs, *rich*, dī'tiōr,⁵⁷ *richer* or *more rich*, dītīs'simūs, *richest* or *most rich*.

more : but, for the présent, the abóve must suffice. In some of the instances which are here addúced, the original pósitoive is óbsolete ; and in óthers, an ádjective ráther than a preposition or an ádverb ought to be regárded as the pósitoive : such, for exámple, as, ĩnfě'rjōr and sŭpě'rjōr, which have the ádjectives ĩnfěrŭs and sŭ'pěrŭs rightly for their pósitoive degreés : yet in óthers, as prjōr and prō'pjōr, the ádverbs or prepositions prā, *before*, and prō'pě, *nigh*, seem to be the words from which those compáratives have been fórmed.

⁵⁰ The ádjectives, (not here spécified,) which, in addítion to those alréady gíven, váry from the géneral rule, may be clássed únder one, or óther, of the séven heads fóllowing. *First*, ádjectives bórrrowing their compárison from ádjectives of some óther terminátion :—*second*, ádjectives fórmng their supérative degreé of compárison irrégularly :—*third*, ádjectives wántng the pósitoive degreé :—*fourth*, ádjectives wántng the compárative degreé :—*fifth*, ádjectives wántng the supérative degreé :—*sixth*, ádjectives which are found ónly in the pósitoive degreé :—and *seventh*, ádjectives which are found ónly in the compárative degreé.

1. *Adjectives bórrrowing their compárison.*

All ádjectives éndng in *-dicŭs*, *-ficŭs*, *-lōquŭs*, and *-vŭlŭs*, change the fínal *-i* of the first case of the pósitoive degreé which términates in that vŭwel, ínto *-ėn'tjōr* for the másculine, and álso féminine génder, of the cómparative degreé ; and ínto *-ėn'tjŭs*, for the neúter. Agáin, they, in líke mánner, form the supérative degreé by chángng the same *-i* ínto *-ėntĭs'simŭs*, *-ėntĭs'simă*, *-ėntĭs'simŭm* : as though áctually bórrrowing their compárison from párticiples in *-dicėns*, *-ficėns*, *-lōquėns*, and *-vŭlėns*. For exámple, *mŭnĭ'ficŭs*, *munĭfĭcent*, makes *hic et hęc mŭnĭfĭcėn'tjōr*, *hoc mŭnĭfĭcėn'tjŭs*, *more munĭfĭcent*, *mŭnĭfĭcėntĭs'simŭs*, *mŭnĭfĭcėntĭs'simă*, *mŭnĭfĭcėntĭs'simŭm*, *most munĭfĭcent* : and so of ádjectives of the óther three terminátions : but *mĭrĭ'ficŭs*, *wŭnderful*, has éither *mĭrĭfĭcėntĭs'simŭs* or *mĭrĭfĭcĭs'simŭs*, *most wŭnderful*, in the supérative degreé ; and perháps some of the rest are símilarly fórmed.

2. *Adjectives fórmng their supérative degreé irrégularly.*

Séveral ádjectives of this class are gíven in the E'ton text, and these need not thérefore be repeáted :—we shall add ónly the four fóllowing, and which, in the compárative degreé, are régular :—

Adjectives ending in *-ěr* form the superlative degree from the nominative case singular, masculine gender of the positive,

<i>Positive.</i>	<i>Superlative.</i>
mätü'rūs, <i>matúre</i> or <i>ripe</i> ,	mätür'rímūs, <i>the ripest</i> or <i>most ripe</i> .
větūs, <i>old</i> or <i>ancient</i> ,	větēr'rímūs, <i>véry old</i> or <i>most ancient</i> .
děx'těr, <i>right</i> or <i>on the right hand</i> ,	děx'tímūs, <i>the most to the right</i> .
sínis'těr, <i>left</i> or <i>on the left hand</i> ,	sínis'tímūs, <i>the most to the left</i> .

With these, some folks (as Válpý) couple *cítěr*, *near*, *cítímūs*, *nearest*; and *póstěrūs*, *postern* or *behind*, *póstrémūs*, *last* or *most behind*; but *cítímūs* and *póstrémūs* we, in note 59, above, formed (though perhaps less properly) from the adverbs or prepositions *cis* or *cítrā*, *on this side*, and *póst*, *after*.

3. Adjectives wanting the positive degree.

The adjectives of this class are, by no means, numerous, if we are allowed to call an adverb, or a preposition, a positive degree; which, strictly speaking however, we hardly can. These two adjectives following seem entirely destitute of a positive degree, even in the latitude to which we have just alluded:—

<i>Comparative.</i>	<i>Superlative.</i>
dětě'rřor, <i>worse</i> ,	dětēr'rímūs, <i>worst</i> ,
ď'cřor <i>vel</i> ď'cýřor, <i>swifter</i> ,	ďcis'símūs, <i>speediest</i> , or <i>swiftest</i> .

The former of these seems indeed to have had *dětěr*, or some such like, for the positive degree, but which has long since become obsolete.

4. Adjectives wanting the comparative degree.

Of this class the adjectives, which here follow, are those which occur more frequently; but several others might be added:—

<i>Positive.</i>	<i>Superlative.</i>
běl'ūs, <i>spruce</i> or <i>fine</i> ,	běllis'símūs, <i>most spruce</i> ,
dívěr'sūs, <i>different</i> ,	dívěrsis'símūs, <i>most different</i> ,
fřdūs, <i>faithful</i> ,	fřdis'símūs, <i>most faithful</i> ,
in'clýtūs, <i>renowned</i> ,	in'clýtis'símūs, <i>most renowned</i> ,
invíc'tūs, <i>invincible</i> ,	invictis'símūs, <i>most invincible</i> ,
inví'tūs, <i>unwilling</i> ,	invítis'símūs, <i>most unwilling</i> ,
mě'řitūs, <i>deserving</i> ,	měřítis'símūs, <i>most deserving</i> ,
nő'vūs, <i>new</i> or <i>late</i> ,	nővis'símūs, <i>newest</i> or <i>latest</i> ,
nū'pěrūs, <i>recent</i> ,	nūpěr'rímūs, <i>most recent</i> ,
pěrsuā'sūs, <i>persuaded</i> ,	pěrsuāsis'símūs, <i>fully persuaded</i> ,
sā'cěr, <i>holy</i> ,	sācěr'rímūs, <i>most holy</i> .

A few of these (just named) are participles rather than adjectives; or, at all events, they are participials, that is, participles used adjectively, without reference to time. Thus, *invíc'tūs* is a participle, if we translate it '*unconquered*,' because this meaning is connected with the past; but the same word *invíc'tūs* is a participial adjective, if we render it '*invincible*,' because, in that sense, it is not confined to the past, present, nor future.

by adding thereto the termination *-řimūs*: as, of *pūl'chěr*, *fair*, is formed *pūlchěr'řimūs*, *the fairest*.⁶¹

5. *Adjectives wanting the superlative degré.*

The number of adjectives of this class is exceedingly numerous, if we admit into it all adjectives which are not compared: but in a more limited acceptation, namely, a class of adjectives which have the positive and comparative degrees, but not the superlative, the number is very considerably diminished; embracing only such adjectives as end in *-ā'lis*, *-ī'lis*, and *-bi'lis*, with most of those in *-ā'nūs*, *-ī'vīs*, and *-in'quūs*:—to which may be added (in addition to the two given in the E'ton text,) the following:—

<i>Pósitive.</i>	<i>Compárative.</i>
<i>āđōlēs'cēns</i> , <i>young or youthful,</i>	<i>āđōlēsčēn'tiör</i> , <i>younger,</i>
<i>điūtūr'nūs</i> , <i>lasting,</i>	<i>điūtūr'niör</i> , <i>more lasting,</i>
<i>īngēns</i> , <i>great or huge,</i>	<i>īngēn'tiör</i> , <i>more huge,</i>
<i>öpī'mūs</i> , <i>fertile or rich,</i>	<i>öpī'miör</i> , <i>more fertile,</i>
<i>prō'nūs</i> , <i>prone,</i>	<i>prō'niör</i> , <i>more prone,</i>
<i>sātūr</i> , <i>full,</i>	<i>sātū'riör</i> , <i>more full.</i>

6. *Adjectives which are found only in the positive degré.*

This class is the most numerous of any, comprising all adjectives and participles of whatever tense, whereunto degrees of comparison are incompatible with the signification: and all adjectives compounded with nouns substantive, and with the verbs *fě'rō*, *I bear*, and *gě'rō*, *I carry*. with some others:—also most, if not all, adjectives terminating in *-ičūs*, *-ī'cūs*, *-imūs*, *-ī'mūs*, *-inūs*, *-ī'nūs*, *-ī'vūs*, *-ō'rūs*, *-sōnūs*, *-fūgūs*, and *-būn'dūs*: likewise in *-ū'l'ūs*, *-ū'lūs*, and other endings indicative of diminution; with all participles in *-rūs*, and in *-dūs*. To which add, *āl'mūs*, *gracious*; *dū'b'iūs*, *doubtful*; *čgē'nūs*, *indigent*; *lā'čěr*, *ragged or torn*; *mě'mör*, *mindful*; *mī'rūs*, *wonderful*; *sōs'pēs*, *safe*; *vā'čūūs*, *empty*: and several besides. But some few of these are found compared in the writings of the earlier Romans, and others of them admit, indeed, of an imperfect comparison with the aid of the adverbs *mā'gīs*, *more*; *vāl'dě*, *very*; and *māx'īmě*, *most*. And some adjectives which are regularly compared, and others which are not, do occasionally, in the positive degré, increase or lessen their signification by means of prepositions in composition: as, *præđūr'ūs*, *very hard*; *pěrd'i'ligēns*, *very diligent*; *děpār'cūs*, *very niggard*.

7. *Adjectives which are found only in the comparative degré.*

There are fewer adjectives of this class than of any other: indeed we hardly know of more than these three below:—

āntě'riör, *former*, | *sāt'iör*, *better*, | *sě'quiör*, *worse*.

Of which, the first seems to be the comparative degré of the adverb *ān'tě*, *before*; and the second, that of *sāt* or *sāt'is*, *enough*. In this class, again, some grammarians rank *pō'tiör* *more eligible or choicer*: but this comparative has *pō'tis*, for its positive, and *pō'tis'simūs* for its superlative degré.

⁶¹ The eleven adjectives mentioned in note 60, above, form their com-

Adjectives ending in *-lis* form the superlative degree according to the General Rule: as, of *ũ'tilīs, úseful, dátiwe,* *ũ'tilī,* is formed *ũ'tilīs'simūs, most úseful*:—except the following, which change *-is* into *-līmūs*: as,

Ā'gīlīs,	<i>nimble,</i>	āgīl'īmūs,	<i>nimblest,</i>	or most <i>nimble,</i>
Fā'cīlīs,	<i>eásy,</i>	fācīl'īmūs,	<i>eásiest,</i>	or most <i>eásy,</i>
Grā'cīlīs,	<i>sléndwer,</i>	grācīl'īmūs,	<i>sléndwerest,</i>	or most <i>sléndwer,</i>
Hũ'mīlīs,	<i>low,</i>	hũmil'īmūs,	<i>lówest,</i>	or most <i>low,</i>
Sīmīlīs,	<i>like,</i>	sīmīl'īmūs,	<i>likest,</i>	or most <i>like.</i> ⁶²

Likewise, if a vowel come before *-ūs,* in the nominative case singular, masculine gender, of the positive degree of an adjective, the comparison is generally made by *mā'gīs, more,* and *māx'īmē, most*:⁶³ as,

Pĩūs, gódlly, dútiwl, or *afféctiúnate*; *mā'gīs pĩūs, more gódlly, more dútiwl,* or *more afféctiúnate*; *māx'īmē pĩūs, most gódlly, most dútiwl,* or *most afféctiúnate.*

OF A PRONOUN.

A PRONOUN⁶⁴ is used instead of a noun, and is declined with number, case, and gender.

Comparison like *pũl'chěr*:—but the compounds of *fě'rō, I bear,* and of *gě'rō, I carry,* as *lā'nīgěr, wool-bearing, ār'mīgěr, arms-carrying,* admit not of a comparative or superlative degree. *Děx'těr, right,* and *sinīs'těr, left,* with some few others in *-ěr,* (see note 60, above,) deviate from this Rule, in the formation of their superlatives.

⁶² To these may be added *imbēcīl'īs, weak*; and any compounds of *fā'cīlīs* or of *sīmīlīs*: as, *diffl'cīlīs, difficult*; *diss'mīlīs, dissimilar* or *unlike*; *pěrsīmīlīs, véry símilar* or *excéédlngly like.*

⁶³ Although all adjectives ending in *-ūs* pure may be compared by help of these two adverbs, yet many of them have also their regular degrees of comparison; thus, *strě'nũūs, strě'nũ'ĩř, strě'nũīs'simūs, strěnuous.*

⁶⁴ Pronouns, as the name véry clearly indicates, are substitutes for nouns, supplying the place of the latter, and preventing them (as it were) from being too frequently repeated: they have reference, therefore, to some person or thing before mentioned. Pronouns are either Simple or Compound: and they are moreover divided into *Pěrsónal, Demónstratiwe, Rélatiwe, Interrógatiwe, Posséssiwe, Indéfińite,* and *Pátriál.* The simple pronouns, in Latin, amount to eighteen in number; namely, the fifteen given in the E'ton list, above; with the relative *quī, who,* the interrogative, *quīs? who, or, what?* which last, however, some regard

There are fifteen pronouns : namely,

Ě'gǒ, <i>I,</i>	Īp'sě, <i>himself,</i>	Sǔ'ūs, <i>his,</i>
Tū, <i>thou,</i>	Īs'tě, <i>that,</i>	Nōs'těr, <i>ours,</i>
Ī'lě, <i>he,</i>	Hīc, <i>this,</i>	Vēs'těr, <i>yours,</i>
Īs, <i>he,</i>	Mě'ūs, <i>mine,</i>	Nōs'trās, <i>of our country.</i>
Sǔ'ī, <i>of himself,</i>	Tǔ'ūs, <i>thine,</i>	Vēs'trās, <i>of your country.</i>

To these may be added their compounds, ě'gǒmět, *I myself,* tǔ'tě, *thou thyself,* ĩ'děm, *the same* ; also the relative quī, *who,* or *what* ; and cǔ'jās, *of what country.*

DECLENSION OF PRONOUNS.

Ě'gǒ, tū, sǔ'ī,⁶⁵ are pronouns substantive, and are thus declined :—

as a compound of quī with ĩs ; and the pátrial, cǔ'jās, *of what country.* Of these, ě'gǒ, *I,* tū, *thou,* (or *you* by courtesy,) and sǔ'ī, *of himself,* *of herself,* *of itself,* or *of themselves,* are substantives of all genders :—the remaining fifteen are adjectives. But of these simple adjective pronouns, several are assumed substantively : as, ĩ'lě, in the masculine gender, *he* ; ĩ'lǎ, in the feminine gender, *she* ; ĩ'l'ūd, in the neuter gender, *it.* In like manner are hīc, hēc, hōc, *this,* ĩs'tě, ĩs'tǎ, ĩs'tǔd, *that,* and ĩs, ě'ā, ĩd, *he, she, it,* used ; and more rarely, ĩp'sě, ĩp'sǎ, ĩp'sǔm, *himself, herself, itself* : also, the relative, quī, *who* ; and some few others. Again, the pronouns ě'gǒ, *I,* and tū, *thou* or *you,* with their plurals nōs, *we,* and vōs, *ye* or *you,* are termed primitives, because from them are derived the possessives mě'ūs, *mine,* tǔ'ūs, *thine,* nōs'těr, *ours,* vēs'těr, *yours* :—sǔ'ī, *of himself,* is also a primitive pronoun, the possessive sǔ'ūs, *his own, her own, its own, or their own,* being derived from it. The last, namely sǔ'ī, and its derivative sǔ'ūs, are styled reflex, because, pointing always reflectively to the chief noun preceding them, they are in a manner reciprocals of one another. With ě'gǒ, tū, and sǔ'ī, through their several cases, are often found the like cases of ĩp'sě, ĩp'sǎ, ĩp'sǔm, agreeing in gender and in number, with the person understood in those primitive and simple pronouns.

⁶⁵ These three pronouns take -mět, after them, in all their cases, whenever a speaker, or writer, intends to mark more than ordinary emphasis : and, in the nominative case (singular) of tū, the syllable -tě- is often inserted between the pronoun and the adjunctive, -mět :—thus, v'ĩd'ĩ ě'gǒmět, *I, my own self, saw* ; fěc'ĩs'sēs tǔ'těmět, *thou, thy own self, wouldst have done (it).* In so far, however, as regards the second person, tǔ'tě is oftener used, perhaps, than tǔ'těmět. In the accusative singular, tě is sometimes doubled ; as tě'tě, *thy identical self* ; and in like manner, both in a singular and plural sense, we frequently meet with sě'sě, *him very self* or *them own selves.* Finally, in the ablative case, both singular and plural, these three pronouns, in common with the relative, are followed by the preposition cǔm in composition : as

In like mánnér álsó is declíned its cómpound ĩdēm, *the same*; as, *Nóminative*, ĩdēm, ěādēm, ĩdēm; *Génitive*, ějūs'dēm; *Dátive*, ěī'dēm, &c.⁷⁰

⁶⁸ For *ī'lī*, and *ī'līs*, we sometimes meet with *ō'lī*, and *ō'līs*, agréably to the more áncient mode of spelling. Like those cáses of *ī'lē* were the dátive and áblative cáses síngular of *līc*, *īs*, and *quī*:—*námely*, *hoic*, *ěoī*, and *quoī*, for the másculine and neúter génders, and *haic*, *ěaī*, and *quaī*, for the féminine géndér. The ádverb *ěc'cě*, or ráther a frágment of that ádverb, énters ínto cómpósitíon with *ī'lē* in the másculine and féminine génders of the accúsative case both in the síngular and plúral númer :—as, *ě'lūm*, *ě'lām*, *ě'lōs*, *ě'lās*.

⁶⁹ With the ádverb *ěc'cě*, the prónoun *īs* énters ínto cómpósitíon exáctly in the same way, and to the same extént as *ī'lē*: hence we have *ě'cūm*, *ě'cām*, *ě'cōs*, and *ě'cās*, but nóthing fúrther.

⁷⁰ This prónoun is véry évidently a cómpound of *īs*, with the adjúnc-tive syllable *-dēm*, contráctéd by sýncopě ínto *ī'dēm* for the másculine, and *ī'dēm* for the neúter géndér. In the accúsative case síngular and génitive case plúral it has *ěūn'dēm*, *ěān'dēm*, and *ěōrūn'dēm*, *ěārūn'dēm*, the létter *m* béing chánged ínto *n* for the sake of the sound.

In like mánnér álsó are declíned its cômponds,⁷² quī-lãm, *a cêrtáin one*; quī'vīs, quī'libêt, *ány one you please*; quīcŭn'quē, *whosoéver*.

Quīs, quã, quíd or quöd, *who?* or *what?* is declíned like quī, *who*:—as are álsó *álliquīs*, and óther cômponds of *quīs*:⁷³ these for the most part make the féminine géndér of the nóminative case síngular, and the neúter of the nóminative and accúsative cásés plŭral, in *-quã*.⁷⁴

⁷¹ Although the áblative *quī* occurs of all génders, yet it is úsed óftener, perháps, in the neúter than in éither the másculine or féminine géndér. In both the síngular, and plŭral nŭmber, the rélatíve, whén-éver it is góverned by the prépositíon *cŭm* expréssed, may be fóllowed or précéded by that word at óption: thus we may say, *cŭm quō*, *cŭm quībŭs* or *quō'cŭm*, *quā'cŭm*, *quī'cŭm*, *quībŭs'cŭm*; but the láttér form is more élegant.

⁷² In évery cômpond (withóut excéption) of the rélatíve prónoun quī, *who*, the rélatíve stands first:—but in those of the interrógative quīs, *who* or *what?* the interrógative is sómetímes first and sómetímes last.

⁷³ *Quīs'quãm* has óften *quīc'quãm*, for *quīd'quãm*, in the neúter géndér; and *quēn'quãm*, for *quēm-quãm*, in the accúsative síngular, másculíne géndér: but the féminine *quãm'quãm* is not found. The cômponds of *quī*, álsó change *m* ínto *n* befóre *d*: thus we óften find *quēn'dãm*, *quān'dãm*,—*quōrŭn'dãm*, *quārŭn'dãm*, &c. for *quēm'dãm*, *quām'dãm*,—*quōrŭm'dãm*, *quārŭm'dãm*, &c.

Mě'ūs, tů'ūs, sů'ūs, are declined like *bŏ'nūs*, excépt óny that *mě'ūs* makes *mī*⁷⁵ in the vócate case síngular, másculine; and *tů'ūs, sů'ūs*, with mány óther prónouns, have nŏ vócate case.⁷⁶

Nŏs'trās, vės'trās, and ců'jās, are declined, Nóminative, *nŏs'trās*, Génitive, *nŏstrā'ūs*, like *fě'līx*.⁷⁷

OF A VERB.

A VERB is the chief word in évery séntence, and ex-préses éither the *áction* or *béing* of a thing.

nate in that prónoun: for those which begín with it, as *quís'nām*, have *quā* and not *quā*.

⁷⁵ To the áblative case síngular, féminine génder (and sómetimes, too, though rárely, in the másculine génder,) of *mě'ūs, tů'ūs, sů'ūs, nŏs'těr,* and *vės'těr*, is ádded (for the sake of émphásis) the terminátion *-plě*:— as, *měāp'tě, tůāp'tě, sůāp'tě, nŏstrāp'tě, vėsstrāp'tě*: álso, *měŏp'tě, tůŏp'tě*, &c. but séldom.

⁷⁶ All nouns and prónouns with which the vócate *tů* cánnót be cóupled, so as to make sense, that is, all nouns and prónouns which cánnót be rátionally áddressed, "*O thou*," seem, of necéssity, to want the vócate case:—as, *ně'mŏ, nobody, nů'lūs, no one, quŏt, how mány, ě'gŏ, I, sú'í, of hímsělf, híc, this one*.

⁷⁷ It may be remárked, that to *hĭc*, and ány of its cáses énding in *ŏ* or in *s*, there is óften ádded the síllable *-cě*; as, *hĭc'cě, hŏc'cě, hŭjūs'cě, hĭs'cě*: and óccásionally *-cĭně*, to ány case énding in *c*. This prónoun is álso compóunded with *ĭ'lě* and with *ĭs'tě*; as, *ĭ'l'ĭc, ĭ'l'ĭc, ĭ'l'ĭc, ĭ'l'ĭc*, and, *ĭs't'hĭc, ĭs't'hĕc, ĭs't'hŏc, vèl ĭs't'hŭc*. This last is fréquently wríttén wíthóut the *h*. And with the géntive *hŭ'jūs*, and líkewise with *ě'jūs* and *ců'jūs*, is óftentimes read the géntive of *mŏ'dūs*, adjúctively: as, *hŭjūs'mŏdĭ, on this wíse or of this mánner*: *ějūs'mŏdĭ, of that mánner*; *cůjūs'mŏdĭ, of wích sŏrt*, or, interrŏgatively, *of wát mánner or on wát wíse?* And as *hŭ'jūs* takes *-cě* áfter it, (as has been séid ábŏve) so *ě'jūs* and *ců'jūs* have sómetimes the same adjúctive: as, *ějūs'cě, of*

Of VERBS there are two Voices:—

- I. The Active, énding in *-š*; as *ă'mō*, *I love*.
 II. The Pássive, énding in *-šr*; as *ă'mōr*, *I am loved*.

Of Verbs énding in *-š*, some are áctives tránsitive: as, *vīn'cō*, *I cónquer*; and these, símply by chánging *š* into *-šr*, becóme verbs pássive; as, *vīn'cōr*, *I am cónquered*. Some are námed neúters, and íntransitives; as, *gaū'děš*, *I am glad*: and these are néver made pássives.

Some verbs énding in *-šr*, are called depónents,—and have an áctive significátion:—as, *lō'quōr*, *I speak*. And some few are neúters:—as, *glō'rīōr*, *I boast*.⁷⁸

Note I. That verbs neúter énding in *-šr*, and verbs depónent, are declined like verbs pássive,—but with gérunnds and súpines like verbs áctive.

II. A verb is called tránsitive when the áction pásses on to the noun fólloving:—as, *vīn'cō tē*, *I cónquer thee*; *vě'ně'rōr Dě'ūm*, *I wórship God*.

III. A verb is called íntransitive, or neúter, when the áction does not pass on, or requíre a fólloving noun: as, *cūr'rō*, *I run*; *glō'rīōr*, *I boast*.

IV. Verbs that have dífferent pėrsons are called verbs pėrsonal:—as, *ě'gō ă'mō*, *I love*; *tū ă'mās*, *thou lóvest*.

And such as have not dífferent pėrsons are called verbs ímpersonal:—as, *tā'dět*, *it irks*; *ōpōr'tět*, *it behóves*.

that, póintingly: *cūjūs'cě*, *of whose*: or *of what*? Betwėn the géni-tive síngular álso of those prónouns, and that of *mō'dūs*, this frágment of *ě'c'ě* is óften introdúced: as, *hūjūsč'mōdī*, *of this véry sort*.

⁷⁸ *Incéptive Verbs* are such as índicate that a begínning has been made, and they are fórméd from the sécond pėrson síngular of the prėsent of the índicative of some símple verb of kíndred méaning, by the addítion of *-cō*:—hence they all end in *-scō*; as *cālēs'cō*, *I wax hot*, from *cālěš*, *I am hot*.

Freqúentative Verbs are such as ímply fréquency or repetítion of that which is the súbject of the verb:—as, *clā'mītō*, *I excláim fréquently*, from *clā'mō*, *I excláim*; *cūr'sō* and *cūr'sītō*, *I run óften*, from *cūr'rō*, *I run*; *jāc'tō* and *jāc'tītō*, *I flíng óften*, from *jā'c'ěš*, *I cast*. All fré-quéntative verbs in *-ītō* are fórméd from verbs of the first conjugátion, by chánging the final *-ū* of the last súpine into *-ītō*.

Desíderative Verbs expřess some wish or desíre,—and are all of the fourth conjugátion; béing fórméd by the convėrsion of *-ū* of the last súpine of verbs ínto *-ŭ'rīš*; as, *ěšŭ'rīš*, *I desíre to eat*, from *ě'sū*, *to be eátén*.

OF MOODS.

THERE are five moods; the indicative, the impéative, the poténtial, the subjúctive, and the infinitive.

The indicative mood éither décláres a thing pósitoively, as *ě'gō, ā'mō, I love*; else it asks a quéstion, as *ā'mās tū? Dost thou love?*

The impéative mood commánds or entreáts: as, *vě'nī hūc, come híther*; *pār'cě mī'hī, spare me*.

It is álso known in En'glis*h* by the sign *let*; as *ěā'mūs, let us go*.

The poténtial mood implíes "*pówer*" or "*dúty*;" and in En'glis*h* is cómmonly known by these signs, *may, can, might, would, could, should, or ought*:—as, *ā'mēm, I may love*; *āmāvīs'sēm, I might have loved*; and the like.

The subjúctive mood in Látin differs from the poténtial, ónly in that it is subjoined to anóther verb góing befóre it in the same séntence; and has álways some conjúction, or indéfinite word, joined to it: as, *ě'rām mīsěř cūm āmārēm, I was míserable when I loved, that is, when I was-in-love*; *ně'scīō quā'līs sīt, I know not what sort of man he is*.

The infinitive mood hath néither númer, pérson, nor nóminative case; and is (cómmonly) known by the sign *to*; as, *āmārě, to love*.

OF GERUNDS AND SUPINES.

VERBS have three gérunds, énding in *-dī, -dō, -dūm*, and which have an áctive significátion:—as, *āmān'dī, of lóving*; *āmān'dō, in lóving*; *āmān'dūm, lóving*.

The Súpines of verbs are two:—

The one énding in *-ūm*, which sígnifies áctively:—as, *ě'ō āmā'tūm, I go to love*.

The óther énding in *-ū*, and háving for the most part a pássive significátion:—as, *díffī'cílīs āmā'tū, hard or difficult to be loved*.

OF THE TENSES OF VERBS.

IN VERBS there are five ténse*s*, or times, expéssing an áction or affirmátion: viz. the pré*s*ent, the preterimperfect, the preterpéfect, the preterplúperfect, and the fúture.

I. The présent tense speaks of a thing présent, or now dóing :—as, *ǎ'mǒ*, *I love* or *am lóving*.

II. The preterímperfect tense speaks of a thing which was dóing at some time past, and not then términated or énded : as, *ǎmǎ'bám*, *I did love* or *was lóving*.

III. The preterpérfect tense speaks of a thing already done and past :—as, *ǎmǎ'vī*, *I lóved* or *have lóved*.

IV. The preterplúperfect tense reférs to a thing done at some time past, and términated or énded befóre sómething else spóken of:—as, *ǎmǎ'vērám ān'tě tūnc tēm'pǒrīs*, *I had lóved befóre that time*.

V. The fúture tense speaks of a thing to be done hereáfter : as, *ǎmǎ'bǒ*, *I shall love* ; *ǎmǎ'bīs*, *thou wilt love*.

OF NUMBERS AND PERSONS.

VERBS have two númer, the síngular and the plúral : and three pérsons in each númer ;—as,

SINGULAR.		PLURAL.	
Ě'gǒ	<i>ǎ'mǒ, I love,</i>	Nǒs	<i>ǎmǎ'mūs, we love,</i>

Ī'lě,	<i>ǎ'māt, he loves,</i>	Ī'lī	<i>ǎ'mānt, they love.</i>

Note. All nouns are of the third pérson, excépt *ě'gǒ*, *I*, *nǒs*, *we*, *tū*, *thou* or *you*, and *vǒs*, *you* or *ye* : but nouns of the vócative case are próperly of the sécond pérson, becaúse *tū* or *vǒs* (accórding as the noun is síngular or plúral,) must nécessarily be understoód.

OF THE VERB, ĚS'SĚ, TO BE.

BEFÓRE óther verbs can be declíned, it is nécessary to learn the verb *ěs'sě*, *to be* ; which is váried as fóllovs :—

5. Fúture Tense.—*shall* or *will.*

Singular.	{ Ě'rō, ě'ris, ě'rīt,	<i>I shall be,⁷⁸ thou wilt be, he will be,</i>
-----------	-----------------------------	---

⁷⁸ Though the sign of the future tense be "*shall* or *will*," yet the former is generally used with the first person only; the latter, with the second and third persons: for the expression "*I will be*," means rather, "*I am willing to be*," than "*I shall be*;" and in like manner, by "*you shall be*," we rightly understand "*you will be compelled to be*." Yet many speakers confound "*shall*" and "*will*" with each other, and this not unfrequently to the utter perversion of the sense. But there are instances in which, with the first person, "*will*" is preferable to "*shall*:" and others in which, with the second and third persons, "*shall*" is more eligible than "*will*."

DECLENSION OF VERBS REGULAR.

VERBS have four conjugátions, both in the áctive and pássive voice.

The first conjugátion of Verbs áctive hath *a* long befóre *-řě* of the infinitive mood ; as *ámá'řě, to love.*

The second conjugation hath *e* long before *-řě* of the infinitive mood; as *mōnĕřě*, to advise.

The third conjugation hath *e* short before *-řě* of the infinitive mood; as *rĕgĕřě*, to rule.

The fourth conjugation hath *i* long before *-řě* of the infinitive mood; as *aūdīřě*, to hear.

VERBS ACTIVE in *-ō* are declined after these examples.

PARTICIPLES.

Past, Aūdī'-tūs, *heard or having been heard,*

Future, Aū-diēn'dūs, *that is to be, or that must be heard.*⁸²

DECLENSION OF VERBS IRREGULAR.

CERTAIN verbs deviate from the General Rule, and are formed in the manner following:—

1. Pōs'sūm, pō'tēs, pō'tūi, pōs'sē, pō'tēns, *to be able.*

2. Vō'lō, vīs, vō'lūi, vē'llē, vōlēn'dī, vōlēn'dō, vōlēn'dūm, vō'lēns, *to be willing.*

3. Nō'lō, nōn'vīs, nō'lūi, nō'llē, nōlēn'dī, nōlēn'dō, nōlēn'dūm, nō'lēns, *to be unwilling.*

4. Mā'lō, mā'vīs, mā'lūi, mā'llē, mālēn'dī, mālēn'dō, mālēn'dūm, mā'lēns, *to be more willing or to have rather.*

⁸² A *Verb Depōnent* (as we read in the text, page 38, above) is declined like a *Verb Pāssive* of the same conjugation as itself,—but with *Gérunds* and *Súpines*:—thus, mō'dērōr, mō'dērā'ris, (*vēl* mō'dērā'rē), mō'dērā'tūs sūm (*vēl* fū'i), mō'dērā'rī,—mō'dērān'dī, mō'dērān'dō, mō'dērān'dūm, mō'dērā'tūm, mō'dērā'tū, mō'dērāns, mō'dērātū'rūs, mō'dērā'tūs, mō'dērān'dūs, *to moderate or to manage*; pōllī'cēōr, pōllīcē'ris, (*vēl* pōllīcē'rē), pōllīcītūs sūm (*vēl* fū'i), pōllīcē'rī,—pōllīcēn'dī, pōllīcēn'dō, pōllīcēn'dūm, pōllīcītūm, pōllīcītū, pōllīcēns, pōllīcītū'rūs, pōllīcītūs, pōllīcēn'dūs, *to promise*; lō'quōr, lō'quēris (*vēl* lō'quērē), lōcūtūs sūm (*vēl* fū'i), lō'quī,—lōquēn'dī, lōquēn'dō, lōquēn'dūm, lōcūtūm, lōcūtū, lō'quēns, lōcūtū'rūs, lōcūtūs, lōquēn'dūs, *to speak*; lārg'gōr, lārg'rīs, (*vēl* lārg'rē), lārgītūs sūm (*vēl* fū'i), lārg'rī,—lārgiēn'dī, lārgiēn'dō, lārgiēndūm, lārgītūm, lārgītū lārgiēns, lārgītū'rūs, lārgītūs, lārgiēn'dūs, *to bestow freely*. And here it may be remarked, that the participle in -ūs of *Depōnent Verbs* has sometimes a *pāssive*, though more frequently (and properly) an *āctive* signification: for example, in Virgil we find oblītā mī'hī cār'mīnā, *songs forgotten by me*. Eclogue IX. 53.

Lastly, in the tenses of passive and of depōnent verbs, declined by help of the verb sūm, the participle must always be of the same gender and number as the nominative case to the verb:—for, although, for the sake of brevity, we say, āmā'tūs sūm, yet do we mean, āmā'tūs, āmā'tū, āmā'tūm sūm *vēl* fū'ī, according as the nominative is masculine, feminine, or neuter: and, in the plural number, āmā'tī, āmā'tā, āmā'tā sūmūs *vēl* fū'īmūs, *we have been loved*.

5. Ě'dō, ě'dīs (*vě̀l ěs*), ě'dī, ě'děřě (*vě̀l ěs'sě*), ědēn'dī, ědēn'dō, ědēn'dūm, ě'sūm, ě'sū, ě'dēns, ěsū'rūs, *to cat*.

6. Fě'rō, fěrs, tū'li, fě'rě, fě'rēn'dī, fě'rēn'dō, fě'rēndūm, lā'tūm, lā'tū, fě'rēns, lātū'rūs, *to bear or suffer*.

7. Fī'ō, fīs, fāc'tūs sūm *vě̀l* fū'ī, fī'ērī, fāc'tūs, fāc'iēn'dūs, *to be made or done*.

8. Fě'rōr, fě'rīs *vě̀l* fě'rě, lā'tūs sūm *vě̀l* fū'ī, fě'rī, lā'tūs, fě'rēn'dūs, *to be borne or suffered*.

POSSUM, *I am able*.

INDICATIVE MOOD.

1. Présent Tense.—*I am able*.

Singular.	{	Pōs'sūm, ⁶³	<i>I am</i>	} <i>able</i> .
		pō'tēs,	<i>thou art</i>	
		pō'tēst,	<i>he is</i>	
Plural.	{	pōs'sūmūs,	<i>we are</i>	} <i>able</i> .
		pōtēs'tīs,	<i>ye are</i>	
		pōs'sūnt,	<i>they are</i>	

2. Präterimperfect Tense.—*I was able*.

Singular.	{	Pō'tērām	<i>I was</i>	} <i>able</i> .
		pō'tērās,	<i>thou wast</i>	
		pō'tērāt,	<i>he was</i>	
Plural.	{	pōtērā'mūs,	<i>we were</i>	} <i>able</i> .
		pōtērā'tīs,	<i>ye were</i>	
		pōtērānt,	<i>they were</i>	

⁶³ *Pōs'sūm* is a compound of the adjective *pō'tīs*, *able*, with *sūm*, *I am*, contracted into one word; the letters *t* and *i* being dropped. The other compounds of *sūm*, are:—

āb'sūm, <i>I am absent or away,</i>	ōb'sūm, <i>I am against or I hurt,</i>
ād'sūm, <i>I am present or at hand,</i>	prā'sūm, <i>I am over or chief,</i>
dě'sūm, <i>I am wanting or I fail,</i>	prō'sūm, <i>I benefit or profit,</i>
in'sūm, <i>I am in or within,</i>	sūb'sūm, <i>I am under or below,</i>
intēr'sūm, <i>I am in the midst of,</i>	sūpēr'sūm, <i>I abound or I remain.</i>

These are, in all their tenses, declined like the verb *ěs'sě*, *to be*, except *prō'sūm*, *I do good to* or *I benefit*, which always takes the letter *d* betwixt *pro* and the tenses of *ěs'sě*, beginning with a vowel: as, *prō'děs*, *thou profitest* or *availlest*, *prō'děst*, *he avails*, *prō'děřām*, *I availed*, *prō'děsě*, *to avail*. The verb *in'sūm* is said to want the præterite, and consequently the tenses derived from it.

3. Preterpérfect Tense.—*I have been áble.*

Singular.	{	Př'tūī,	<i>I have</i>	} <i>been áble.</i>
		přtūīs'tī,	<i>thou hast</i>

		přtūīs'tīs,	<i>ye have</i>	
		přtūērūnt vèl ě'rě,	<i>they have</i>	

4. Preterplúperfect Tense —*I had been áble.*

Singular.	{	Přtū'ērām,	<i>I had</i>	} <i>been áble.</i>
		přtū'ērās,	<i>thou hadst</i>	
		přtū'ērāt,	<i>he had</i>	
Plúral.	{	přtūērā'mūs,	<i>we had</i>	
		přtūērā'tīs,	<i>ye had</i>	
		přtū'ērānt,	<i>they had</i>	

5. Fúture Tense.—*I shall be áble.*

Singular.	{	Př'těřō,	<i>I shall</i>	} <i>be áble.</i>
		př'těřīs,	<i>thou wilt</i>	
		př'těřīt,	<i>he will</i>	
Plúral.	{	př'těřīmūs,	<i>we shall</i>	
		př'těřītīs,	<i>ye will</i>	
		př'těřūnt,	<i>they will</i>	

Observe. *Př'sšim*, in cómmon with *vřlř* and *mālř*, is néver úsed in the Impérative Mood :—and *př'těns* rárly occúrs as a párticiple.

In like mánnér are the cómounds⁸⁷ of *ě'ō* declíned : as are

⁸⁷ The more cómmon cómounds of *ě'ō* are the fólloving, which, exclusive of *quě'ō* and of *ně'quě'ō*, and exclusive (likewise) of *ām'bīō*, *I environ*, a verb originally a cómound of *ě'ō*, but eventually adopted among the régular verbs of the fourth conjugátion, amount to séventeen in número :—

1. āb'ěō,	ābī'vī,	āb'ītūm,	ābī'rě,	<i>to go away,</i>
2. ād'ěō,	ādī'vī,	ād'ītūm,	ādī'rě,	<i>to go únto,</i>
3. āntě'ěō,	āntě'vī,	āntě'ītūm,	āntě'rě,	<i>to go befóre,</i>
4. cīrcūm'ěō,	cīrcūm'vī,	cīrcūm'ītūm,	cīrcūm'rě,	<i>to go round,</i>
5. cō'ěō,	cōī'vī,	cō'ītūm,	cōī'rě,	<i>to go togéther with,</i>
6. ēx'ěō,	ēxī'vī,	ēx'ītūm,	ēxī'rě,	<i>to go out,</i>

8. ĩntěr'ěō,	ĩntěrī'vī,	ĩntěr'ītūm,	ĩntěrī'rě,	<i>to pėrish,</i>
9. ĩntrō'ěō,	ĩntrōī'vī,	ĩntrō'ītūm,	ĩntrōī'rě,	<i>to go ínto,</i>
10. ōb'ěō,	ōbī'vī,	ōb'ītūm,	ōbī'rě,	<i>to go through with,</i>
11. pěr'ěō,	pěrī'vī,	pěr'ītūm,	pěrī'rě,	<i>to pėrish,</i>
12. prā'ěō,	prāī'vī,	prā'ītūm,	prāī'rě,	<i>to précède.</i>
13. prāetěr'ěō,	prāetěrī'vī,	prāetěr'ītūm,	prāetěrī'rě,	<i>to pass by,</i>
14. prō'děō,	prōdī'vī,	prō'dītūm,	prōdī'rě,	<i>to go forth,</i>
15. rě'děō,	rědī'vī,	rě'dītūm,	rědī'rě,	<i>to retúrñ,</i>
16. sūb'ěō,	sūbī'vī,	sūb'ītūm,	sūbī'rě,	<i>to go únder,</i>
17. trāns'ěō,	trānsī'vī,	trāns'ītūm,	trānsī'rě,	<i>to pass óver.</i>

In all these verbs the pénult of the súpinc (*ě'ō* being one of the excėptions to the Général Rule "*SŮPĪ'NŪM dĭssj'ľľbŭm prĭ'řem hŭ'ľet ľŏ'gŭm,*") is short. See Prósody.

And here it is réquisite to obsėrve, that in the Prėterite of the Indícativė, and the tenses derived from it, the *v* is óftener drópped, than

also *quěđ*, *I am áble*, and *něquěđ*, *I am unáble*; but these last are not úsed in the Impérative Mood, and séldom or néver éither in the Gérunds or Párticiples.⁸⁸

DEFECTIVE VERBS.

VERBS that have ónly some partúcular Ténses and Pérsóns,⁸⁹ are called *Deféctive*; such are the fóllowing:—

1. Aíř, ⁹⁰ *I say*.

Aíř,	ářs,	řit,	—	—		ářunt.

retained, in *ř* and all its compounds:—thus, for *řdřvi*, *přřvi*, &c., we more fréquently read and say *řdři*, *přři*, &c. This contracted form is likewise véry fréquent in óther verbs, though scárcey so fréquent as in *ř* and its compounds.

Agáin, althóugh *ř* is próperly a neuter verb, yet, éven by the best writers, was it úsed *personally*, as well as *impersonally*, in the pássive voice:—thus in CÆSAR we find “*flūmēn pěđibūs trānsřri pőtěst*,” *the river can be cróssed on foot*: álso in CÍCERO we read “*pěřřcūlā řđěunřtřř*,” *dangers are come únto*: and mány óther pássages of like kind might be quoted.

In *prřdř* and *řdř* the létter *d* is insértd for the sake of distinctness of sound; and in *prřř*, the díphthong is óftener short than long.

⁸⁸ *Věně*, *to be sold*, is conjugated like *ř*, excépt that it has no impérative, nor future infinitive, nor gérunds, súpines, or párticiples.

⁸⁹ The verb *dřř*, *to give*, wants the first pérsón síngular of the présent of the indicative, and álso of the présent of the poténtial, pássive:—in like mánnér, *fřř*, *to speak*, wants the same pérsóns, of the like tense, of the same two moods. Agáin, the sécond pérsón síngular of the impérative of *scřř*, *I know*, námedy, *scřř*, was séldom (or perháps néver) in use.—Amóng *Deféctive Verbs* some grammárians class such words as “*sřř*,” for *sřř vřř*, *if thou art willing*; “*sřřřř*” for *sřř vřřřř*, *if ye are willing*; “*sřřđřř*,” for *sřř řđřđřř*, *if thou dárest*:—álsó, *řřřřřř*, *he begins*, or ráther, *it is begún*; *đřřřřř*, *it is wánting*; and *cřřřřřř*, *it is done*; with a few more which hárdly belong to this tribe.

⁹⁰ In the verb *ářř* the first two létters are álways pronóunced as one syllable whénéver they are fóllowed by a vówel: but when a cónsonant fóllows the *ř*, then the first létter is inváriably short; as, *řit*, *he saith* or *says*.

Nō'vī, *I know* or *I have known*, ō'dī,⁹⁴ *I hate* or *I have hated*, cě'pī, *I begin* or *I have begun*, and mě'mīnī, *I do remember* or *I have remembered*, are likewise Verbs Defective; as they have ónly the Preterpéfect Tense of the Indicative Mood, with the Ténse formed therefróm :—thus,

Nō'vī, <i>I know</i> or <i>I knew</i> ,	}	known.	Ō'dī, <i>I hate</i> or <i>I hated</i> ,	}	hated.
Nō'veřām, <i>I had</i>			Ō'děřām, <i>I had</i>		
Nō'veřīm, <i>I may have</i>			Ō'děřīm, <i>I may have</i>		
Nō'vis'sēm, <i>I might have</i>			Ō'dis'sēm, <i>I would have</i>		
Nō'veřō, <i>I shall have</i>			Ō'děřō, <i>I shall have</i>		
Nō'vis'se, <i>to have</i>			Ō'dis'sě, <i>to have</i>		

In like mánnér do cě'pī, and mě'mīnī, form their ténse :—and it is to be obsérved that these four verbs have not ónly the first pėrson, but álso all the óther pėrsons of those Ténse : mě'mīnī has moreóver the sécond pėrson of the Impėrative Mood, both síngular and plúral :—as,

měmėntō, *remember thou.* || měmėntō'tě, *remember ye.⁹⁵*

⁹³ To these some add fō'rēm, *I might be*, and the infinitive fō'rě, *to be*.

⁹⁴ The two verbs ō'dī and cě'pī have the past párticiples ō'sūs, *hated*, and cě'p'tūs, *begún*; the two párticiples ěxō'sūs and pčřō'sūs are álso in use.

⁹⁵ To these *Defective Verbs* might be joined ō'vās, *thou exúltest*, ō'vāt, *he exúlts*, ō'vāns, *erúlting*: álso, ā'pāgě, *away with thee*, ā'pā'gítě, *get ye hence*. And here it may be nóticed that the four fólloving verbs, fá'cīō, *I do*, dí'cō, *I say*, dū'cō, *I lead*, and fě'rō, *I bring* or *I bear*, lose the létter *e*, by the figure apócopě, in the sécond pėrson síngular of the impėrative, áctive; máking fāc, *dīc*, *dūc*, *fěc*, insteád of fá'cě, dí'cě, dū'cě, fě'rě. But when fá'cīō is compóunded with a préposition it chánges the first vówel of the présent into *i*, and forms its impėrative régularly: as, pėřfī'ciū, *I pėřfóm*; pėřfī'cě, *pėřfóm thou*.

IMPERSONAL VERBS.

VERBS that are úsed, exclúsiively, in the third pérsón síngular, without a nóminative in Latin (but of which the nóminative in En'glish is "It" indéfinitely táken,) are called *Verbs Impérsónal*, as, *děléc'tăt, it delíghteth, děcět, it becómeth, pŭgnătŭr, it is fought, vĭdětŭr,*⁹⁵ *it seems.*

Impérsónal Verbs have all the moods and ténses which Pérsónal Verbs have, with the excéption, perháps, of the impéراتive : thus,

Děléc'tăt, <i>it delíghts,</i>	Vĭdětŭr, <i>it seems,</i>
Děléc'tătă băt, <i>it did delíght,</i>	Vĭdébătŭr, <i>it did seem,</i>
Děléc'tătă vĭt, <i>it delíghted,</i>	Vĭsŭm ěst, <i>it séemed,</i>
Děléc'tătă vĕrăt, <i>it had delíghted,</i>	Vĭsŭm ěrăt, <i>it had séemed,</i>
Děléc'tătă bĭt, <i>it will delíght,</i>	Vĭdĕbĭtŭr, <i>it will seem,</i>
Děléc'tĕt, <i>it may delíght,</i>	Vĭdĕătŭr, <i>it may seem,</i>
Děléc'tătă rĕt, <i>it might delíght,</i>	Vĭdĕrĕtŭr, <i>it might seem,</i>
and so forth.	and so forth.

⁹⁵ Verbs which are séldom, or néver, found except in the third pérsón síngular of one or more of the ténses of the áctive voice are, strictly, *Verbs Impérsónal* :—but mány verbs which are régular in all the pérsóns of the áctive voice, are óften assumed *impérsónally* in the pássive. The verbs próperly termed *Impérsónals* are the fóllowing :—

dĕcět, <i>it becómes,</i>	mĭsĕrĕt, <i>it pĭties,</i>	pĕĕnitĕt, <i>it repĕnts,</i>
lĭbĕt, <i>it pleáses,</i>	ĕpĕr'tĕt, <i>it behóves,</i>	pŭ'dĕt, <i>it ashámes, and</i>
lĭcĕt, <i>it is láwful,</i>	pĭ gĕt, <i>it irks,</i>	tĕ'dĕt, <i>it weáries.</i>

To which some grammárians add mány more, as, *cŏn'fĭt, it is done, dĕ'fĭt, it is wánting, ĩn'fĭt, he begíns or ráther it is begún, lĭ'quĕt. it appeárs* ; with verbs expréssive of the occúrrénces of náture ; thus, *plŭ'it, it rains, nĭn'gĭt, it snows, grăn'dĭnăt, it hails, gĕ'lăt, it frĕezes, rĕ'gĕlăt, it thaws, tŏ'năt, it thúnders, fŭl'mĭnăt, it líghtens, vĕsperă'scĭt, it begíns to draw tŏwards évening* : and a múltitude besĭdes.

Some verbs not strictly impérsónal, are neverthelĕss óften úsed impérsónally. Of these we shall gĭve, as a spĕcĭmen, one or two of each conjugátion :—

1st CONJUGATION. *Jŭ'văt, it delíghts ; cŏn'stăt, it is agrĕed on ; vă'căt, there is léisure ; spĕc'tăt, it concĕrns, cŏrtătŭr, it is contended ; pŏtătŭr, it is drunk ; &c.*

2nd CONJUGATION. *Dĕ'bĕt, it ought ; plĕ'cĕt, it pleáses ; ĕt'tĭnĕt, it pertáins ; fávĕtŭr, fávour is shown ; vĭdĕtŭr, it appeárs or seems ; &c.*

3rd CONJUGATION. *Sŭffĭcĭt, it suffíceth ; ĩn'ĕĭpĭt, it begíns ; dĕ'sĭnĭt, it términates or gĭves óver ; crĕ'dĭtŭr, it is trŭsted ; mĭt'tĭtŭr, it is sent ; &c.*

4th CONJUGATION. *Ĕ'vĕnĭt, it comes to pass ; cŏn'vĕnĭt, it is meet ; ĕx'pĕdĭt, it is expĕdient ; sĕntĭtŭr, it is percĕived ; ĕpĕrĭtŭr, it is opened, &c.*

OF A PARTICIPLE⁹⁷.

A PARTICIPLE is a part of speech derived from a Verb, and has share with a Noun Adjective, in number, gender, case, and declension; and share with a Verb, in tense and signification.

There are four distinct sorts or kinds of PARTICIPLES :

1. One of the présent tense, which in English ends always in *-ing*; and in Latin always in *-āns* or in *-ēns*: as, *lōving* *ā'māns*; *teāching*, *dōcēns*.

2. One of the future, in *-rūs*, which implies a likelihood or design of doing a thing: as, *āmātūrūs*,⁹⁸ *about to love*.

3. One of the preterperfect tense, which has generally a passive signification, and in English ends (for the most part) in *-d*, *-t*, or *-n*:—as, *lēc'tūs*, *read*; *dōc'tūs*, *taught*; *vīsūs*, *seen*⁹⁹.

IRREGULAR VERBS, *Prō'dēst*, *it profits*; *rē'fērt*, *it concerns*; *in'tērēst*, *it interests*; *sū'pērēst*, *it remains*; *ādī'tūr*, *it is come unto*; *ābēūdūm ēst*, *it is to be or must be gone away*.

⁹⁷ A Participle owes its name to the circumstance of participating or partaking of Gender and Declension in common with ADJECTIVES, and of Time and Signification in common with VERBS. Some participles of the présent and past tenses admit even of comparison:—thus, *ā'māns*, *lōving*, *āmān'tiōr*, *more loving*, *āmāntis'simūs*, *most loving*: *dōc'tūs*, *taught* or *learned*, *dōc'tiōr*, *more taught* or *more learned*, *dōctis'simūs*, *the most taught* or *very learned*. But as in this sense the idea of tense or time is not strictly blended with the signification, several grammarians reject the name of *Participles* in such instances, and adopt that of *Participials*. Participles admitting of degrees of comparison are generally the source or origin of adverbs; which, in like manner, admit of comparison:—thus, from *ā'māns*, *lōving*, are derived *āmān'tēr*, *lovingly*: *āmā'n-tiūs*, *more lovingly*, *āmāntis'simē*, *most lovingly*: and similarly from *dōc'tūs*, *learned*, come the adverbs *dōc'tē*, *learnedly*, *dōc'tiūs*, *more learnedly*, *dōctis'simē*, *most learnedly*.

⁹⁸ With the verb *sūm* this participle is frequently used (and with elegance) instead of the future of the indicative of verbs, especially if *Purpose* or *Intention* be signified; and with *sīm* it is elegantly employed for the présent, or future, and, with *ēs'sēm*, for the pluperfect, of the potential mood: thus, *prōfēc'tūrūs sūm*, *I will go*, that is, *I am about to go*; *nōn dūbītō quīn sīt factūrūs*, *I doubt not but he may (or will) do it*; *nōn dūbītā'vī quīn ēs'sēt vēntūrūs*, *I doubted not but he would come*: rather than "*quīn fū'ciāt*, *quīn fū'cērēt*, *quīn fē'cērīt*; *quīn vē'nīrēt*, *quīn vē'nīssēt*, *quīn vē'nērīt*." All verbs which have no supines, want of course this participle, which is derived from the supine in *-ū*.

⁹⁹ In Latin the participle of the past tense ends invariably in *-ūs*, preceded for the most part by *t*, not unfrequently by *s*, sometimes by *x*, and in one instance, namely, *mōr'tiūs*, *dead*, by the vowel *ū*.

4. One of the future, in *-dūs*, which has also a passive signification, and expresses a future action; as, *āman'dūs*, *that is to be*, or *that must be loved*, else, *that is deserving* or *worthy of being loved*.¹⁰⁰

Note. All participles are declined like nouns adjective: those of three terminations, like *bō'nūs*, and those of one termination, like *fē'lix*.

OF AN ADVERB.¹⁰¹

AN AD'VERB is a part of speech joined to verbs, adjectives, and substantives, to increase or diminish their signification: as, he speaks *well*; they write *badly*.

OF A CONJUNCTION.¹⁰²

A CONJUNC'TION is a part of speech that joins words and sentences together; as, my father *and* mother.

¹⁰⁰ The participle in *-dūs* is very seldom, or perhaps never, used in a sense purely denoting *Futurity*; for, its import is that of *Necessity*, *Duty*, or *Mérit*, rather than that of bare and absolute *Futurity*. Thus, *dī'cō lī'tērās ā mē scriptūm ī'vī*, and *dī'cō lī'tērās ā mē scribēn'dās ēs'sē*, are very different indeed in meaning,—the former signifying, *I say that a letter will be written by me*: but the latter, *I say that a letter must be written by me*, or, *that I am obliged to write a letter*.

¹⁰¹ An adverb, as the name imports, is a part of speech added to a verb to express *Quantity*, *Quality*, *Manner*, *Time*, *Order*, or *Place*. And not only to verbs, but also to nouns, pronouns, participles, and even to other adverbs are these often adjoined. Of adverbs some are derived from substantives, as *pār'tim*, *partly*, *mē'rītō*, *deservedly*:—and some are abbreviations of nouns combined with pronouns or prepositions; as, *hō'dīē*, *to-day*, for *hōc dī'ē*, *on this day*; *ād'mōdūm*, *very*, for *ād mō'dūm*, *unto measure*:—others are derived from adjectives; as, *āltē*, *loftily* or *deeply*, from *āl'tūs*, *high* or *deep*; *brē'vītēr*, *briefly*, from *brē'vīs*, *short*; *vōlēt'ēr*, *willingly*, from *vōl'ēns*, *willing*. These generally admit of comparison, if the adjectives or participles (whence they are derived) can be compared; and their comparative and superlative degrees of comparison are always analogous to those of the adjectives or participles from which they spring: as, *bē'nē*, *well*, *mē'līūs*, *better*, *ōp'timē*, *best*, from *bō'nūs*, *good*; *pōtēn'tēr*, *powerfully*, *pōtēn'tīūs*, *more powerfully*, *pōtētīs'simē*, *most powerfully*, from *pō'tēns*, *able*. In many instances the neuter gender of adjectives or of participles, is usurped adverbially: as, *dūl'cē*, *sweetly*, *plūs*, *more*, *trānsvēr'sā*, *askew* or *leeringly*. And a few adverbs are derived from verbs: as, *scī'licēt*, *namely*, for *scī'ās lī'cēt*, *it is permitted thou know*.

¹⁰² The line of distinction between adverbs and conjunctions is often so indeterminate, that it is difficult in some instances to distinguish between

OF A PREPOSITION.

A PREPOSITION is a part of speech most commonly set before a Noun; ¹⁰³ as, *ān'tě mĕřídĕm*, *before noon-day*; *ā dĕx'trām*, *to or on the right hand*:—or else is joined in composition to Nouns, Verbs, Participles, and Ad'verbs; as, *pĕrār'dūš*, *very arduous*, *prĕ'stĕ*, *I stand before*, or *I excel*, *īndōc'tūs*, *unlearned*, *dĕ'sūpĕr*, *from above*.

These Prepositions have an accusative case after them.

Observe. *Vĕr'sūs* is set after its case; as, *Lōndĭ'nūm vĕr'sūs*, *towards London*.

Likewise *pĕ'nĕs* and *ūs'quĕ* may be so placed.

those two Parts of Speech, and to assign to each its right place. It even not unfrequently happens, indeed, that the same words are at one time *Ad'verbs*, and at another, *Conjunctiōns*; and that words which many grammarians call *Conjunctiōns*, others call *Ad'verbs*.

¹⁰³ I have taken the liberty of enlarging this portion of the E'ton text, because (to me) it appeared to be by much too brief, and at the same time very vaguely worded.

¹⁰⁴ *Cĭ'trā* in the later prose writers has sometimes the signification of *without*, e. g. "*Phĭ'dĭās īn ĕ'bōrĕ lōn'gĕ cĭ'trā ĕ'mūlūm trā'dītūr.*" *Phidias is said to have been quite without rival in carving ivory.*

¹⁰⁵ In composition *ōb* signifies *against*; thus, *pō'nō*, *I set*, *ōppō'nō*, *I set against*.

The Prepositions following have an áblative case:—

Ā, āb, ābs, ¹⁰⁶	from or by,	Pǎlām,	ópenly,
Ābsquē,	withóut,	Prā,	befóre or in front,
Cōrām,	in présence of,		on accóunt of,
Cūm, ¹⁰⁷	with,	Prō, ¹⁰⁹	for, or insteád of,
Dē,	of or concérning,	Sīně,	withóut,
Ē, ēx, ¹⁰⁸	from or out of,	Těnūs,	up to or as far as.

Observe. Těnūs is set áfter its case; as, pōrtā těnūs, *as far as the gate*:—and, in the plúral númer, the noun is cómmonly put in the génitive case: as, aūrīūm těnūs, *up to the ears*.

The Prepositions following serve to both cáses, that is, to the accúsative and álso to the áblative.

Clām, *unknówn to*; as, clām pǎtrēm věl pǎtrě, *unknówn to my fáther, or withóut my fáther's knówledge*.

Īn,¹¹⁰ for *into*, signifying *mótion tówards*, has an accúsative case; as ěō ĩn ūr'bēm, *I go into the cíty*.

Īn, for *in* ónly, or signifying éither *mótion or rest, in a place*, serves to the áblative case; as, ĩn tē spēs ěst, *in thee is my hope*.

Sūb,¹¹¹ *únder*, as, sūb nōctēm, *a líttle befóre níght*: sūb jū'dícě līs ěst, *the strífe or máttér is befóre the júdge*.

¹⁰⁶ *A* is úsed ónly befóre cónsonants; *āb* befóre vówels; *ābs* befóre *e, g,* and *z*.

¹⁰⁷ In cómpositiōn *cūm* is for the most part chánged ínto *cōn-*. as *cōnsīmīlīs*, *véry líke*; *cōnjūn'gō*, *I cōjōin*: but if the word, with whic this prepositiōn is cómposed, begín with the létter *l*, then *cōn-* becómes *cōl-*, as *cōllū'dō*, *I sport with*: or if the word begín with *b, p,* or *m*, then *cōn-* is made *cōm-*, as *cōm'bībō*, *I drink togéther with*, *cōmplō'rō*, *I be-waít togéther with*:—or, if the word begín with a vówel, the fínal cónsonant of the prepositiōn is, in géneral, drópped; as, *cōācēr'vō*, *I amáss togéther with*; *cō'čmō*, *I buy togéther with*: but the verb *ě'dō*, *I eat*, retáins the *m*, as, *cōm'ědō*, *I eat up*.

¹⁰⁸ *E* is préfixed ónly to cónsonants, *ēx* both to cónsonants and vówels.

¹⁰⁹ *Prō* in cómpositiōn úsually ímplies "*fóward* or *fórt*:" as *prōm'včō*, *I move fóward*; *prōdū'cō*, *I lead fórt*. And, here, it shóuld be óbserved, that althóugh, as a mónosyllable, the prepositiōn *prō* be long, yet in cómpositiōn it is fréquently shórt. In some words, índeéd, it seems to be hábitually shórt; in óthers, hábitually long; and in óthers, cómmon.

¹¹⁰ In cómpositiōn with ádjéctives the prepositiōn *ĳn* génerally sígnifies *not*; as *ĳnfír'mūs*, *not strong*, that is, *ĳnfír* or *feéble*; *ĳn'útīlīs*, *not úseful*, that is, *úseless*:—but in cómpositiōn with verbs it úsually retáins íts prímitive méaníng; as, *ĳn'vōlō*, *I fly in*.

OF AN INTERJECTION.

AN Interjéction is a part of speech¹¹³ which betókens a súdden emótion of mind; be it grief, joy, or óther pássion.

THE THREE CONCORDS EXPLAINED.

There are three Cóncords, or Agreements, in Látin:

1. Betweén the nóminative case and the verb.

minishes the significátion of ány símples word with which it is joined: thus, sūbrī'děŏ, *I laugh a little*, or *I smile*:—but in some ínstánces it retáins its orígínel méáning: as sūbscrībŏ, *I write únder* or *I subscribe*.

¹¹² Befóre dísmíssíng the súbjéct of prépositíons it máy be ríght to nóticé, thát there áre four síllábles óften fóund ín cõpõsítíõn wíth wõrds, but wích néver occúr by thémselfs:—these áre cálléd *Inséparáble Prépositíõns*, and áre, ām-, *round ábout*, dī- vèl dīs-, *ásúnder*, rē-, *agáín*, and sē-, *ásíde* or *apárt*: to wích some ádd vē-, *põsítívely nó*, and cōn, *togethé*r, for cūm, *wíth*.

¹¹³ Interjéctíõns exprés cõmpendíously á wóhle sénténcé ín óne wõrd, —represéntíng, ínstántly, to the mínd of á héárer, some súdden emótion of sòul ás respéct the útterer. Á shriek, for exámple, ís á náúrául sòund cõmmõn to áll lánquáges,—and exprésíve of súdden dread:—á groán ís, líkwíse, á náúrául sòund exprésíve of déep súfferíng: á sígh betókens héávíness of héárt, wíthér occásíõned by gríef, or by désíre, or by ánxíety. Yet, ás nó óne of these three cán be regárdéd ás á ártículáte sòund, they dó nó fall (próperly) únder the héád of *Interjéctíõns*, grámmátícly só cálléd: thóugh sévéral of the ácknówledgéd ínterjéctíõns háve véry líttle ártículáte ín thém; thus, 'st, *hush*, hā, hā, hē, *sòunds of láúghíng*.

2. Between the substantive and the adjective.
3. Between the antecedent and the relative.

THE FIRST CONCORD

A VERB agrees with its nominative case in number, and in person.

In order to find out the nominative case, ask the question *who?* or *what?* with the verb; and the word that answers to the question is the nominative case to the verb; as, *who reads? who regards not?*

The máster reads, but ye regard not.
Præcēp'tōr lěgīt, vōs vē'rō nēgl'gītīs.

Sometimes an infinitive mood, or a sentence, is the nominative case to a verb; and sometimes, the substantive to an adjective; and in this event the adjective or the relative must be in the neuter gender: as,

Dilū'cūlō sūr'gērě sālūbēr'řimūm ēst.
To rise betimes in the mórning is most wholesome.
Īn tēm'pōrě vē'nī, quōd ōm'nīūm ēst prīmūm.
I came in seáson, which is the chief thing of all.

Two or more nominative cases singular require a verb plural, which must agree with the nominative case of the most worthy person.

Now, the first person is more worthy than the second, and the second more worthy than the third: as,

Ě'gō ět tū sū'mūs ĩn tū'tō.
I and thou are in sáfety.
Tū ět pā'těr pěrīclītā'mnī.
Thou and thy fáther are in jebpardy.

The substantive which comes next after the verb, and answers unto the question *whom?* or *what?* made by the verb, shall commonly be the accusative case,—except the verb by some particular Rule, require another case after it: as,

Sī cū'pīs plācērě mǎgīs'trō, ū'tērě dilīgēn'tiā.
If you desire to please the máster, use dilígence.

Observe. In this Example, *mǎgīs'trō* is the dative, and *dilīgēn'tiā* the ablative case, according to the Rules of Latin Syntax or The Construction of Latin Grammar.

THE SECOND CONCORD.

When you have an adjective, ask this question, *who* or *what*? with the adjective; and the word which answers to the question shall be the substantive to the adjective.

The adjective, whether it be a noun, pronoun, or participle, agrees with its substantive in gender, number, and case: as,

Āmīcūs cēr'tūs īn rē īncēr'tā cēr'nītūr.

A sure friend is discerned in a doubtful affair.

Observation 1st. The masculine gender is more worthy than the feminine, and the feminine (in things animate,) more worthy than the neuter. But, again, in things without life, the neuter gender is the most worthy: as,

Laūs ēt īmpēriūm quāe pētīis'tī.

The praise and dominion which thou soughest.

And in such event, though the substantives or antecedents be of the masculine or feminine gender, and none of them of the neuter, yet may the adjective, or relative, be put in the neuter gender: as,

Ārcūs ēt cālāmī sūnt bōnā.

The bow and arrows are good.

Ārcūs ēt cālāmī quāe frēgis'tī.

The bow and arrows which thou brokest.

Observation 2nd. Two (or more) substantives singular will have an adjective plural; which adjective shall agree with the substantive of the most worthy gender: as,

Rēx ēt rēgīnā sūnt bēātī.

The king and queen are happy.

Observation 3rd. When, in English, the word "thing" is put with an adjective, you may in Latin leave out the substantive "nēgōtīūm," and put the adjective in the neuter gender: as, mūltā mē īmpēdiē'rūnt, *many things have hindered me.*

THE THIRD CONCORD.

When you have a relative, ask this question, *who*? or *what*? with the verb; and the word that answers unto the question shall be the antecedent to the relative.

The relative agrees with its antecedent in gender, number and person : as,

Vīr sǎpīt quī paūcǎ lŏquītūr.

The man is wise who speaks few words.

Observation 1st. If the relative clearly refer to two antecedents, or to more, then it must be of the plural number :— as, tū mūl'tūm dēr'mīs, ęt sǎpĕ pŏtās, quǎe ām'bŏ sūnt cŏr'pŏrī ĩnīmīcǎ, *thou sleepest much, and drinkest often,*—both which things are injurious to the body.

Observation 2nd. When the English word “that” can be turned into “who” or “which,” it is a relative; otherwise it is a conjunction, expressed in Latin by *quŏd*, or *ut* : and, in making Latin, the conjunction may be put away, by turning the nominative case to the verb into the accusative, and the verb into the infinitive mood : as, gaūdĕŏ quŏd tū bĕnĕ vǎlĕs or gaūdĕŏ tĕ bĕnĕ vǎlĕrĕ, *I am glad that you are well.*

RULES

FOR THE

GENDERS OF NOUNS.

☞ These Rules being in Hexámeter verse, and Látin verse requiring such final síllables as have either a *vowel*, or a *diphthong*, or *m* for terminational léter, to be elided, or at least to be véry spáringly pronounced when the following word begins with a *vowel* or a *diphthong*, all the síllables which, in scánning, are cut off by the figures *Synalæpha* and *Ecthlipsis*, are here printed in a smaller type than the rest of the text. Now respecting final *m* before an initial vowel, or an initial diphthong, it is to be remarked, that the *m* itself is not dropped, but that the vowel before it is silent, or nearly silent; while the final *m* is so pronounced as to seem (to a hearer) to begin the word which follows it. Thus, in the third line below, "*flūvīō'rūm; ūt, Tī'brīs,*" ought to be pronounced as if written "*flū'vīōr; mūt, Tī'brīs.*"

*** In these verses, as was mentioned indeed at the end of the Préface, all short final síllables ending in a consonant are marked long (*by position*) before an initial consonant; but síllables lengthened by *cæsúra* are marked short, with an asterisk after them. And note, a dagger set after any particular short síllable denotes that though the síllable is *short in itself*, yet it is *long by position* in the verse.

Observe. All Rules in verse are best committed to memory by scánning them on the fingers in learning them, and afterwards (for the first week at least) by repeating them in this manner when learned: for thus the toil of learning them is greatly diminished, and the rétention of them will be more lasting.

PROPER NAMES.

I. Masculine.

Prōp'riā quæ mǎ'ribūs trībūn'tūr mās'culā dē'cās :
ūt sūnt Dīvō'rūm; Mārs, Bāc'hūs, Āpō'l'lo: vīrō'rūm;

mēn'sīum; ūt, Ōctō'bēr: vēntōrūm; ūt, Lībs, Nō'tūs, Aūs'tēr.

¹ To the names of rivers might be added those of mountains, as being, for the most part, masculine: such are, *Hē'licōn, Ā'tlās, Pē'līōn, Jū'rā, Cīthæ'rōn*. But to this Rule there are exceptions in regard both of the one and the other: for, the names of several rivers in -*ā*, not increasing in the génitive case, are feminine, conformably to the First Spécial Rule for the Genders of Nouns. Thus, *Ā'l'būlā, the ancient name of the Tiber* *Mā'trōnā, the Marne*, *Sē'quānā, the Seine*, with some others, are feminine: and of mountains, also, many take their gender from the termination: thus *Ā'ē'tnā, Ā'ē'tnæ, mount Æ'tna*, *Ō's'sā, Ō's'sæ, Os'sa*, *Ĉ'ē'tā, Ĉ'ē'tæ, Ā'l'pēs, Ā'l'pīum, the Alps*, are feminine; and *Sōrāc'tē Sōrāc'tīs, mount Soráctē*, neuter.

² The names of some few countries, as Pōn'tūs, a région bordering upon the Euxine sea, are, by their termination, masculine ; in conformity to the *Spécial* rather than to the *Général Rule*.

³ Although the names of most islands be feminine, yet Āl'bīōn, the island of Great Britain, which (like Pē'līōn, mentioned in the first note above) ought, by its termination, to be neuter, is more properly masculine.

⁴ The names of most towns ending in -o, and all plural names of cities in -i, are masculine : as, Hīp'pō, a town of Africa, Philip'pī, a city of Macedonia, Gā'bī, a city of the Volsi, Pārī'sī, Pārīs, the metropolis of France.

⁵ Several other exceptions might be added, particularly of names of the second declension ending in -ōn, as Āb'y'dōn, a city on the Hellespont, but which was more frequently written Āb'y'dōs, of the feminine gender. Some grammarians, however, class all proper names in -ōn, under the head of nouns in -ūm.

⁶ To these masculines add pālū'rūs, buckthorn, rhām'nūs, rheinberry bush, and vē'prēs, a briar ; which, though shrubs rather than trees, come as properly under this Rule, as mūr'tūs, a myrtle, and many others. Cūprēs'sūs, a cypress, lā'rīx, a larch, lō'tūs, the lote-tree, and rū'būs, a bramble, with a few more, are occasionally masculine, and may therefore be said to be of doubtful gender.

⁷ In some animals the difference of sex is not immediately obvious ; neither, indeed, for the general purposes of language, is it necessary to ascertain it. In Latin, the names of animals of this description are called *Nouns E'picene*, of which the gender (like that of the names of

inanimate things) is regulated by the termination. Thus, by the Spécial Rule for the ending, *pās'sēr, a sparrow, cōr'vūs, a raven, cētūs, a whale*, are masculine ; whilst *vūlpēs, a fox, fē'līs, a cat, ā'quīlā, an eagle*, are feminine ; although each includes both the male and female. The names however of several animals, in which the difference of sex is not always instantly apparent, are to be excépted : such, for exámple, as *tāl'pā, a mole, dā'mā, a deer, pēr'dīx, a partridge, līmāx, a snail*, of doubtful gender : *vē'r'mīs, a worm, lē'ō, a lion, mūs, a mouse, dēl'phīn, a dolphin*, masculine : *cā'nīs, a dog or bitch, bōs, a cow or ox, sūs, a hog*, common of two genders, that is, both masculine and feminine.

⁸ Though this Rule holds good in most instances, yet the names of wómen, as *Glycē'rūm. Glycery*, must be excépted :—to these, álso, may be ádded, the names of ships, and of gems.

⁹ As *tīā'rās, a turban or sash for the head ; āc'ī'nācēs, a scýmitar or faulchion*. In Greek, both these nouns are of the first declension ; but in Látin, the former is of the first declension, and the latter of the third.

¹⁰ To these excéptions in -ā, add *nē'pā, a scórpion* ; álso, the proper name *Ā'driā* or *Hā'driā, the Adriatic sea or gulf* : as béing of the masculine gender.

¹¹ In like mánnér must be excépted *cū'cūmīs, a cucumber, mōlā rīs, a mill-stone, ōr'chīs, a sort of herb, álso a fi:h* ; with some óthers.

† The syllables *-ēr* and *-ōs* in this line being in themselves short, although long by position in the verse, I have set a dagger to mark this circumstance, that the learner may not confound them with *-ēr* and *-ōs* of the second Spécial Rule, from which they are quite different in sound. Many, however, make no distinction in the pronunciation between *-ēr* and *ēr*, nor between *-ōs* and *ōs*!

¹² Such as *dĭālĕc'tŭs*, a dialect or manner of speech, *mĕ'thŏdŭs*, a method or mode, *pĕrĭŏdŭs*, a period or perfect sentence.

¹³ Although the scánning of the verse before us requires this *i* to be short, yet final *i*, of the genitive singular of the second declension, is always long. Such examples as *ē* for *ĕ* in the preceding line, *ā* for *á* in the first verse of the First Excéption to the First Spécial Rule, and *ĭ* for *ĭ* here, with many others that might be named, detract greatly from the merits of these Rules.

¹⁴ Al'so, though occurring less frequently, *nĕpĕn'thĕs*, *bŭgloss*; and *pā'nācĕs*, *all-heal*, a sort of herb, are neuter: and several others.

¹⁵ The two nouns, *sĕx'ŭs*, *sex*, and *spĕ'cŭs*, a den or lŭrking-place, are often of the neuter gender: but the former, especially when of the fourth declension, is perhaps more properly masculine; and the latter, (as may be seen in the next excéption) is of doubtful gender, being sometimes masculine, and sometimes feminine, as well as neuter.

¹⁶ To these may be added *cār'bāsŭs*, *cámbric* or *lawn*, also *sail-cloth*, which, in the singular number, is either feminine or masculine; and, in

SECOND SPECIAL RULE.

NOUNS INCREASING WITH THE ACUTE ACCENT ON THE PENULT
 OF THE GENITIVE CASE ARE FEMININE.

1. Nouns Māsculine excépted.

Mās'culā dicūn'tūr mōnōsyl'lābā nō'mīnā quā'dām :
sāl, sōl, rēn, ēt splēn, Cār, Sēr, vīr, vās vā'dīs, ās, mās,
bēs, Crēs, prēs, ēt pēs, glīs glī'rīs hū'bēns gēnītī'vō ;

Phrȳx.¹⁸

Mās'culā sūnt ē'tiām pōlȳsyl'lābā īn -n̄ ; ūt, Ācār'nān,
lī'chēn, ēt dēl'phīn :¹⁹ ēt īn -ō sīgnān'tiā cōr'pūs ;
ūt, lē'ō, cūr'cū'līō : sīc sē'nīō, tēr'nīō, sēr'mō.

the plúral númer, neuter : pālūm'bēs, a *pigeon*, is likewise a noun of doubtful gender ; in Virgil, however, it is feminine, consentingly with the First Spécial Rule.

¹⁷ To this Rule, of course, belong all nouns whereof the penult of the genitive case (increasing) is sharp ; whether the syllable be long or short. Thus rēs, genitive, rē'i, a *thing*, grūs, genitive, grū'is, a *crane*, increase sharp, (although the penult of the genitive be short,) as well as dí'ēs, genitive, dí'ē'i, a *day*, or līs, genitive, lí'tīs, *strife*, which have the penult of the genitive case long.

¹⁸ To these masculines add lār, a *fire-side or household god*, sāl'ār, a *trout*, vōl'vōx, a *worm called a vine frētter*, and some few others.

¹⁹ The words lí'chēn, and dēl'phīn, are (properly speaking) dissyllables, rather than polysyllables ; but by "pōlȳsyl'lābā," in the preceding verse we are to understand *words of more than one syllable*. Hence the Rule applies to such dissyllables as gnō'mōn, the *stīle of a dial*, pē'an, a *song or hymn to Apóllō*, as well as to the trisyllables at'tāgēn, a *snipe*, and Ācār'nān, a *man of Acarnānia*.

²¹ At the same time, too, ōc'cīdēns, the west, is to be excépted as másculine. This word (as well as ō'rīēns) is próperly a présent párticiple ; the súbstantive sōl, the sun, béing understóod.

²² To these might jústly be ádded séveral óther Greek nouns in -ēs, máking -ē'tīs in the génitíve case ; as, hēr'pēs, a cutáneous erúption.

²³ In sē'mīs, (which is a contráction for sē'mīās ; as dō'drāns is, for dě'ēt quā'drāns,) the fínal sýllable is long by crásis. And here it may be seásonably nóted that all the derivatives of ūn'cīā, an ounce, as well as those of ās, a pound, are másculine ; as quīn'cūnx, five óunces, sēp'tūnx, séven óunces.

²⁴ This excéption applfes to díssyllables (as cāl'cūr, a spur), as well as to pólýsýllables próperly so cálled : but sāl'ār, a trout, or young sálmon, (as we remárked in note 18 abóve) is másculine.

²⁶ This excéption extēnds ónly to nouns in -ās, máking -ādis (or -ādōs) in the génitive case : for Greek nouns in -ās máking -ātīs, as *bŭ'cērās, búccērātīs, fēnugreek,* are neúter ; save *ā'nās, a duck,* which is of the common gēnder.

²⁷ To this excéption, of course, belong such words as *pōč'sīs, pōč'sēōs, pōčsy* or *pōčtry,* *mētāmōr'phōsīs, mētāmōrphō'sēōs, a transformátion* :— these, howéver, sómetimes take the Látin inflexion, and have simply -īs, in the génitive ; falling, as to their gēnder, únder the First Spécial Rule.

²⁸ The fólloving, likewise, are féminine : *fŭ'līx, a coot, lāgō'pŭs, the white partridge, lēn'dīx, a mággot, pŏl'ythrix, máidēn'hair, tŏ'mēx, a cord or rope,* and *mēr'gēs, a hándful* : to which some add *bāc'cār, plóughman's-nard,* but this noun is próperly neúter ; sómetimes, howéver, it is wríten *bāc'cārīs* in the nóminative case, and is then féminine.

EXCEPTIONS TO SOME OF THE FOREGOING RULES.

1. Although *dām'nō* and *trāc'tō*, when compounded, generally change the first vowel (*a*) into *e*, yet *prādam'nō*, *I condemn beforehand*, *pētrāc'tō*, *I treat thoroughly*, and *rētrāc'tō*, *I handle again*, are to be excepted.

2. Although *hŭ'běō*, when compounded, generally changes the first vowel (*a*) into *i*, yet *āntēhā'běō*, *I prefer*, and *pōsthā'běō*, *I postpone*, must be excepted.

3. Although *lŭ'vō*, when compounded, generally rejects the first vowel, yet *rě'lāvō*, *I wash again*, retains it.

4. Although the verbs *ē'mō* and *sē'děō*, when compounded, change the first vowel (*e*) of the présent tense into *i*, yet *cŏ'ēmō*, *I buy up*, and *sŭpērsē'děō*, *to omit* or *forbear*, are to be excepted. Lastly, *pēr'āgō* and *sāl'āgō*, compounds of *ā'gō* retaining the first vowel, may be added circŭm'āgō, *I drive about*.

⁴⁰ Here *cāl'věō* must be considered a dissyllable, else the final *o*, being an hypermeter syllable, must suffer elision, before the vowel *e* at the beginning of the next line.

SYNTAXIS:¹

OR THE

CONSTRUCTION OF GRAMMAR.

☞ In the following Rules the short final syllables are marked short, without reference to position; but in the Examples to the Rules, whenever any Example is in verse, all short syllables long by position are marked long, agreeably to the plan which we adopted in the metrical Rules for the gender of nouns, and formation of the præterite and supines of verbs.

** The Examples to the Rules of Construction are here severally printed in Italic, with the exception of the words to which any Rule more particularly refers, those words are in Roman characters to distinguish them from the rest.

¹ Syntax is that part of Grammar which teaches the right construction of words in a sentence, according to certain Rules, but with occasional exceptions. It consists of CONCORD, or the right agreement of words with one another, and of GOVERNMENT, or the due influence and dependence of words on one another.

² There are in Grammar three ConCORDS: *first*, of a verb with its nominative; *second*, of an adjective with its substantive; *third*, of the Relative with its antecedent.

³ The simplest sentence possible consists of a neuter verb and its nominative case, either expressed or understood:—as Dĕ'ūs ēst, *God is*, or *there is a God*; dōr'mĭō, *I sleep*, or, *I am asleep*, understand ě'gō; tŏ'nāt, *it thunders*, understand ĭd, *it*. The sentence which has the next degree of simplicity to the simplest, is that which consists of a transitive verb, with its nominative case, and regimen: as, lŭ'nā rĕ'gĭt mĕn'sēs, *the moon rules the months*. As, however, there is frequently an Ellipsis of the nominative in a sentence, so, also, is there sometimes an ellipsis of the verb: as, Dĭ mĕlĭō'rā, understand dĕnt, *may the Gods award better things*: quŏt hŏ'mĭnĕs, tŏt sĕntĕn'tiā, understand sŭnt āter hŏ'mĭnĕs and again āter tŏt, that is, *as many persons soever as there are in the world, so many different opinions are there*, or, as we say in

rŭm ĕs'sĕ, rāther than dĭx'it quŏd ĭp'sĕ vĕn'rĕt : but if the verb which ought to be in the infinitive mood, ought also to be in the future tense, and it have no future tense of that mood, then *fŏ'rĕ*, *to be about to be*, followed by *ŭt*, *that*, and a subjunctive mood must be used ; as, *he says (that) I shall be able*, *dĭcĭt fŏ'rĕ*, *ŭt pŏs'sĭm*. This construction, too, is sometimes vĕry ĕlegantly emplŏyed, ĕven where the verb which ought to be in the infinitive mood, has the future tense. Occāsiŏnally, likewise, it hāppens, that insteād of the infinitive mood, the subjunctive mood, with the omĭssiŏn of *ŭt*, is pĕferable ; as, *ĭgnŏs'cās, vŏ'lŏ*, *I wish (that) you would be forgiving* : *jŭbĕ'tŏ, cĕr'tĕt Āmŷn'tās, gĭve ŏrders (that) Āmŷntas vie* ; or simply, *bid Āmŷntas contĕnd*.

⁶ Māny exāmples of this sort are undŏubtedly to be met with ; but espĕcially amŏng the pŏets, who were ŏften compĕlled by the meāsŭre of their verse to take a liberty which could hārdly be grānted in prose ; the efficient or real nŏminative, howĕver, that is, the word which (more ĭmmĕdiately) ānswers to the quĕstiŏn made with the verb, ought pĕrŏperly to rĕgulate or dirĕct the pĕrŏn of the verb.

⁷ Nouns of mŭltitude, or, as they are gĕnĕrally stŷled, in En'glish, *Collective Nouns*, are such as, though themsĕlves of the sĭngŭlar nŭmber, have yet a plŭral signĭficiātiŏn :—for exāmple, *pŏ'pŭlŭs, the peŏple*, *vŭl'gŭs, the rābble*, *tŭr'bā, a crowd*, *ĕxĕr'cĭtŭs, an ārmy*, *clās'sis, a fleet*, and the like. Whĕnĕver the ĭdĕā ĭmplĭes a sepārātiŏn ĭntŏ parts, a verb plŭral is pĕferable ; but when therĕ is no divĭsiŏn or sepārātiŏn ĭntŏ parts, the verb should most unquĕstiŏnably be of the sĭngŭlar nŭmber.

⁸ By ĭmpĕrŏnal verbs are meant, such verbs as are nĕver found ĕcept in the third pĕrŏn sĭngŭlar, and which have nĕver āny nŏminative expĕssed in Lātin ; the pĕrŏnŭn *ĭd*, *it*, bĕing upŏn all occāsiŏns undĕrŏŏd. Some pĕrŏnal verbs, howĕver, are now and then āssŭmed ĭmpĕrŏnally : and all nĕŭter verbs in -ŏ may be sĭmĭlarly ŭsed in ĕvĕry tense of the pāssiŭe voice ; sŏmetimes with much ĕlĕgance, and at all times with strict cŏnfŏrmiŭty to the ĭdiŏm of the Lātin tongue.

⁹ There can be no adjective in a sentence, without some substantive (either expressed or understood) agreeing with it. When no substantive is expressed, the adjective is put in the neuter gender, because the subject with which it is supposed to agree is not determined either to be masculine or feminine, and consequently is regarded as neuter. Oftentimes, adjectives agree with substantives not actually expressed, but yet clearly understood : as, āmī'cūs (vīr) *a friendly man, that is, a friend* ; dĕx'trā (mā'nūs), *the right hand* ; rĕ'gīā (dō'mūs), *a royal mansion or king's palace* ; paupĕr (hō'mō), *a poor person* ; prōfūn'dūm vĕl āl'tūm (mā'rĕ), *the deep, that is, the deep sea or ocean* ; fĕrī'nā (cā'rō) *wild flesh, meaning, venison* : with véry mány besides.

¹⁰ The antecedent is sometimes wholly withheld in its own clause of a sentence, and elegantly expressed in the clause of the Relative, and in the same case with the Relative : as, ūrbĕm quām stā'tūō, vĕs'tra ēst, that is, *the city which I build (or am about to erect) is yours*. Sometimes, too, the antecedent is given in both clauses, as, dī'ĕm dī cūnt quō dī'ĕ, *they name or appoint a day, on which day* : sometimes, again the antecedent is entirely suppressed ; thus, vīn'cĕ, quī vīn'cīs, *conquerthou who conquerest* ; understand tū, *thou* : mī'sīt quī cōgnōs'cĕrĕnt, *he sent (persons) who might explore, or, he sent to explore* ; understand mī'lītĕs, *soldiers*, else, ĕplōrātō'rĕs, *scouts* :— and sometimes, again, the Relative is understood ; as, ūrbs āntī'quā fū'it, Tŷ'rī tĕnūĕ'rĕ cōlō'nī,

there was an ancient city (which) Týrian colonists possessed: but in English this omission is much more fréquent than in Látin. Here it is wŏrthy of the nŏtice of leárners that the Rĕlative agrĕes with its antecĕdent in *gĕnder*, *nŭmber*, and *PERSON*, but with that antecĕdent, if found in the same clause of the sĕntence with the Rĕlative itself, the Rĕlative agrĕes in *gĕnder*, *nŭmber*, and *CASE*.

¹¹ The restriction méntioned in note 6, abŏve, is équally ápplicable in the pŕĕsent ĩnstance : for the Rĕlative ought álwáys to agrĕe with the sŭbstantive which is more ĩmmĕdiately and ostĕnsibly its antecĕdent, unlĕss ĩndĕed some véry wĕighty reáson can be ássigned for déviating from this pŕactice.

¹² Here quĭ has, for its antecĕdent, mĕ'i, *of me*, understŏod in the pŏssĕssive ádjĕctive mĕ'ās, *my*, of the pŕecĕding line.

¹³ The *Case* of the Rĕlative álwáys depĕnds upŏn some word in the same clause of the sĕntence with itself, but it takes its *gĕnder*, *nŭmber*, and *pĕrson*, from the sŭbstantive to which it pŕtĭcularly refĕrs, and which is gĕnerally in some fŏrmer clause of the sĕntence. When the Rĕlative is not the nŏmĭnative case to ány verb, it may be víĕwed as a sŭbstantive ráther than an ádjĕctive, as it is gŏvĕrned pŕecĭsely in the same mánner as a sŭbstantive is gŏvĕrned:—if, howĕver, the Rĕlative agrĕes with ány sŭbstantive expŕessed in its own clause of the sĕntence, then it is to all ĩntĕnts an ádjĕctive, and the sŭbstantive with which ĩt agrĕes, dířĕcts its case.

¹⁴ In rendering En'glish into Látin, it not unfréquently háppens that two sŭbſtāntives of dífferent signíficátion come togéther with the sign of betwēen them, wheróf the látter ought not in cōfórmity to the Látin ídïom to be put in the gēnítive case : for ínstānce, whēnēver the látter sŭbſtāntive denótes the *sŭbſtānce* or *matérials* of which the fórmer consists, the Látin ídïom requíres the áblative case précéded by *ē, ēx, or dē, out of or of* ; else, that the sŭbſtāntive of *mátter* be túrned ínto the ádjēctive expréssive of that sort of *mátter*. Thus, the two sŭbſtāntives, *a vase of sílver*, that is, *a sílver vase*, must not be réndered *vās ārgēntī*, but *vās ēx ārgēntō fáctŭm*, or *vās ārgēntēŭm*. In like mánner, óther sŭbſtāntives are occeásionally convérted ínto their ádjēctives : as, *my fáther's house* may be transláted, *dŏmŭs pá'trīs* or *dŏmŭs pātēr'nā*.

¹⁵ The ádjēctives more cŏmmonly úsed in this way are those which relatē to Quántity or Nŭmber ; as, *mŭltŭm, much, plŭs, more, plŭrī-
mŭm, very much or very many, pā'r'vŭm, little, mī'nŭs, less, mī'nīmŭm,
the least thing or pŏrtion, sŭm'mŭm, the very highest pitch, ŭltīmŭm,
the last stage, ēxtrēmŭm, the útmost verge, mē díŭm, the middle dívísion
or pŏint :—with the prŏnouns, hŏc, this, īd, that, quīd, what ; and the
séveral cŏmpounds of quīd, as, ā'līquīd, ánything, nē'quīd, no one thing ;
thus, quīd rē'ī ? what is the máttér ?*

¹⁶ This is an élegant mode of expréssion, provided ónly that the omíssion be cŏnsístent with perspicúity, and that the pŭrport of the spēáker or wrítter, be at ónce (and unambíguously) évidēt : thus īn En'glish we say, *St. Paul's*, méáníng *the Cathédral* of St. Paul : and *St. James's*, méáníng *the Paláce* of St. James, else *the Church* or *Párisĥ*

named after that Saint. So, in Latin, by "*pēr Vārrō'nīs*" was meant "*pēr fūn'dūm Vārrō'nīs,*" *through Vārro's ground or glebe*; likewise, by "*Pōppā'ā Něrō'nīs,*" was meant "*Pōppā'ā Něrō'nīs ūx'ōr,*" *Néro's consort or wife Poppéa*—and so forth.

¹⁷ Of the substantives thus concórding in case, one may be singular, the other plúral; as, *úrbs Āthē'nā,* *the city A'thens,* *fī'līūs,* *děll'cīā mā'trīs,* *a son, the darling of his móther.*

¹⁸ The exámplēs fálling únder this Rule (in so far, at least, as regards the áblative case,) seem to be góverned by some ádjēctive, or preposítion, understóod: thus, *vīr nūllā fīdē,* *a man wíth no prínciple*; understánd *cūm,* *with,* ělse, *prā'dītūs cūm,* *endúed wíth.* In most ínstānces ěíther the gēnítive or áblative may be assúmed índífferently: but, agáín, there are cěrtáín phrāsēs, in wích the gēnítive ís more élegánt thān the áblative; and óthers, in wích the áblative ís dēcmed préferable to the gēnítive:—thus, the Rómāns sáid, "*ēs bō'nō ā'nīmō,*" *be of good cheer, or, of cóurage,* ráther thān "*ēs bō'nī ā'nímī*;" but, "*hō'mō ímī sūbsěl'lī,*" *a pěrsón of the lówest cāste, or rānk,* ráther thān "*hō'mō ímō sūbsěl'lío.*" Cícero hās "*sūmmā spě, sūm'ínā vīrtū'tīs,*" *of the híghest hope, the híghest váLOUR,* in one and the sāmē sěntēnce. howēver, an adjective expressed agrēes with the former of the two substantives, and then the latter is put in the ablative case :—as, vīr prūdēntiā ēxcēllēns, a man excelling in prudence, that is, a man of extraordinary prudence.

¹⁹ To these may be added, adjectives expressive of diligence, perseverance, certainty, patience, engagement, carefulness, guilt, sickness, anxiety, kindness, liberality, prodigality, and several other qualities and affections of the like nature : with their opposites, as, remissness, instability, doubt, impatience, disengagement, negligence, innocence, health, freedom from care, unkindness, parsimony, niggardness : and a host besides.

²⁰ By nouns partitive, and adjectives put partitively, are meant such nouns and adjectives as denote a part, or portion, of any whole. When there are two substantives of different genders, the adjective agrēes with the first rather than the last : as, Īn'dūs flū'mīnūm māk'īmūs, the Īn'dus, greatest of rivers : lēō ānīmā'līūm fōrtīs'simūs, the lion, strongest or bravest of animals.

²⁵ And the adjective *ā'līūs, óther, or, any óther*, is in like mánner followed by an áblative, as óften as the conjúction *quām, than*, is by the figure ellipsis omitted áfter it: as, *pūtās'nē ā'līūm sāpiēntē bēātūm? thinkest thou ány óther than a wise man háppy?* Here we read *ā'līūm sāpiēntē* for *ā'līūm quām sāpiēntēm*. Also an ellipsis of *quām, than*, áfter the ádverb *mā'gīs, more*, in júnction with an adjective or párticiple, may be símilarly followed: as, *ō lū'cē mā'gīs dilēc'tā sōrō'rī, O thou déarer to thy síster (líterally, more belóned) than the líght!*

²⁶ *Quām, than*, is óften úsed (and with pecúliar beauty) betwēen two compáratives:—as, *trīum'phūs clā'rīōr quām grātīōr, a trīum'ph more spléndid than áceptable*. And this conjúction is fréquently understóod áfter some ádverbs of the compárative degré, followed by álmōst ány case, the vócative and (perháps) dátiue excépted. See Conjúnctions. Sómetimes, too, such áblatives as *sō'lītō, than úsual, ā'quō, than ríght, nēcēs'sā'rīō, than nēcēs'sary*, are élegantly understóod áfter compáratives of the neúter gēnder: as, *sī fōr'tē, quíd āp'tiūs ēx'ít, if, perchánce, aught more fit or more to the púrpose (sō'lītō, than úsual) has gone forth: lib'ériūs vív'ēāt, he líved more fréely (ā'quō, than ríght), that is, he líved ráther gáily and profúselý. And here it should be obsérved, that in no ínstance is it nēcēs'sary to omít *quām*, though such omíssion be, on mány ocásions, préferable. It may líkewise be obsérved that when *quām* is exp'ressed, the noun áfter it must be in the same case with the noun befóre it.*

lābour of me, for *lā'bōr mĕ'ūs, my lābour*. Frĕquently, too, the pōĕts,
 and occāsiōnally the prose wĕriters, emplōy the pĕrsonal prōnouns īn the
 dā'tive case, when, strictly spĕāking, possĕssiōn is meānt:—as, *mĭ'hĭ*

²⁹ But sřmetimes, ěven in the best āthřors, we find hęc rěfěrring to the řřrmer, and řl'ě to the lāttěr of two pěrsōns or thřngs befřre mēntřoned. For řřstance, in O'vid :—řic děřs ět vřřgo ěst ; hęc spě ěřl'ěr, řl'ā řřmř'rě, thus the god is, and māřden, he swřřř with hřpě, she with fear.

³⁰ And all verbs of gěsture, that is, verbs betřkēning břdřly āspěct or pōřřōn :—as, řřř, I go ; řcě'dě, I walk ; řě'dě, I sit ; cřř'bř, I lie ; dřř'mř, I sleep ; and māny of the lřke sort : thus, řcě'dě clāř'dřs, I walk lame ; řpřr'tět mř'lřtēm ěcřřbā'rě stān'tēm, it behřves a sřldřer to watch stāndřng. These verbs, hřwěver, are řclřdęd amřng those to whřch the next Part of the Rule āpplřes ; řnly řřstead of an ādjěctive they have sřmetimes a sřbřstantive in āpřōřřōn with them :—as, řcě'dřt řřx, he walks a křng, that is, hřs mānner of wāłkřng is mājěstřc or that of a křng.

³¹ Thřř dātřve "běā'třs" mřght (thřugh not so ělęgantlř) be the āccřsative case "běā'třs," the přřnřn "řl'lřs" bęng ũnderstřōđ befřre "ěs'sě." Thus, in Těrence, we find,—vřřbřs ěx'pědřt ěs'sě břřnās, it řs ěpědřent for you to be good wřmen. And several řřther pāsřages of the same křnd mřght be quřted.

³² An adverb in En'glish is óften expressed (with élegance) by an adjective in Latin, which adjective agrées with the nóminative case to the verb,—as in the two Exámplēs gíven with this Part of the Rule, in the E'ton text. To these a múltítude of óther Exámplēs might be added :—but we shall contént óursélves with the few fólloving : tā'cēō mŭl'tŭs, *I hold my peace much* : lŏ'quŏr frē'quēns, *I speak often* ; scrībŏ epī'stŏlās rārīs'simŭs, *I write lētters véry séldom* ; in which the use of an adjective (for an adverb) is altogéther at vāriance with óur ídiom. But we réconcile óursélves (eásily énough) to an adjective in the nóminative case áfter ány tránsitive verb, (when such adjective agrées with the nóminative case to the verb,) as óften as the En'glish párticiple “*béing*” can make péflect sense, when pláced betwéén the nóminative case to the verb, and the adjective which fóllovs : thus, nē assŭēs'cās bī'bērě vī'nŭm jējŭ'nŭs, *do not accústom (yoursélf) to drink wine fásting*, that is, *you béing hŭngry*. In mány ínstānces of this sort an adverb in Látin, and an adjective in En'glish, wóuld be prepósterous,—becáuse cōntrary to the úsage of the two lānguages, réspéctively.

³³ Whénéver *sŭm* is fólloved by a gěnitive, that gěnitive is álwáys gŏverned by some súbstantive understŏod : thus, hāc vēs'tīs ēst pā'trīs, *this gárment is fáther's*, that is, hāc vēs'tīs ēst vēs'tīs mē'i pā'trīs, *this gárment is the gárment of my fáther* :—hence the séveral Exámplēs gíven únder this Rule bēlong móre pŏpérly to the Rule “*Quŭm dúo súbstantíva díversæ sīgníficatíŏnis concŭrrunt, &c.*” and párticularly to that part of it “*Pŏnítur ínterdŭm gěnítívus tántŭm, &c.*”

³⁴ Not ónly in the néuter gěnder, but álso in the másculine and fémīnīne gěnders, are these pŏsséssive pŏnouns úsed :—thus, hīc cŏ'dēx ēst mē'ŭs, *this book is míne* ; ī'l'ā dŏ'mŭs ě'rāt tŭ'ā, *that house was thīne* ;—yet the dátive of the pŏmítive is, in most ínstānces, móre élegant : as, hīc cŏ'dēx ēst mē'hī, *this book is to mé* : ī'l'ā dŏ'mŭs ě'rāt tŭ'bī, *that house was to thee or was thīne*.

³⁷ Accórding to the more áncient mode of writing, *pŭtīŕ*, and in like mánnér *fŭn'gŕ*, and *ŭ'tŕ*, had an accúsative case :—but in láter áuthors all these verbs gŏvern an áblative ; ónly *pŭtīŕ* admīts likewise of the gēnitive.

³⁸ The dátive case of the *Pérsón*, or *Thing*, to which a verb points ; or for which ány áction is éither done, or intēded ; or by which some ácquisítion is made, or loss sustáined,—is émployed áfter ány verb so póinting, or denŏting the *áction*, *áccquisítion*, or *loss*.—whéther such verb be tránstitive or íntransitive, áctive or pássive. When the verb is tránstitive, the noun, which is the immédiate óbject of the verb, must be in the accúsative ; while the noun, to which the súbject of the verb refers, must be in the dátive :—thus, *tā'līā mŭ'tā jā'cě vēr'bā fávil'lā*, *throw such words as these to the dumb émbers* ; *cŭ'rā mī'hī hŭnc lī'brŭm*, *take care of this book for me* ; *dŏcēbŏ tī'bī gnā'tŭm*, *I will teach thy son for thee*. Hence may álmost ány verb whátéver admít a dátive case áfter it. Sŏmetimes there is in a séntence, an ellípsis of the *óbject* áfter a tránstitive verb,—that is an ellípsis of the accúsative case ; whilst the noun, to which the verb points, is éxpressed in the dátive case :—for éxámple, *tī'měŏ tī'bī*, *I fear for thee* ; understánd *pě'rīcŭlŭm*, *dánger*, else á'liquīd má'lī, *sŏmething of ill* : whéreas “ *tī'měŏ tē* ” wŏuld signífy “ *I fear thee*,” or, in óther words, “ *I am afraid of thee*.” And here it may be nóted that the póets, by a Greek ídiom, óften use a dátive case áfter verbs both of the áctive and pássive voice, insteád of an áblative with a préposition :—as, *tī'bī cēr'tět*, *he can vie with thee*, for *tě'cŭm cēr'tět* ; ágáin, *tŭr'bā mīx'tŭs ĩnēr'tī*, *míngled with the listless crowd*, for *cŭm tŭr'bā mīx'tŭs ĩnēr'tě* ; or, *hęc mī'hī ōblī'tā sŭnt*, *these things are forgŏtten to me*, for *ā mē ōblī'tā*, *forgŏtten by me*.

⁴⁶ These are chiefly verbs compounded with the preposition *prae*, before, or *ante*, before : many of which compounds take an accusative in preference to a dative, especially where a dative case may be understood after the immediate object expressed with the verb ; or where the regimen of the simple verb is the accusative case : others, again, take an accusative or a dative indifferently ; and others, a dative only. Verbs compounded with the rest of the prepositions mentioned, frequently have the same preposition (or one of like meaning) set before the substantive which follows the verb : and sometimes, if the preposition govern an accusative case, the substantive is put in the accusative case, with an omission of the preposition, — being governed either by the preposition understood, or by that in composition with the verb.

⁴⁷ This is a prevailing idiom of the Latin language, borrowed (originally) from the Greek ; and is much more elegant than the use of the verb *habere*. In fact it would be almost a barbarism to say, *habere domum patrem, habere injus'tam novercam* ! Here, then, we may observe, that the word which seems (in English) to be the nominative case, is actually the dative in Latin ; while the word which to us is the accusative, is, in the idiom of that language, the nominative. It therefore follows by analogy, that if the word which, with us, is the nominative, be converted into the accusative (in Latin) by the omission of the conjunction "that," which answers in Latin to "quod or ut," then the verb *Est* must be in the infinitive mood ; but still followed by a dative of the word which, in our idiom, is the nominative : as, *I know thou hast not money*, *scio tibi non esse argenti* ; literally, *I know money not to be unto thee*. In like manner is *desunt*, *it is wanting*, (followed by a dative,) very appropriately used for *careo*, *I want* : — thus, for example, *plurima mihi desunt, very many things are wanting to me* or *I want very many things*. In the third person, both singular and plural of all the tenses and moods, are these verbs thus usurped and with elegance as it respects the Latin tongue.

⁴⁸ Particularly when there is in the sense of the expression something more or less, of the meaning of the verbs ăf'fĕrŏ, *I bring*, dŭ'cŏ, *I esteem* or *reckon*, trĭ'bŭŏ, *I give* or *ascribe*, vĕr'tŏ, *I turn* or *impute*, and a few others of similar import ; for besides the dative of the person there is often a dative of the *result* or *effect* ; or of the *light* in which the object is regarded ; or of the *design* with which a thing is done, or of the *purpose* for which it is intended. To this Rule belong such phrases as the following :—dĕ'dĭt mĭhĭ dŏ'nŏ, *he gave it me a present* : rĕlĭ'quĭt tĭbĭ pĭg'nŏrĭ, *he left it to thee a pledge* : ĭs rĕ'gĭ dĭc'tŏ aŭ'dĭĕns nŏn ę'răt, *he was not heáring (that is, obédient) to the king's command*, literally, *to the saying to the king* : ęst ę'ĭ nŏ'mĕn ĭŭ'lŏ, *the name Iulus is to him*, i. e. *he has the name Iulus*.

⁴⁹ By *Verbs Transitive* we must understand all verbs which have a strictly active signification, that is, which express an action passing on to some person, or thing, as the direct and immediate object of the verb.

accusatives, namely, one of the *Person*, and one of the *Admonition*, yet sometimes (and even elegantly) after the latter, the thing which is the *subject of admonition* is expressed in the genitive case ; or in the ablative with the preposition *dē*, of or concerning :—as, ādmō'nēō tē ōffī'cīī. *I remind you of your duty* ; dē hāc rē tē sē'pīūs ādmō'nūī, *I have often and often warned you of this circumstance*. Again, Verbs of *Asking* sometimes change the accusative of the *person* into an ablative with a preposition :—as, hōc ā tē pētō, *this I ask of thee* :—and several Verbs of *Interrogating* retain the accusative of the *Person*,—but change the accusative of the *Thing* into the ablative with the preposition *dē*.

⁵¹ Verbs of *Clóthing* have more commonly, instead of two accusatives, the accusative of the *person*, and the ablative of the *vesture* without a preposition : as vēs'tit sē pūr'pūrā, *he arrays himself in purple* : also, the two verbs ĩn'dūō, *I put on*, and ēx'ūō, *I put off*, have not unfrequently the *vesture* in the accusative, and the *person* in the dative : as, thōrā-cēm s'ībī ĩn'dūit, *he put upon himself his corslet or breast-plate*.

⁵² The verb *cē'lō* is oftentimes followed by the dative of the *person* and the accusative of the *thing* : else, by the accusative of the *person*, and the ablative of the *thing* governed by the preposition *dē*.

⁵³ A preposition is, very frequently, expressed with nouns signifying either the *Cause* or the *Manner*, as, prā gaū'diō, *for joy*, cūm sūm'mō lābō'rē, *with the greatest labour* ; or if the preposition govern an accusative case, the noun is put, accordingly, in the accusative ; as, prōp'tēr āmō'rēm, *for love*, ōb cūl'pām, *for the fault*, pēr dē'dēcūs, *with disgrace* :—but with the *Instrument*, a preposition is never used : for we cannot say scrībō cūm cālāmō, but scrībō cālāmō, *I write with a pen* ; neither can we say cūm ōcūlīs vīdēō, but ōcūlīs vīdēō, *I see with my eyes*. Yet with the *Instrument* as a *Concomitant* the preposition is generally expressed ; as, ĩngrēs'sūs ēst cūm glā'diō, *he entered with a sword*, that is, *having a sword about him, or in his hand*.

thus, mū'tō gālěām tō'gā, *I change a helmet with or for a gown*; and it is remarkable that mū'tō signifies either to give or receive in exchange: as, mū'tāt ū'vām strī'gīlī, "*he receives grapes in exchange for a scraper.*"—Hor.; mē dīg'nōr hōnō'rē, *I deem myself worthy of honour*. Hence they cannot (in strictness,) be said to be joined to an āblative; but, to requirē an accūsative fōllowed by an āblative. As well, indeéd, might the verbs dō'nō, *I present or I gift*, mū'nērō, *I reward*, and séveral others of the like sort, be said to be joined to an āblative, becāuse, like mū'tō, they have an accūsative of the pērsōn, fōllowed (in géneral) by an āblative of the thīng. Gaū'dēō, *I delight in*, and nī'tōr, *I lean on*, have an āblative ónly. And to these might be added a few more.

⁵⁷ The āblative case is tāken *absolutely or independently*, when the sense of the súbstantive is insulated (as it were) in the séntence: for if the súbstantive (thus tāken or assumed) have ány word in the séntence wherebý it can be góverned, or ány verb to which it can be the nóminative, then (of course) the āblative case ought not to be úsed. For exámple, *the king háving spóken these words went awáy*, rēx, hāc lōcū'tūs, discēs'sīt: here the accūsative hāc is góverned by the párticiple lōcū'tūs, and the noun understóod with it is not assumed ābsolutely: but agáin, *the king, these words háving been said, went awáy*, rēx, hīs dic'tīs, discēs'sīt; here hīs is the āblative ābsolute. When no párticiple is ex-présed with the āblative ābsolute, then exístēn'tē or exístēn'tībūs, *being*, is álways understóod:—as, mē pū'ērō, *me a boy*, that is, *when I was a boy*, or mē exístēn'tē pū'ērō, *I béing a boy*: Dī'īs invī'tīs, *the Gods béing unwilling*,—understánd, exístēn'tībūs.

Prĭvā'bĕrĭs māgĭstrā'tŭ.

⁵⁸ The use of the dative, instead of the ablative with a preposition, is by a Greek idiom, and occurs oftener (perhaps) in poetry than in prose. And sometimes, with the ablative of the agent, the preposition is omitted after passive verbs: as, *scrĭbĕ'rĭs Vā'rĭō, you will be described by Varius*.

⁵⁹ The meaning of this Rule appears to be, that if with the active voice two cases (neither of which is governed by a preposition) be employed, the latter of those cases may be put after the passive voice. Thus, *dōcĕō tĕ grām mā'tĭcām, I teach thee grām mā'tĭcām, tŭ dōcē'rĭs grām mā'tĭcām, thou art taught grām mā'tĭcām: rōgō tĕ sĕntĕn'tĭām, I ask thee thy opinion, rōgā'rĭs sĕntĕn'tĭām, thou art asked thy opinion: āccĭn'gō mē ěn'sĕm, I begird me with my sword, āccĭn'gōr ěn'sĕm, I am begird (as to) my sword: ō'nĕrō nā'vĕm āŭ'rō, I freight the ship with gold, nā'vĭs ōnĕrā'tŭr āŭ'rō, the ship is freighted with gold: lĕ'vō tĕ fās'cĕ, I lighten thee of a bundle, tŭ lĕvā'rĭs fās'cĕ, thou art lightened of a bundle.*

⁶⁶ Towns in -ē of the first declension have usually in ūr'bĕ set before them : as, ĩn ūr'bĕ Mĭtŭlĕ'nĕs, *in the city of Mitylĕnĕ*. Sometimes, too, a preposition is put before the name of a town, as ĩn Rō'mā, *in Rome*, ād vĕl ā'pŭd Rō'mām, *beside or near Rome*. Both these expressions, however, are different in meaning from *Rō'māe*, which signifies "*at Rome*." The names of countries and islands are oftentimes (especially by the poets) used like the names of towns, as Cŭ'prĭ, *at Cyprus* ; but this is by ellipsis of the words " ĩn rĕgĭō'nĕ vĕl ĩn ĩn'sŭlā, *in the district or island*."

⁶⁷ Not only the names of towns, but (by poetic licence) those of nations and countries, and sometimes even common nouns, are used in the accusative case without a preposition, after verbs signifying "*mō'tĭōn to or tōwards*:" as, ĭ'bŭnŭs Āf'rōs, *we shall go to the Africans* ; spĕ-lŭn'cām ĕān'dĕm dĕvĕ'nĭŭnt, *they come to the same grot*. The poets also occasionally employ the dative for the accusative : as, ĭt clāmōr cĕ'lō, *the clamour goes to heaven*, meaning, *the vociferations rise to the skies*. When motion through a *Place* is signified, the preposition *pĕr* is necessary :—as, ĭ'tĕr fĕ'cĭt pĕr Lōndĭ'nŭm : ĕt Cān'tĭŭm, *he made a journey through London and Kent*.

⁷⁴ *Dŭm*, whenever it signifies “*whilst or until*,” is joined to the indicative mood : in like manner *cŭm*, when it signifies “*when*,” and *dŏ'nĕc* in the sense of “*so long*,” are followed by the indicative :—but when *cŭm* is used for “*since*,” and *dŏ'nĕc* for “*until*,” the subjunctive mood is necessary. *Lĭ'cĕt, although, ŷ'tĭnām, I wish, dŭm'mŏdŏ, provided—that*, and a few others of like import, have more commonly the subjunctive mood after them. *Nĕ*, the adverb of forbidding, takes either the imperative or subjunctive mood ; but *nĕ, lest*, takes the subjunctive only : thus, *nĕ tĭ'mĕ vĕl nĕ tĭ'mĕās, do not fear* ; *cā'vĕ nĕ fā'cĭās, take care lest thou do*, that is, *take care thou do not* : but there is often an ellipsis of the word *nĕ*. And here it should be noticed, that after verbs of fearing, *nĕ* always means “*lest*,” and implies a partial want of negation, whilst *ŭt, that*, has an acceptation the very reverse :—thus, *tĭ'mĕŏ nĕ fā'cĭāt, I fear lest he do it*, that is, *I am afraid he will do it* : *tĭ'mĕŏ ŭt fā'cĭāt, I fear that he may do it*, that is, *I am afraid that he will not do it*.

But the same words, when emplŏyēd in a *restrīcted* or *pŏsītive sense*, will have the indicātive mood. And here it may be remarked that the conjūctions, aŭ'tēm, *but, vērō, but, ē'nīm, for, quŏ'quē, ālso,* and the ādverb quī'dēm, *indeēd,* cānnot stand first in a sēntēncē : and that ē'tēnīm, *for, sēd, but, ē'r'gō, thērefore, i'gītŭr, for this or that reāson, i'tāquē, thērefore,* and sēveral ōthers, are sŏmetimes the first word, and sŏmetimes the sēcond or third. ⁸⁰ Interjections being nothing more than ejaculative particles of Joy, Surprise, Sorrow, or some other sudden emotion of mind, they can have neither concord nor government : and, therefore, the cases wherewith they are joined, or wherebŷ they are followed, ālwāys depēnd on some ōther word, or phrase understood. In some instances the import of an interjection approaches clōsely to that of a verb, and in ōthers to that of a noun ; hence, we may, in those instances, view the interjection in the light of a substitute for the verb or noun which it approaches in meaning : thus, for exāple, in the phrase, Ō mē mī'sērŭm, *O wretched me*, the interjection Ō seems to convēy the sense of sēn'tiō, *I feel* or *I perceive* :—again, in the phrase, hēm āstŭ'tiās, *hah ! the craft*, the interjection hēm is ālmost synŏnymous with, vī'dēōr mī'hīmēt mīrārī, *I seem to myself to admire* :—so heī and vā have generally a significātion bŏrdering on that of mā'lŭm, *evil* or *mischief* ; hence, heī mī'hī or vā mī'hī may be regarded as equīvalent to mā'lŭm est mī'hī, *it is an evil* or *a calamity to me*.

¹ Since the E'ton Grammar treats of no more than two different sorts of Verse, nāmely, *Herōic* and *Elegiac*, it was not nĕcĕssary to mĕntion āny ōther feet than those of which these two sorts consist,—that is *Spōndees* and *Dāctyles*. Of late years, howĕver, Prōsody and Versificātion have desĕrvedly becōme ōbjects of grĕater āttĕntion ĩn most of the Grāmmar Schools of this ěmpire; and, thĕrĕfore, it is rĕquisitē to nōtice a few more (at least) of the *Mĕtrical Feet*, and a few more Spĕcies of Lātin Verse; but it is (of course) ōnly a few of each which we can nōtice, as our lĭmits are so confĭned. off : still, however, a shadow or faint sound of the vowel or diphthong remains :—thus, *tō'gā ēt* would in poetry be pronounced *tō'ga ēt*, and not *tōjet* ! I speak of modern pronunciation ; for the Latins sounded *g* hard before every vowel.

Sometimes the figure *Synalépha* is (intentionally) neglected by the Latin poets in imitation of the Greeks, who, fond of the vowel sounds, very frequently considered the omission of this figure to be a great embellishment to their poetry : sometimes, likewise, in imitation of the practice of the same people, a long vowel, or a diphthong, at the end of a word, is shortened in Latin, instead of being elided, before an initial vowel or diphthong : thus, in the 437 verse of the first Book of the *Georgics* [*Glaū'cō, ēt Pānōpē'āē, ēt Inō'ō Mēlicū'tāē*] the *ō* in *Glaū'cō* is neither elided nor made short before the initial vowel which follows, whilst the diphthong (*āē*) at the end of *Pānōpē'āē*, is shortened but not cut off.—A judicious neglect, or only partial admission, of this figure has certainly a beautiful effect. But here we must observe, that in Latin poetry a short vowel is very rarely exempted from *synalépha*. At the end of a verse, *synalépha* never takes place unless the last syllable of the verse be hypermeter or over measure.

⁴ And similarly the five interjections *āh, vā, vāh, heī, prōh*, are seldom or never either elided or shortened. But *O* is, sometimes, made short before an initial vowel or diphthong.

⁵ In the earlier Latin poets, the figure *Echthipsis* was sometimes neglected : few examples however of this neglect are to be found in the writings of the Augustan age,—and, after that period, none. Virgil furnishes not a single instance, neither does Ovid : and Horace has only one. At the end of a verse *Echthipsis* never takes place before a vowel or diphthong beginning the next line, unless the final syllable be hypermeter : yet in *Anapæstics*, and *Iónics à minore*, wherein the final syllable is affected by the figure *Synaphéia*, care must be taken that no verse (of exactly its proper number of syllables) end in *m* when the next verse begins with a vowel or a diphthong.

⁶ By *Synéresis* two syllables are reduced to one in the pronunciation, without the disappearance of any letter in the writing :—thus,

Hexámeter, &c. Not unfrequently, too, a verse borrows its appellation from the name of its inventor, as the *Alcáic*, the *Sápphic*, the *Anacreóntic*; else from the subject which it celebrates, as the *Heróic* or *Elegiac*.

A verse wanting one syllable, at the end, to complete the measure is called *Cataléctic*: a verse deficient by two syllables at the end, *Brachycataléctic*: a verse wanting one syllable at the beginning, *Acéphalous*: a verse having neither deficiency nor redundancy, *Acataléctic*: and a verse having a redundant syllable or a redundant foot at the end, *Hypercataléctic* or *Hypérmeter*.

⁹ The *Heróic* (or *Dáctylic Hexámeter*) Verse consists of six feet; whereof the fifth is generally a dactyle, and the sixth a spondee:—the other feet, that is, the first, second, third, and fourth, may be either spondees, or dactyles, at pleasure. In *Dáctylic Hexámeter* verses the feet ought to run into one another; for when the words and the feet end together throughout a verse, there is no harmony whatever. If after the first, and also the second, and (in like manner) the third foot, or after a majority of these three, a syllable remain, the rhythm is, by far, more agreeable than when there is an absence of one or more of these cesúral syllables.

¹⁰ A spondee seldom constitutes the fifth foot of an heroic verse except in solemn, or majestic, or mournful descriptions. Verses, which have a spondee in the fifth place, are called *Spondáic*; but of these the too frequent recurrence is the farthest from an ornament to poetry,—whereas a spare and a judicious use of them is one of its greatest beauties.

¹¹ The sense of these words is in some degree ambiguous:—for, it is assuredly untrue that the last syllable of every verse is common, and yet it is true that, in many kinds of verse, the last syllable may be either long, or short, at pleasure, without much injury in the one instance, or advantage in the other, to the rhythm. For example, the last foot of every heroic verse ought to be a spondee; but a trochee may be substituted for a spondee, because the métrical pause at the end of the line compensates, in some measure, for the shortness of the last syllable: in like manner a pyrrhic is unobjectionable in lieu of an iambus in the last foot of any iambic verse. Again, every sapphic verse should terminate with a trochee, but, instead of a trochee, a spondee may be used without detriment to the rhythm.

*Rēs ēst | sōllī'cī|tī | plē'nā tī | mō'rīs ā | mōr.*¹³ Ovid.

¹² The *Elegiac* or (*Dactylic Pentámeter*) Verse consists (as its name indicates) of five feet, of which the first two may be either *dactyles* or *spóndees*, followed by a *long syllable*, which must close a word, dividing the verse into equal portions or halves; then come *two dactyles*, and again a *syllable*, which with the *cæsúral syllable* before mentioned constitutes an intercepted *spóndee*. The ancients were divided in their opinion respecting the true scansion of this verse,—some of them making the *third foot a spóndee*, and the *last two feet, anapæsts*. Whichever be the mode of scanning adopted, the construction of the verse is the same. Instead of a syllable long by usage or by position, we sometimes find a syllable lengthened by *cæsúra* in the middle of a Pentámeter, but this is always a blemish:—a monosyllable, however, either long in itself, else rendered long by position, is unobjectionable in the conclusion of the first hémistich. An elegiac verse is generally preceded by, and coupled with, an hexámeter; and should terminate with a *dissyllable*, and a *full stop*: a trisyllable is admissible, but a monosyllable must be rejected in the conclusion of a Pentámeter, unless it occasions the elision of the final syllable of a dissyllable. A word of four syllables is not an unharmonious ending, though inferior in cadence to a dissyllable. The feet of an elegiac verse ought to run into one another like those of heroics.

¹³ In addition to the observations which we have already made on *Heroic* and *Elegiac* Verse, we shall (briefly) notice a few of the following: *Iámhic*, *Trochæic*, *Anapæstic*, *Iónic*, and the more common sorts of *Lýric Verse*.

1. *Iámhics*.

An *Iámhic* Verse, when pure, consists of *iámбусes* only, two feet always constituting a measure. The concluding syllable of every measure (the last perhaps excepted) receives on it an emphasis or a *metrical ictus*,—and ought therefore to be either an accented syllable, else a final syllable. *Iámhic* verse is found of various lengths, from the *tetrámeter* down to the *dímeter cataléctic*, called also *Anacreóntic*: but the more common lengths are the *dímeter* or *trímeter acataléctic*. Instead of an *iámбус* in the odd places, a *spóndee* was at first admitted; and, afterwards, an *anapæst* or a *dactyle*: and in all the even places (except the last) a *tríbrach* often occurs for an *iámбус*. The comic poets, however, and *Phádrus*, admit all these feet indiscriminately into every place except the last, and moreover any feet isochronal with these: nor do they reject the *amphímacer*, the *amphíbrach*, and some others.

2. *Trochæics*.

As an *iámбус* is the very reverse of a *tróchee*, so *Trochæic* Verses are the very reverse of *Iámhic* Verses: for, if the first half foot of a pure

iámhic verse be táken from the beginning, and pláced at the end, the Iámhic is converted into a Trocháic. Or, in óther words, a Trocháic Verse, when pure, has évery foot a tróchee: impúre or míxed Trocháics admít spóndees, dáctyles, tríbrachs, and perhápš ánapæsts (though more rárely) in all the éven pláces.

3. *Anapæstics.*

An *Anapæstic* Verse is either *pure*, or *impúre*; that is, it consists sóley of *ánapæsts*, or is made up in whole or in part of óther feet. As in *Iámhic* and *Trocháic* Verses, so in *Anapæstics*, two feet cōstitute a meásure: but here évery meásure ought (if pŏssible) to térmínate togéther with a word, so that the vĕrses may at pleásure be written of ány length from the monómeter úpwards, without the dívisiŏn of a word. Anapæstic dímers are (as the name impŏrts) vĕrses of two meásures each; but they véry rárely occŭr pure, spóndees béing admíssible ĩnto évery place, and dáctyles ĩnto the first foot (sómetimes, though séldom, ĩnto the sécond) of évery meásure. Hence it óften háppens, that, in anapæstic vĕrses, not one foot of the verse is an ánapæst. The final síllable of each acataléctic verse must have respéct to the ínítial síllable of the next line, as the vĕrses are línked togéther by the figure called *Synaphéia*. An *Anapæstic Dímeter Cataléctic* is fréquently subjoined to a sýstem of *Anapæstics*, by way of cŏnclúsiŏn,—or else of témporáry relíef to the ear; and admítš a spóndee ĩnto the first and álsŏ sécond foot, but has génerally the third foot pure, with a cæsúral síllable óver.

4. *Iónics.*

An *Iónic* Verse à *mājŏrĕ* consists whŏlly (when pure) of *májor iónic* feet: and, in líke mánner, an *Iónic* Verse à *mĭnŏrĕ* consists éntírely (when pure) of *mínor iónic* feet. The more úsual length of the first spécies is three meásures and a half, each foot cŏúnting for a meásure. A dóuble tróchee is admíssible ĩnto the sécond and third pláces, and sómetimes ĩnto the first. Moreóver, a long síllable may be resŏlved ĩnto two short síllables in ány one of the meásures. The *Iónic à mĭnŏrĕ* is perhápš never found impúre, and consists génerally of four meásures, such, that without éither a dívisiŏn of ány word, or a cláshing of ány síllables, the verse may be shŏrtened to a monómeter, or éxténded *ad líbitum*.

5. *Lýrics.*

Lýric Verses are those which were sung to the músic of the lyre, and occŭr of váriŏus lengths and cŏnstrúctiŏn, béing sómetimes pŏrtiŏns of one or more of the spécies alréády énumérated, and sómetimes a partícular arrángement of feet accŏrdíng to the fáncy of the cŏmpŏser. Here we shall nóticé ónly the fŏllŏwing féw.

and two tróchees : in all, eleven syllables. With the fifth half foot a word must terminate, otherwise the verse is faulty. A Sapphic Stánza generally contains three sapphic verses followed by an *Adonic*, that is, a dactyle, and a spondee or tróchee.

II. *The Phaléucian or Hendecasyllabus*, which is (likewise) a verse of five feet, and, as its name imports, comprises (in all) eleven syllables. The first foot is a spondee, sometimes, but véry rarely, an iámbus, or a tróchee : the second, a dactyle,—for which a spondee may occasionally be substituted : and the remaining three feet are tróchees.

III. *The Alcáic májor*, which is a verse of four feet, with a long cæsural syllable after the second foot, which must always be an iámbus : the first foot may be either an iámbus, or a spondee ; and the last two feet are dactyles.

IV. *The Alcáic mínor*, which consists of two dactyles followed by two tróchees. The *Cármén Horatiánum* (so called after Hórace who employed it in a great mány of his Odes) has two *májor Alcáics* for the first two verses of the stánza, and an *Alcáic mínor* always for the fourth.

V. *The Asclépiad or Choriámbic Dímeter Intérposite*, which is made up of two choriám buses interposed between a spondee and an iámbus or pyrrihic. Each choriámbus should terminate with the termination of a word :—unless the first choriámbus (at least) terminate in this way, the verse is faulty.

VI. *The Archilóchian Iámbic Dímeter Hypérmeter*, which contains four feet and a half : these are sometimes (though rarely) all iám buses : more commonly the first and third feet are spondees. This verse constitutes the third of the stánza called *Cármén Horatiánum*.

VII. *The Archilóchian Trocháic Heptámeter*, which always consists of the first four feet of a dactylic hexámeter, followed by three tróchees.

VIII. *The Choriámbic Trímeter Intérposite*, which is made up of three choriám buses interposed between a spondee and an iámbus or pyrrihic,—with the same restriction as the *Asclépiad*.

IX. *The Glycónic*, which consists of a spondee and two dactyles.

X. *The Pherecrátic*, which also contains three feet, namely a dactyle between two spondees.

XI. *The Dactylic Tetrámeter à pōstērĩō'rē*, which consists of the last four feet of a dactylic hexámeter.

XII. *The Dactylic Trímeter Cataléctic*, which consists of two dactyles and a cæsural syllable.—This verse is most commonly subjoined to a dactylic hexámeter.

XIII. *The Scazóntic*, which differs from a trímeter iámbic verse simply in that it has a spondee in the last place, and an iámbus in the fifth.

¹⁴ This example is by no means proof that a short vowel is ever lengthened by position before two consonants beginning the next word : yet might several examples corroborative of such fact be quoted from the poets. It is to be remembered, however, that a mute and liquid beginning any word can, in no wise, lengthen a preceding short vowel :—and hence it follows, that the first consonant must necessarily be the letter *s*.

¹⁵ In Plautus and in Terence the first syllable of *fĭ'ērī* and of *fĭ'ērēt* is repeatedly found long.

¹⁶ And in like manner the first syllable of *ě'heū*, *alas!* and of *ĭ'ō*, *hurráh!* are common. To which may be added the proper name *ĭ'ō*, daughter of *ĭ'nachus*.

¹⁷ In véry mány Greek words, but espécially proper names, a vowel is long though immediately followed by a vowel : and in the Ionic dialect the penult of the *génitive* and *accúsative* cases of nouns in *-eūs* is long, althóugh short in the cōmmon díalect.

²¹ Though the penult of *stā'tŭm* is short, yet the first syllable of the future participle *stātŭ'rŭs* is long.

²² In many schools an objectionable practice prevails, in respect of the pronunciation of final *a* :—I mean, the indiscriminate utterance of it to rhyme with *day*. As no person of any taste ever says *Jamaicay* or *Americay*, so ought no person to say *Mŭ'sāy*, when he means *Mŭ'sŭ*. Final *a* when short, should always rhyme with the final syllable of the English proper names *Mārtha* and *Mārĭa* : final *a*, when long, may rhyme (according to the English sound of the vowels) with *day*.

²³ Of course when a diphthong precedes any of these mutes, as in *haud*, *not*, or in *aŭt*, *or*, the syllable is long by the Rule, “*Om'nis diphthongus apud Latīnos lōnga est* :” and when a consonant precedes,—the vowel before the two consonants is long by *position*.

²⁶ These three monosyllabic particles are always adjunctive, and can never (with correctness) be used as separate and distinct words.

²⁷ With these may be conjoined all syllabic particles in *e* occasionally found at the end of certain words; such as -ptē, -cē, -tē, -dē :—thus, mēāp'tē, hīc'cē, tū'tē, quām'dē.

²⁸ But adverbs in *e* derived from adjectives of the third declension have the final syllable short; as, fā'cīlē, *easily*. To which add īmpū'nē, *with impunity*, a word of doubtful derivation: and hērē, *yesterday*.

²⁹ Likewise ō'hē: the final syllable, however, of fērē is, sometimes, found short; as is also that of tēmērē, *rashly*.

³⁰ To which add sūpēr'nē, *upwardly*, and īnfēr'nē, *downwardly*.

³¹ Likewise the conjunction ū'ī; and cū'ī, whenever it occurs as a dissyllable—which however is seldom. Neuters in *i* have the last syllable short: as gūm'mī, *gum* or *gums*.

³² Except, however, final *i* in the vocative case, singular, of Greek nouns forming their genitive in -ēn'tōs: as, Sī'mōī, Pý'rōī.

⁴⁷ The old adverb nē'nū for nōn, not, and the old preposition īn'dū for in, which occur in most of the earlier authors, have the final u short. To which may be added ultimate syllables in -ūs, with the s elided; as, plē'nū', full, for plē'nūs: of this last sort of elision, many instances occur in the poets prior to the Augustan age, and in some even of that era.

APPENDIX.

I. PUNCTUATION.

A SENTENCE is either *Simple* or *Compound* :—*Simple* when it consists of no more than one subject, and contains no more than one *finite* verb ; that is, a verb in any mood except the *infinitive mood*,—whether the verb be expressed or understood :—*Compound* when it consists of more than one subject, and contains more than one *finite* verb.

Every compound sentence is divided into two or more parts (according to the number of independent finite verbs in it) by one or more of the following stops :—

1. A **CÓMMA** [,] which is used at the end of every simple subject, in a compound sentence :—as, *Cícero, who studied diligently, hoping to become eminent, gained learning, glory, and rank.*

2. A **SÉMICOLON** [;] which is used in the middle of any compound sentence, when half the sentence is finished, and the remaining half forms a contrast with the former half :—as, *A dishonest man may take pains to screen himself from shame and punishment ; but justice will take still more pains to discover and expose him.*

3. A **CÓLON** [:] which is used when the sense is perfect, but the sentence not ended :—as, *Dread to be known for a liar : because that character is detestable, and sure to last as long as life lasts.*

4. A **PÉRIOD** or **FULL STOP** [.] which is used at the end of every sentence, both simple and compound.

☞ The pause occasioned by a comma is equal to the time necessary (at the ordinary rate of reading or speaking) to count *one*. The pause at a semicolon is twice as long as at a comma ; that is, equal to the time necessary to count *two*. The pause at a colon is three times as long as at a comma ; or equal to the time necessary to count *three*. And the pause at a period (or a full stop), is four times as long as at a comma ; or equal to the time necessary to count *four*.

5. A PARÉNTHESES, () which is a clause in the middle of a séntence, such, that it may be omítted without détrimént to the sense: thus, *Quintilian (an accurate judge of mankind) was pleased with boys who wept when their school-féllows out-did them: for he knew that the sense of disgráce would make them émulous,—and that emulátion would make them schólars.*

☞ Instead of the two cróchetts inclósing the words of a paréntthesis, two cómmas are not unfréquently employéd: thus, in the précéding exámple, we might, with pérfect corréctness, write,—*Quintilian, an accurate judge of mankind, was pleased, &c.*

6. AN INTERROGÁTION, [?] which is a mark úsed instead of a full stop áfter ány séntence whereby a quéstion is ásked:— as, *Xenócratës, hóliding his peace at some detrácting discourse, was ásked, why he did not speak? “Because,” said he, “I have more than once repénted of háving spokén, but néver of háving been sílent.”*

7. A sign of ADMIRÁTION, [!] which is a mark that denotes wónder or some súdden emótion of mind: as, *Alás! the cares of life! Oh! the émptiness of its pursuits!*

II. CAPITAL LETTERS.

1. Évery séntence ought to begín with a cápital letter; and, in póetry, each verse may, or may not, commence in a similar mánnér.

2. All próper names, and words úsed for próper names, such, for exámple, as *Septémber, the Gráces, Tówer-hill,* should begín with a cápital.

3. Cómmon súbstantives, when emphátic, should begín with a cápital létter; but not unléss they are emphátic.

4. All ádjectives derived from próper names, as, *Róman, Swédish, Welsh;* and cómmon ádjectives when applied to pérsons of éminence, as *Almíghty God, Hóly Ghost, Róyal Májesty, Séréne Híghness,* are génerally made to begín with a cápital létter.

5. A quotátion or speech, introdúced in the middle of a séntence, may begín with a cápital létter; but when invérted cómmas are úsed, a cápital létter is séldom réquisite: as, *Zéno, héaring a young man speak more than was beccóming, said, “we have two ears, and ónly one tongue, to the end that we should hear much and say lítle.”*

* * * As the Rómans were unacquainted with the figures of arithmetic now in use among us, they employed certain capital letters to denote numbers:—as, for example, I for *one*, V for *five*, X for *ten*, L for *fifty*, C for *a hundred*, D for *five hundred*, and M for *a thousand*.

III. FIGURES OF GRAMMAR.

Any deviation from the ordinary way of speaking, or from the ordinary form of writing, whether for the sake of brevity, of beauty, or of energy, is called a **FIGURE**.

I. The Figures of ETYMOLOGY are:—

1. *Prósthesis*, which adds a letter, or syllable, to a word at the beginning: as gná'tá, a *daughter*, for ná'tá; t'ǔlĭ, I *bore*, for tǔ'lĭ.

2. *Apháresis*, which takes away a letter, or syllable, from the beginning of a word: as, 'st, *it is*, for est; 'rǔĭt, *he rushes forth*, for ǔrǔĭt.

3. *Epénthesis*, which inserts a letter, or a syllable, in the middle of a word: as, rĕp'pĕrĭt, *he found*, for rĕ'pĕrĭt; ĭndǔpĕrá'tōr, a *commander*, for ĭmpĕrá'tōr.

4. *Sýncopĕ*, which drops (or omits) a letter, or a syllable, in the middle of a word: as, pǔĕrĭ'tĭá, *childhood*, for pǔĕrĭ'tĭá; ōb'ĭt, *he died*, for ōbĭ'vĭt; dĭx'tĭ, *thou saídest*, for dĭxĭs'tĭ.

5. *Paragógĕ*, which adds a letter, or syllable, to the end of a word:—as, hĕrō'ĭsĭn, *to heroes*, for hĕrō'ĭsĭ; dĭ'cĭĕr, *to be said*, for dĭ'cĭ.

6. *Apócopĕ*, which takes away a letter, or syllable, from the end of a word: as, mĕ'n' ? *what me ?* for mĕ'nĕ; sǎ'tĭn' ? *enough ?* for sǎtĭs'nĕ ?

7. *Metáthesis*, which transpóses a letter in a word:—as, cōrcōdĭ'lŭs, a *crocodile*, for crōcōdĭ'lŭs; pĭs'trĭs, a *sort of whale*, also, a *galley*, for prĭs'tĭs.

8. *Archáismus*, which means an old or antiquated manner of writing, or of pronouncing: as, cŭr'rŭ, *to a chariot*; for cŭr'rŭĭ; ō'lĭ, *they*, for ĭ'lĭ.

9. *Hellenismus*, which implies either the adoption, or else the imitation, of some Greek word: as, Hĕ'lĕnĕ, *Helen*, for Hĕ'lĕnĕ; dĕl'phĭn, a *delphin*, for dĕlphĭ'nŭs; tĭ'grĭdōs, *of a tiger*, for tĭ'grĭs or tĭ'grĭdĭs.

II. The Figures of SYNTAX are classed under the heads of *Ellipsis*, *Pleonasmus*, *Enállagĕ*, and *Hypĕrbaton*; each of which is again subdivided into various branches, whereof the following are the principal.

I. ELLIPSIS.

ELLIPSIS is the omission of some word, or words, necessary to complete the sense:—as, ĕ'gōmĕt cōntĭ'nŭō mĕ'cŭm, *forthwith I myself with myself*, understand cōgĭtá'rĕ ĭncĭpĕ'bám, *began to cogitate or to think*. Quid mŭl'tá ? *Why many things or words ?* Understand dĭ'cām, *need I say*. Vĕn'tŭm ĕ'rát ĕd Vĕs'tĕ, *it was or it had been come to Vĕsta's*—understand ǎ'dĕm vĕl tĕm'plŭm, *fane or temple*.

II. PLEONASMUS.

PLEONAS'MUS is the use of something superfluous in a sentence:—as, Rōmā ĕst mĕ'á pá'trĭá ĕt ná'talĕ sŏ'lŭm, *Rome is my country and native soil*.

III. ENALLAGE.

ENALLAGE is a change of gender, number, case, mood, tense, or person : as, Rómā'nūs vic'tōr ěrāt, *the Róman was cónqueror*, for Rómā'nī vic'tō'rēs ěrānt, *the Rómans were cónquerors*.

IV. HYPERBATON.

HYPERBATON is a deviation from the common practice in the arrangement of words in a sentence, as respects either the natural order of events, or the established mode of speaking and of writing : as, vā'let āt/quĕ vī'vīt, *he is well and lives*, instead of vī'vīt āt/quĕ vā'let.

III. The Figures of PRÓSDODY are, *Synalépha*, *Ecthlipsis*, *Synáresis*, *Diáresis*, *Sýstolĕ*, *Diástolĕ*, *Synaphéia*, and *Cæsúra* :—the whole of which have been noticed above, under the head of PRÓSDODY.

IV. FIGURES OF RHETORIC.

The art of speaking and of writing with *propriety* is termed GRAM'MAR ; whilst the art of speaking and of writing with *élegance* is named RHÉTORIC.

The chief *Figures* of RHÉTORIC, or *Tropes*, as they are generally called, are the following :—

1. *Metáphora*, or the application of some borrowed attribute or quality, to express more beautifully, or more forcibly, some circumstance or appearance : as, gĕ'mīnī, dŭ'ō ful'mīnā bĕl'li, Scipī'adā, clādēs Lī'bŷā, *the twin-like Scipios (literally, sons of Scipio), two thunderbolts of war, havoc to Líbya* ; with allusion to Públius Cornélius Scípío Africánus májor, and Públius Cornélius Scípío Āmiliánus Africánus mínor :—or, vī'tō mō'rĭēns sĭ'tīt ā'ĕris hĕr'bā, *by fault of the air the dýing hérbage thirsts*, meaning, that, *owing to the drought the grass is in lack of moisture to further its growth, and enable it to regain and maintain its verdure*.

2. *Melónymia*, or the substituting for a PERSON or a THING some significant circumstance relating either to the one or the other : as, ěxpĕctā'tĕ cĭcā'dās, *wait for the balm-crickets*, meaning *ěstā'tĕm*, *In quā strĭdĕnt cĭcā'dā, summer, wherein the grasshoppers or balm-crickets chirp* : Virgī'lĭus lĕ'gĭtŭr, *Virgil is read*, for cār'mīnā ā Virgī'lĭō cōmpō'sĭtā lĕgŭn'tŭr, *the poems composed by Virgil are read*.

3. *Synédochĕ*, or the putting the whole for a part, or a part for the whole : as, trĭgĭn'tā mĭ'nās prō cā'pĭtĕ tŭ'ō dĕ'dĭ, *I gave thirty minæ for thy head* : Ā'rārĭm Pār'thŭs bĭ'bĕt, *the Parthian shall drink the Saóne*.

4. *Irónia*, or the assumed use of words in a sense diametrically opposite to their meaning : as, Ō sāl'vĕ, bŏ'nĕ vĭr, cŭrās'tĭ prŏ'bĕ, *O God save you, good sir, you have taken care honestly*. Here the words are at variance with the thoughts of the speaker.

5. *Allegória*, or the mention of something under a fictitious or feigned appellation, maintaining throughout the whole discourse a series of metaphors borrowed from the subject first assumed :—as, Ō nā'vĭs, rĕ'fĕrĕnt ĭn mǎ'rĕ tĕ nŏ'vĭ flŭc'tŭs, *O ship, (meaning, O Róman state) new waves will bear thee back to the sea, that is, new commótions will embroil thee in civil war*.

6. *Clímax*, or a gradual advancement in force of expression until the subject rises to the highest :—as, fá'cĭnŭs ěst vĭncĭ'rĕ cĭ vĕm Rómā'nŭm scĕ'lŭs, *vĕrbĕrǎ'rĕ* ; prŏ'pĕ párrĭcĭ'dĭŭm, *nĕcǎrĕ* ; quĭd dí'cām, *in crŭ'cĕ*

tõllřě? *It is a dáring thing to bind a Róman cítizen; an atrócity, inflict láshes on him; álmòst párricide, to slay him; what can I call it uplíft him on the cross?*

7. *Hypérbolě*, or the mágnifying a súbject excéssively in admirátion; or dimínishing it excéssively in contépt:—thus, sí'děřá věř'ticě fě'řiār *I shall strike the stars with my crown: lě'vířr cõr'ticě, lighter than cor*

8. *Prosopopéia*, or the personificátion of éither inánimate or irrátional objects: as, tē'cũm, Cātīlī'nā, pā'triā sīc ā'gīt, ět quõdām'mõdõ tǎ'cītǎ. lě'quĩtũr; nũ'lũm, jǎm tõt ān'nõs, fǎ'cĩnũs ěx'tĩtĩt, &c., *with thee, Cāt line, thy cõuntry thus impleáds, and in a máñner sílent she says; unt now, for so mány years no vĩllany has exísted, &c.*

9. *Apóstrophě*, or when a speáker, transpórted with eárnestness, addrésses himsělf to ánything that presents itsělf to his mind,—whéther présent or ábsent: as, Põlũdõ'rũm õbrũn'cǎt, ět āũ'rõ vĩ põ'tĩtũr. Quĩd nõn mõrtǎ'llǎ pēc'tõrǎ cõ'gĩs, āũ'rĩ sǎc'rǎ fǎ'mēs? *He mĩrders Põlydore and by víolence gets posséssion of his gold. What, O cũrsed hũnger of gold, fõrcest thou not mõrtal breasts untõ?*
